ello! We're back! How would you feel-if, without your permission, someone changed your name by deed pole to Millicent? Or Adolf? Or Earwax? Pretty peeved, I'll wager. Well, that's exactly how Starfox 64 must be feeling now, having been renamed 'Lylat Wars' by the increasingly eccentric Nintendo. Still, at least they've come up trumps with the game itself, which for once looks as good on a UK machine as it does on an American or Japanese one. There's more about the PAL conversion in Planet 64 on page 14, and then the world's most comprehensive review of it starting on page 34. And! Our chums at Electronics Boutique are sponsoring a nationwide Lylat Wars contest, details of which you find on page 44. And! Almost inconceivably, we've also enclosed a free copy of Gentleman Space Adventurer Quarterly, stuffed with invaluable Lylat Wars advice (UK copies only, probably).

All this has left us feeling tense, so to wind down we've been drinking delicious cups of Twinings spearmint and camomile tea. We're crushingly disappointed by *Baku Bomberman*, though. As Zy so perceptively points out in his review, whenever anyone gets excited about *Bomberman*, they tend to be reminiscing about the original version, way back on the PC Engine and SNES. Meanwhile, Hudson have been tinkering with the formula over the years, completely losing track of what made it so good in the first place. And Baku Bomberman, which bears no resemblance at all to the original game, is consequently no fun at all. Bah. And it's meant to be coming out over here in November, too.

Oh, and I almost forgot – *Top Gear Rally* is brilliant! It seems really slow and boring to begin with, but after you've played it for an hour or two, and got the faster cars, and got the hang of the steering, it turns out to be one of the best racing games there's ever been on any console. The way the car responds to every little bump in the road is mind-boggling.

I got up to 38 mph on my bicycle recently.

Prepare yourself for two tremendous free gifts with the next issue of **N64** Magazine!

# Short, back and sides

As well as multiple-route courses, San Francisco Rush also has tonnes of secret bits. They're usually hidden away out of sight, but by using the Practice Mode (where no other competitors are present and you get 999 seconds exploration time) you can soon hunt them down.

Some are simple alternatives to the main route, like mud paths through a trackside forest, but others are less obvious. Look out for the yellow and black ramps and, more often than not, you'll find a shortle. Such as the route where you leap straight through a false concrete wall. Or where, with quick

enough reactions, you can pull away from the track into the city's sewer system (readying yourself for the exit which is high above the main road).

above the main road).

Like Rare's *Diddy Kong Racing, Rush* also has an adventurous bent to it. Instead of merely having to pace it round a course, you can also take time out to dig around for six golden keys which, once collected, unveil a 'special surprise'. Midway are keeping their cards close to their chest on what exactly the prize is, but we'll wager it's something along the lines of an extra track.

fter over a year of waiting, we're suddenly being swamped with decent driving games.

But while Multi-Racing Championship, Top Gear Rally and the forthcoming Lamborghini 64 vie for those serious racing honours, and F1 Pole Position tries (and fails) to navigate a nasty chicance, Atari's coin-op conversion of the excellent San Francisco Rush offers something altogether different.

It has, of course, all the basics in place - authentic handling, super-fast vehicles and gorgeous, city-based tracks are to be expected in any racing game. But Atari have used San Francisco's mazey streets as the base for a plethora of gravity-defying extras: cloud-high leaps, mid-air collisions, corkscrew flips and lap after lap of (often unintentional) explosions. From which, naturally, you'll recover.

It's a formula that will put some people off. But it shouldn't. Play Rush for a couple of minutes and you'll realise that the swing away from the realism of, say, Top Gear Rally is actually quite refreshing. But, more than that, the actual conversion itself is a far, far cry from the horrible unplayability of Cruis'rı USA, suggesting that Midway have learned something from past blunders.

There are six tracks to get your teeth into, ranging from a fairly pedestrian stroll through the outskirts of the town to more frantic outings in the centre of San Francisco. Courses are enormous, stretching for several miles a lap, and, like Multi-Racing, as you progress through the game, previously cordoned-off areas become accessible to race on.

The vehicles you rattle around in are eight in number. As expected, they're divided into solid all-rounders and speed-of-light sports cars, though you'll rightly wonder how a VW Beetle managed to make it into the latter group. There's also a compact little VW camper van for you to try on for size and - against all odds - it gallops around, feeling balanced and speedy and, indeed, very nice.

But these things are to be expected too. Where Rush differs is in its race structure. Out goes the largely featureless scenery of Top Gear Rally and the low-res, mud-flecked Multi-Racing geography and in come tower blocks, neon signs, fly-overs and terrace housing, all with a glorious visual sheen. Also gone are the gently up-and-downing roads of TGR and MRC. Here you can fly

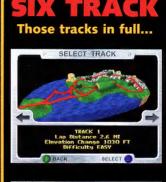

The reasoning behind the San Francisco setting is obvious. Just like Steve McQueen in Bullit, you can steam along at 150 mph, reach the brow of a hill and soar into the air, watching other vehicles pass below you. Obviously Macca, or anybody else for that matter, could never hope to get as high as this (he'd need wings to do that and, erm, be alive)

but Atari have allowed themselves a bit of leeway.

And because you'll frequently be air-driving, you'll also be witness to some serious mid-air congestion. The eight other competitors involved leap around in a similar fashion, meaning you'll often touch wings two hundred feet up, or cross over if you've both come off a hill diagonally. Each course has its fair share of ramps, too, leading to some spectacular flips and twists if you don't catch them absolutely right.

And the multi-course tracks are so clever in their design that even if you take one route that proves longer it'll immediately lead onto a second route that'll cut vital seconds off your time. Some shortcuts are less impressive than others, but there are very few racing games that can claim to throw you onto the roof of a skyscraper and let you swoop off and land unharmed. If nothing else, Rush is gawp-worthy to watch.

Add to that a two-player mode that leaves Top Gear Rally in its wake and this really should be a racing game to look forward to. Sadly, the UK release looks likely to slip until after Christmas, so we'll have to wait a couple more months to find out for sure. But we've already had the memories of Cruis'n USA banished from our minds and, for that reason alone, we're inclined to like San Francisco Rush. We'll have a review soon, then.

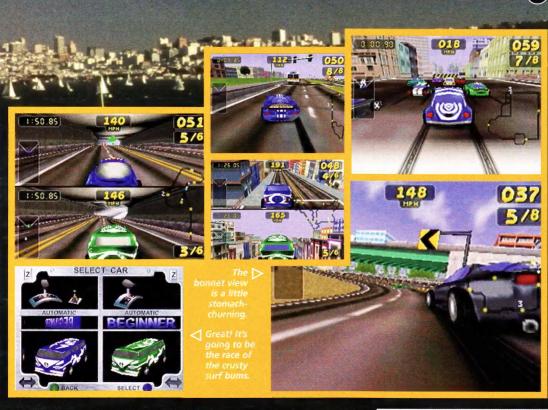

**TO BE CONTINUED...** Rush! (As the commentator says therein). We'll be reviewing it in our December issue. Hopefully

platform games were only ever exciting when Nintendo's latest creation beckoned. But after Jim's second appearance SNES owners had a twosome that, while arguably never matching the simple perfection of *Mario* and *Yoshi*, certainly offered a marvellous alternative. And, more to the point, they were a genuinely scary demonstration of what wanders through the minds of Dave Perry

But for Jim's inevitable first venture into 64-bit world, things have changed a bit. Shiny, despite being the series' original creators, are taking a back seat to concentrate on other projects, allowing Scottish first-timers VIS Interactive to create EJ's much-anticipated 3D universe. So, how did a developer formed just 20 months ago come to take over the reigns of such a stupendously huge game?

Chris Van Der Kuyl, Chief Executive Officer at VIS, explains: "Interplay found themselves at a loose end one day and wandered into our offices only to find the perfect home for Jim. They gave us two weeks to come up with a proposal for the game, which we did, and they signed it. We let them look at all major developments. But Jim

onami's track record with sports games has all the solidity of sizeable concrete wall. Their football titles are generally regarded as the best around – indeed, ISS64 is probably the finest football game there's ever been – while their other titles, like NBA In The Zone and International Track and Field on the PlayStation, are the classiest examples of how to do boring sports without making them boring to play.

With Nagano Winter Olympics, though, they really do have their work cut out. Downhill skiing is one thing (avoiding red flags about half a mile apart), but curling (bowls on ice – except slower) is quite another. However, the version on show recently at ECTS suggested that their Diamond Dust development team are well on the way to repeating the company's past successes.

Having the actual Olympic licence means, of course, that they at least have statistical realism on their side, with every competitor from every country taking part in the games next year included. But Konami have gone further, reproducing the courses that'll be on show right down to the last groove in the terrain. So the actual downhill and ski-jumping run (with pleasant mountain views) will present and correct, as will the tubular luge and bobsled courses. The stadium that'll house the speed skating and curling will also be faithfully reconstructed.

Tasty lashings of motion capture mean that all the athletes boast the incredible realism of those in the company's previous sporting conquests (particularly 15564), and, as is becoming the norm in these distinctly multiplayer days, there'll be ample opportunity for some four-player action in most of the events. (And simultaneously too, according to Konami, though at this stage they haven't revealed exactly how this will work.)

Yet there's no denying that winter sports have always been a bit of an Achilles heel in the past for developers. Anyone recalling

Nintendo's own Winter Gold on the SNES, for example, will be well aware that lush visuals and super-fast events do not a good game make. The face-punching speed might have been there, but the events themselves were deathly dull,

lacking variety. Add to that, more recently, Sony's fault-ridden Cool Boarders on the PlayStation and you'd wonder why anyone would dare touch the colder end of the sports scale.

But as we dabbled in the delights of the first playable version at Earls Court a couple of weeks back, it was

obvious that Nagano was well on its way to changing

winter

fortunes. Up against the sharp-edged definition of the PlayStation version, N64 Nagano seemed pleasantly smooth, with the now-traditional (and frequently criticised) 'fuzz' actually giving it a more realistic look.

Expect a decent PAL translation before the Olympics themselves in February...

A The mounts in the

you think big, will you we feel you for the manual back. For your feel you also get a Rumble Pak.

t might have a ridiculous name, but Lylat Wars fills the whole screen and if it is any slower it's not so you'd notice. Nintendo's Japanese programmers, it would appear, have finally woken up, smelt the plum tea and realised how hacked off European N64 owners have been with all the squashed, low-speed PAL conversions we've been getting. And as a result, once you're past the title screen, Lylat Wars is virtually indistinguishable from the American

Other developers have always seemed capable of converting their games from the 60Hz, 525-line American and Japanese television system to the 50Hz, 625-line PAL system we Europeans use. Indeed, Konami's ISS64 actually avoids the slow-down that occasionally blights J-League Perfect Striker which it's based on. It did take some effort on Konami's part to get the

version of Starfox 64.

PAL version working that well, though. "As a ballpark figure I'd say it takes about three to four months to do a full-screen PAL conversion," says Jon Sloan at Konami's UK office. "One of the factors you have to watch out for is that Japanese programming teams put in phenomenal hours when a game's near completion – they actually sleep in dormitories at work, never leaving the building. What that means is that when they finally finish the Japanese version, they take a month off straight away, so it's several weeks before you can even get started."

Up till now, though, Nintendo themselves just haven't been bothering. Why not? Surely they should have been setting an example. We asked an employee in the technical department of THE Games, Nintendo's UK distributor, who, mysteriously, asked to be referred to only as 'Mr N'. "Well, it's all a compromise between launch times and

optimisations. We do manage to do it some of the time, as with *Shadows of the Empire*. With other titles, there sometimes just isn't the time – *Mario Kart* was released well ahead of its original scheduling, for example."

Shadows of the Empire was written in America, though. And Blast Corps and Killer Instinct, previously Nintendo's only other full-screen conversions, were written by Rare here in the Britain. Up until Lylat Wars, meanwhile, everything that's come out of Nintendo Japan including Wave Race 64, Super Mario 64 and Mario Kart 64 - has had a squashed picture and obvious slow-down. How come Nintendo's Japanese headquarters suddenly seems to have discovered the secret of converting to PAL? Well, rumour has it that Rare were recently contacted by a certain team of Oriental programmers asking just how it was they were managing to make their UK games look so good...

## BE ON TELLY

Fancy being on lefty? Games Master an recruiting gamers for their new series, which starts on Channel 4 in November. They're looking for people who are brilliant at games, with, ideally, some sort of specialised skill or unusual 'quirk' (Gameplaying twins, they suggest by way of an example, or someone with a granny who's sindy with a jurged I If that sounds like your write to them at: Games Master, PO Box ST, Lannon E14 9TN.

With Lylat Wars, Nintendo have at last worked out how to do decent PAL conversions!

by Jonathan Davies, with 'additional reporting' by Stuart Campbell

Up til now, UK games have been squashed like this.

But here's Starfox next to Lylat Wars. No difference!

You can also have all the text in French for a change, and switch it in the speech is in 'Lylat', rather like the SNES game.

# THE FLIP SIDE OF THE COIN

Genkland imagines meanwhile, who he written Mod Placing Champinodigs for Ocean, don't seem to have grasped the principles of immediagity PA, at all, was lided tigst to see the UK version of MPC antil after wind put the functing bunched to connection that one makes and to report that the grat black buildes you would drive a bus through tuckly in till an ordernaming game.

# Cheaper games are here!

More good news! They're practically giving them away!

Il right. Not really. But, thanks to a reduction in the cost of manufacturing N64 carts, we should see at least some reduction in the price of new N64 games. Although a cut in the factory price of \$6 (£4) per cart might not sound like much, once that's been multiplied by all the factors involved in getting a game into the shops it works out at a saving of around 15% on the retail price.

So far, only Nintendo of America have announced publicly that game prices will be falling, with Howard Lincoln confirming at summer's E3 show that American N64 owners would be paying \$10 less for their games. But now it looks like the same reduction will apply here in the UK. "There will be movement before Christmas," reckons Alex Fitzgibbons at THE Games, Nintendo's UK distributor. Translated, that means that the big games Nintendo are releasing here during the remainder of the year - titles like GoldenEye 007 and Diddy Kong Racing - will cost less than top-notch Nintendo games have done so far, and possibly less than £50.

And lower prices won't just be restricted to Nintendo's own games, either. The cart-manufacturing savings are being passed on to third-party publishers, like GT, Ocean and

Konami, who've so far struggled to get carts into the shops for less than £65. So we should be paying less for games like *Duke Nukem 3D* and *Nagano Winter Olympics*. And! A UK release for *Mystical Ninja* 64 (*Ganbare Goemon*) looks all the more certain.

## A NEW GAME EVERY WEEK!

Aside from high game prices, the N64's other big problem up till now has been the lack of games to choose from. But that's about to change too, with at least one new game a week being released up till Christmas. Here's Nintendo's provisional (i.e., subject to change) release schedule for the rest of the year:

To the second

Southerfye 507 Fomberman 64 Top Gear Kally Lemborghal 64 Hody Kong Rasing Wookel Makes

And those are just the games Nintendo are distributing themselves. Before Christmas we can also expect to several games from other publishers, including Duke Nukem 3D, NFL Quarterback, FIFA: Road to the World Cup, Madden 64 and Extreme G.

### **WARNING!**

Word has record us that readers have been in vine trouble getting hold of goods they've ordered om a company called moor Zone Ltd. We'd suggest readers don't send any money to import Zone in row. If you've already done so, and haven't recover any than in return, it, contact your local Trailing Standards office to see if they can selp.

### **64DD LATEST**

To be honest, the cony real movement on the 64DD front is that Nintendo's N64 disc drive will definitely on show at Nintendo's World 97 (as the Shoshinkai exhibitor is now called) at the end of November All there will be the machine's four launch games. Sim City 64, rocket Monsters 64, Mario Paint 64 and Monther 3

(Earthbound 64). And the system is styling on target for launch in Japan in March, with a US release following in the autumn.

Which just leaves the small question of the Furnes — launch, contenting which Nintendo are completions, silent. Could it be that we won't be seeing the machine until the — of next year, or — — k – 1999? We shudder to think.

## **POCKET TV**

Results to owers of our Game Japan pages will have some idea of the way that, in Japan at the moment, Nintendo doesn't mean Nit, it means to ket Monsters on the Game Boy, PM carts are still celling by the million there a year and a half after the game release, so some sort of TV tie-in was inevitable.

The Pocket Monsters anime

series recently started on Japanese TV, and features all the the acters from the game including a certain Pikachu, star of the mystery N64 game featured in last month's Planet 64...

# **New Goods**

Items to enhance your N64-life.

### **ACTION REPLAY**

Datel • £50 • 01708 810800

Some of the cleverest people in Europe work at Datel. No sooner does a new games console appear than they've come up with all sorts of devious devices to plug into it. And they're most famous of all for their Action Replay cheat code carts, which have given infinite lives to generations of gamers. They've taken rather longer than usual to come up with an N64 Action Replay, though, and are charging a but-l-could-get-a-game-for-that £50 for it.

As with the SNES version, it plugs in between the N64 and your game. But! Rather than forcing you to feed convoluted codes into it, it comes with cheats for most of the games that've been released so far built in. Covered are FIFA 64, MK Trilogy, Pilotwings 64 (infinite rocket belt fuel and rockets), Shadows of the Empire (infinite lives and so on) Super Mario 64 (a whole range, from infinite lives to the 'hilarious' Big Fist Mario), Turok and Wave Race 64. Then, as more games are released, Datel intend to release 'smart cards' which plug into the back of the Action Replay and contain more

cheats. And! It's also possible to enter codes the old fashioned way watch out for these in our Tips Extra

section. All that's missing is the facility to work out codes for yourself, one of the SNES version's more engrossing features.

It works (although you have to jiggle it about a bit sometimes), and if Datel keep their promise to support

it with smart cards and codes it'll last you forever. Cheating's cheating, though, and is something we frown upon here at N64 Magazine.
Unless it's in Mario Kart.

### 1 MEG MEMORY Datel • £15 • 01708 810800

We've decided to stop including memory cards in New Goods as they're all the same. Watch out, instead, for an exhaustive test-todestruction that Tim's doing on them in a couple of issues' time. The thing is, though, Datel's new 1Mb card actually isn't isn't the same, so we're making a special exception for it. Normally 1Mb cards are split into four 256K 'pages', each one the size of an ordinary Nintendo Controller Pak, and you have to use a fiddly button to flick between them. Datel, however, while rummaging around in the N64's innards, have discovered that memory cards don't actually have to be limited to 256K So their latest card gives you 1Mb in one continuous lump, and removes the button. Games seem quite happy with it too, with Top Gear Rally cheerfully saving championship data, settings and car designs onto it where it would normally start complaining with a 256K card. If you're about to go memory card shopping, then, we'd suggest you head straight for this one.

#### TREMORPAK

InterAct • £TBA • 01204 862026
Nintendo's Rumble Pak does add a certain something to Lylat Wars, and most games from now on will use it – GoldenEye, Top Gear Rally and Diddy Kong Racing included. you

only get one in your Lylat Wars box, though, so for multi-player wobbling you'll need some extras.

We're not sure how much InterAct's alternative will cost at the time of going to press, but assuming it's less than the £15 official one it'd make a good alternative. It's not quite the same somehow, buzzing rather than trembling, but you get a handy battery-saving 'high/low' switch.

# TRIDENT PAD Spectravideo • £20 • 0181 9022211

The only failing with Nintendo's Controller is that it costs £30. Other manufacturers have so far seemed oblivious to this,

seemed oblivious to this, charging the same price for their alternatives and justifying it with useless extras like auto fire and slow motion buttons.

What's really needed is something that works just like the

Nintendo pad but costs less. And that, at last, is what the Trident Pad appears to be. Although the buttons may be a little clicky for some tastes and there's a rather vague wobbly area around the joystick's centre position, it's only £20. Hurrahl

# TRIDENT PRO PAD Spectravideo • £25 • 0181 9022211

Same pad, but they've added auto fire and slow motion buttons and £5 to the price.

70%

# CHECK YOUR PLUG!

# Or your N64 might give you a nasty shock.

intendo have discovered that there could be a problem with the plugs fitted to some N64s and SNESes. There's a slim chance that the back cover of the Hitachi HE-25 plug (one of three types of plug fitted to Nintendo machines) might come loose, exposing the wires inside. Nintendo have sugggested that you switch off the mains socket your machine is plugged into, remove the plug and check between the lower two pins to see if it says 'Hitachi HE-25'. If it does you should telephone Nintendo's helpline free on 0500 030 030 and they'll tell you how to get a free replacement. If it

# RETROW with Jason Moore

The past is a place - they do things differently there. They certainly did when it came to computer games, anyway.

hen asked to name Nintendo's rivals, most people would say Sega and Sony. But actuall to start off with, Nintendo hesitatingly followed in the footsteps of another Japanese games manufacturer. Epoch started developing handheld LED games three years before the first Game & Watch saw the light of day. The most successful were released in this country under the Grandstand name, including classics like Astro Wars and Scramble.

Epoch weren't just interested in the handheld market, though. In 1977, almost a year before Nintendo released the N15 Pong game, Epoch released their System 10 console, the world's first four-player Pong machine. Console development didn't stop there, either. 1982 saw the release of the Super Cassette Vision, an 8-bit cartridge-based console, which, while not a million-seller, set the benchmark for Japanese console manufacturers.

Now, I know what you're thinking. Plenty of people where making consoles and handhelds before Nintendo. Why's Epoch any different? It wasn't until 1984 that Epoch developed their most important console. The Game Pocket Computer was the first true cartridge-based LCD

handheld to appear since MB's Microvision. which we couple of tssues ago. The GPC is quite a step forward from MR's machine, the

analogue controller

replaced with an 8directional joypad and four fire buttons allowing for more complicated games. The screen is about 4x4cm, with good LCD definition across the machine's 75x64 pixels. The machine's rather large, like a thinner version of the Lynx or Game Gear, so, despite the name, pocketability isn't really a consideration. Its two-tone white plastic and black fascia give the GPC aclassy look. There's even a little window allowing you to see the artwork on the cartridge once it's inserted, Great,

The machine features two built-in programs. One's a simple block puzzle, and the other's a drawing program, which, without the facility to save your pictures, is rather pointless. Four other cartridges were released with the machine: Astro Bomber, Reversi Block Maze and Mah Jong. (Great! -Wil) Why the machine failed is

anyone's guess, but its position as a missing link between Microvision and the Game Boy is obvious.

#### RAD GRAVITY (NES)

Nintendo's multi-million-selling Mario. series left third-party developers playing catch-up, the result being a wealth of cartridges introducing funky new characters intent on stealing Mario's kudos. In this title Activision introduced the world to Rad Gravity, a character who can best be described as Russ Abbot in a space suit. The introductory

sequence looks promising: a huge, detailed sprite travelling between planets in a space suit: Unfortunately, things get less inspiring once you've beamed down to one. It's yet another

lacklustre-platformer, with unimaginative enemies, very simple level design, dull power-ups and nauseating music. And the one inventive, original thing in the game, a level which is meant to be played upside down, is completely unplayable 34% RETRORATING

MARBLE MADNESS (NES) Marble Madness was a number one arcade machine, responsible for inventing a whole new genre and countless console and computer derivatives. The game involves directing a marble down a varied selection of sloped courses before the time runs out The courses contain many tricky obstacles, like tight passageways and moving platforms. There are also enemies intent on sucking your ball into oblivion. It your ball falls off the side of the path, or is caught in a trap, it's placed slightly before the obstacle so you have to get past it again which of course wastes your ever-evaporating time. The NES version is excellent - fast and smooth - and just as addictive as the arcade original Maybe it's time for a 64-bit update? 81%

#### MARIO ALARM CLOCK

You know what it's like. You've just got that hot new N64 title and you need to get up early enough to play it before you go to work the next day. Well, what better way to be woken from your slumber than by everyone favourite plumber? The Mario Alarm Clock arouses you with a cheery. "Wake up! It's time to leave

dream land!", followed by a jolly extract from Mario's theme tune. Hit the mushroom and you can snooze on for ten minutes While they've been. out of production for about five years

they did sell quite well, so you should be able to pick one up at a car

boot sale without too much trouble. To be honest, when I wake up the last thing I need is Mario's voice jollying me along. Thankfully the clock is punch and throw-proof

## RETRORATING 73%

#### FIRE ATTACK **GAME & WATCH**

Nintendo's early handhelds always make the more exciting finds, and they usually have grotesque themes. Fire

Attack is one such game, and puts you in charge of a wooden fort. The four control buttons allow

you to move between four positions on top of the building, and, armed with a hammer, it's your duty to defend the fort from Red Indians intent on razing it to the ground. Like many G&W games, Fire Attack is simply a case of keeping an eye on which directions the enemies are coming from and pressing the relevant buttons. If an Indian

manages to ignite the building, there's a charming graphic of you yelling in agony as you're burnt toa crisp. This rare 1981 machine is slightly unusual as the familiar G&W shiny fascia is replaced by a matt black finish, maybe intended to suit the theme of the game

Extreme-G™ takes gaming to a new level and sets the standard as the fastest, most graphically impressive game to grace the Nintendo® 64. "The fastest game on earth." (Nintendo Magazine)

TAKE IT TO THE EXTREME

There was a time when platform games cropped up on consoles at the rate of one every thirty seconds. But since Mario 64 the N64's had none. Where've they all got to?

"Nintendo apologise for the late running of most of the N64's 3D platform games. This was caused by signalling problems in the Kyoto area. The revised schedule is as follows..."

# Supertonic

ans of N64's Ultra Release List will know that Ubi Soft's longawaited platformer first came to the world's attention as 'Ed', the name of the game's lead character. At the recent ECTS show in London, N64 Magazine got a chance to see exactly where the French

development team have got up to. The game takes its visual inspiration from Ubi Soft's all-conquering Rayman and uses a similar animation style for its characters. Hence Ed - our hero - is unecumbered by the need for arms or legs, being quite content to keep his feet and hands in a mysterious and fetching fixed orbit around his body. Enemy characters are similarly designed but look a good deal more threatening quite a feat.

Fortunately, while Rayman was a rather staid two-dimensional platformer, Tonic Trouble is a full 3D affair. Of the two levels on show (the game can't be more than 50% finished at the moment), one was a fantastically fast human-bobsleigh, snow-slide thing and the other a more conventional trip

through a fully three-dimensional dungeon. Slightly worrying was the absence of any actual game elements something that perhaps should go into the levels from the very start of the game's life.

Undoubtedly the

best feature of Tonic Trouble so far is the lead character Ed. His facial expressions and apparent personality seem perfect and will definitely ensure gamers feel more involved with this hero than they

ever did with Doraemon the Psychotically Staring Atomic Cat, for instance. Bets on for a French platform king early in '98, then? Okay, but Pot Noodle money only at this stage, eh?

is genuinely leaps and bounds ahead

sprite malarky and in comes multi-

of its predecessor.

Nintendo's big Christmas hope has unfortunately turned into Nintendo's big early-next-year hope, which doesn't have quite the same ring to it. Banjo-

Kazooie is hoping to take the dual character, dual abilities concept to its 3D conclusion, and from what's been seen at E3 and from the screenshots released by Nintendo, Rare seem to be making a damn fine job of it. Latest news on a release date suggest that the game will be first out in Japan in January or February with a translation to follow quickly afterwards. However, James will get the full low-down when he

travels to the World of Nintendo Show in November.

Rare/Nintendo • 1 player • UK date TBA . Japan: March

"Hi! I'm Conker!" The heliumfueled greeting from Rare's new super-cute character melts hearts or turns stomachs depending on who you're talking to. There can be no doubt that Rare are to Nintendo what Pysgnosis are to Sony, it's just that sometimes you wish that their characters weren't quite so relentlessly nice.

In actual fact, Conker's Quest is likely to the first game published by Rare themselves and it already looks like another slice of platform heaven. A release date a little after B-K looks likely, but the covers over Conker will probably be turned

back a little further at - again the World of Nintendo Show.

### ce Circus

Ocean/Infogrammes • 1 player Release date TBA

"It's French and it's weird" is basically the line from Ocean at the moment. Oh and "It won't

be out until well into next year' is another favourite. Tim played the game at E3 and can confirm both statements. Our French agents are scouting hard as you read. In the meantime we had a little preview in issue 5.

ace Jelly

Software Creations . No. of players TBA . Release date TBA Mysterious game alert! Software Creations have an incredible six games in development, but as

Space Jelly (provisional title) is the only one not yet to have found a publisher, it's the only one the tight-lipped SC people are prepared to talk about (in the hope someone'll notice it and sign it up, see?). The Earth has been hijacked by a gang of inter-stellar pirates (hey, it

happens) and it's your hero's job to get it back. That's about the size of it, we think

N64 Magazine were lucky enough to see a video of the game running. Craning our necks and struggling with the poor quality of either the VCR, the tape or

both, we could just about make out some pretty impressive platform sequences. The game is highly colourful and seemed to be set aboard a highly futuristic space station.

Futher enquiries about Space Jelly have met with polite but stonewall resistance. These developers get very cagey about their unsigned games. However, we'll get you the full story as soon as we've found the right arm to twist.

## Chameleon Twist

Ocean/Infogrammes . No. of players TBA = Release date TBA If Ocean are being mysterious about Space Circus, they're surpassing themselves with Chameleon Twist. "It's a 3D Platform game." Okay. Has it got a chameleon in it? "No comment." Right. Thanks very

Further investigations with the game's creators Nihon Video Supply System reveal that Chamelon Twist does indeed star a Chamelon, a chameleon with a very long game-playing tongue. His 3D platform adventures take him through a whole variety of different scenarios from lush forrest to industrial wastelands. All looks good to us - more news after that World of Nintendo Show almost certainly

# Earthworm

Interplay • 1 player • Worldwide release: Early '98 Full details of this curious game can be found on page 10. With pictures too!

# Generation game nother Tekken-beater, then? Hopefully. Although in its very earliest incarnation at

ECTS, G.A.S.P - standing for Generation of Art, Speed and Power - plainly had a very long way to go.

The game, formerly known as 'Battledancers', is a 3D fighter with a structure similarly modelled to Tekken's. 700 different moves make up G.A.S.P's repertoire and, as opposed to Soul Blade's multicoloured sword swishs or Mortal Kombat's blood-soaked special moves, this is fighting the more traditional way, with hand-to-hand combat preferred rather than the currently popular swords and knives.

However, as the game is set in a

fully interact-with-able arena, where any loose objects can be used, there's also the opportunity to give your adversary a quick blow to the head with a handily placed drainpipe or let his midrift pay a visit to a stack of recently dumped storage boxes. The potential for in-fight variety, then, is immense.

Add to that a feature whereby you can create your own fighter and save the feisty blighter onto Controller Pak and you've got a setup that sounds akin to a beat-'em up fan's dream. Given Konami's track record, it would be a dribbling fool who wrote them off at this early stage. And certainly, by the sounds of things, we're not about to start.

# The shooting zone

KONAMI

DECEMBER

he strangest thing about NBA In the Zone '98 is that, despite it being scheduled for Christmas, hardly any shots have been released. Which suggests that, in fact, it won't make it for Christmas. (Certainly, it was only on video at ECTS and that looked sparse of

the sort of on-court action that's generally required in these games.)

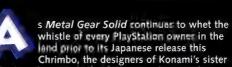

Still, Konami promise a much more realistic approach to the sport than Midway's NBA Hangtime with over 300 different moves including signature moves for individual players - stamina ratings and full season

statistics. The game will also be Rumble Pak compatible and be open to up to four players at a time. Unfortunately the Create Player facility on last year's PlayStation version doesn't look likely to be included, however

It's sports a-plenty, then, for Konami...

project on the N64, Hybrid Heaven, this month revealed the very first concrete details regarding their E3-storming RPG, albeit in the form of a storyline.

Whilst there still isn't anything playabe (the care s currently running in demo form on a development machine), the game, it seems, it set to be an Earthinvasion story, concerning the off-used exportmentmone-wrong premise

After leaving contact with a space station on which they were creating the ultimate soldier, the government sends up a shuttle to investigate the odd goings-un-University the shuttle gets taken over by the soldier, who has already gone haywire and killed everyone on the station. Jumping on the shuttle, the soldier heads back down to Earth, crashing in a deserted Lity.

Rather frustratingly, he refuses to die in the crash and sets about taking over the city. And, not only is he snawning an army like nobody's business, but he's proving far too ticklish for the authorities. So, seven track commandos are sent in to put him down. But, another kick in the teeth comes when it's discovered six of them are rubbish. Which leaves you. As and the ultimate soldier. In the universe. Good luck, then.

Hybrid Heaven will be entirely third-person and, in combat, you'll be able to take to enemies with a variety of weapons (monted to rival Turok's in an RFCI ish way). The enemies later on will also become harder to trace as they garner the ability to mutate mto humans. Which means you'll need to use the old noggin a bit.

Be sure, when more appears, we'll be the first to tell you.

## HYBRID HEAVEN

KONAMI

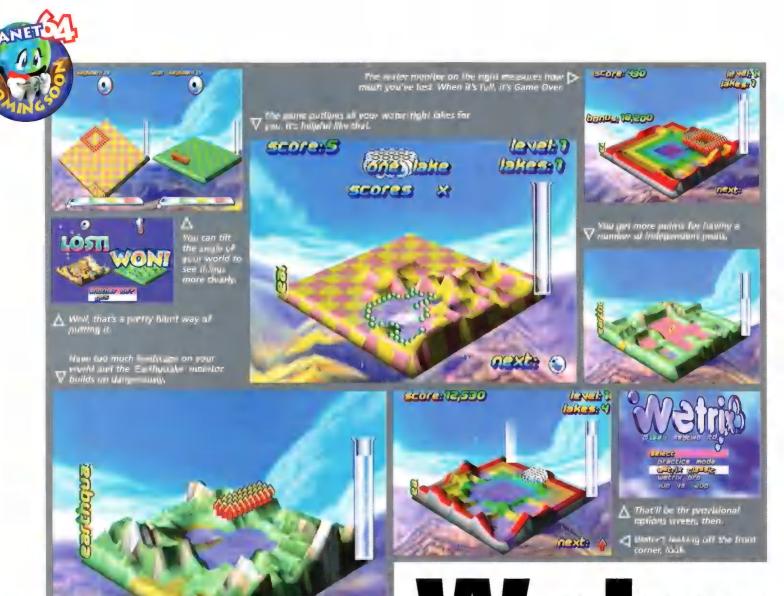

WINTER '98

# Water Wonderland

ollowing last month's Wetrix news came N64 Magazine's first opportunity to play an early N64 version of Wetrix. And it's... interesting. The idea is to use falling blocks of land to build up a landscape in such a way that, when the rain falls, the water will be trapped in lakes. If too much water escapes off the edges of your world, the beaker on the right-hand side of the screen overflows and it's game over. Man.

Fortunately, things don't remain

this simple for long. As well as the falling land bits and water, there are landscape dissolvers, bombs, meteors and the odd earthquake to deal with. The competitive mode (at the moment only the two-player split screen is present – eventually it will be fourway) allows players to launch water and earthquake attacks on their opposition, whenever it looks as if things are getting too comfortable for them.

The N64 view of the game is

that, although the basic idea is excellent, a lot of work needs to go into the polishing-up. *Tetrisphere* looks complicated but its highlighting system actually makes it easy to work out where your block pieces were going to land. Whether it's the isometric viewpoint or the lack of a rigid grid system, placing pieces

accurately in Wetrix is currently a tricky proposition, adding a lot of unecessary difficulty to an already challenging concept. At the moment, it's just far too confusing and difficult to be a great.

Still, if they get it right, Ocean could have a classic puzzler on their hands.

Some all-new screenshots and more news on Zelda 64. What would we do without it?

# Miyamoto talks Zelda!

## EGEND

**NINTENDO** 

A All the business about Link growing up is starting to became dear....

But whether it's done during the game or as a flushback, we don't know

A kink lighting a My yrrun ilung rif minr sort.

Link's equipment De activities seem in becuming more unreacular by the Hour Olives

ust a month and a half shy of Shoshinkai, Zelda 64's chief mastermind, Shigeru Miyamoto, has revealed even more about Nintendo's most anticipated title yet. Although treading carefully (suggesting next month's show will herald the really juicy stuff), Shigs spoke at length about Link himself and his ever-expanding inventory.

'There's a boomerang in the game," he told Japanese N64 magazine 64 Dream. "This is really cool. Currently, only the kid can use the boomerang. But I'm wondering if the adult will be able to use one, too. And there are two ways to throw it. One is to beat an enemy and the other is to use the boomerang to pick things up. The bow and arrow will also have two uses."

Two things, then. Firstly, what's all this kid and adult business? Well, no one's entirely sure. As we said last month, the game is set prior to the SNES Zelda adventures, even though Link himself looks older than before. Miyamoto himself wouldn't expand, but rumours abound that the Pointy-Eared One literally 'grows up' during the course of the game. Quite how

this fits into the storyline is unclear. It sounds almost too good to be true.

Secondly, will the screen change into first-person when you throw the boomerang, in the same way that it does when you're about to fire an arrow? Hmm. We're not sure. Miyamoto admits, "You can change the viewpoint yourself. And the viewpoint is also changed automatically when you use certain items," but didn't reveal whether this would apply to the boomerang.

However, with all this talk of Zelda proving to be fantastically appetite-wetting, there had to be a downside. And Nintendo publicist Yoshio Hongo explains what it is: "I can't say for sure whether Zelda will be released this year or not. We always try to meet our release dates but sometimes the development doesn't go as expected. And we don't want to release something we're not ready to release.'

So, the Zelda cartridge might not make it out this year. Expect more concrete details at Nintendo World '97. Until then, have a good oggle at all these spanking new screenshots.

## FIGHTING CUP

OCEAN/IMAGINEER

64M

XMAS?

# cup run

irst previewed in N64 way back in issue 4, Imagineer's beat-'em-up was then titled 'Struggle Hard'. A couple of months later and with Ocean down as European distributer, the game is now 'Fighting Cup.'

As we explained in issue 4, the game is trying something a bit new with the old beat-'em-up format. Instead of matches taking place as a best of three rounds with the fighting a simple race to deplete your enemy's energy bar to zero, the game introduces a nifty points system. Invisible judges award points for ring outs, knock outs and particularly flashy moves - the first person to win the requisite number of points wins the bout. Easy but new.

When we first previewed the game, it was by no means certain that it would ever make it to these shores. Ocean picking up the licence (as they did with

World Arena

Imagineer's Multi Racing Championship) will ensure that UK gamers will get to try the game, which is excellent news. While Fighting Cup may not have the visual splendour of Tekken or the Virtua Fighter series, it's almost certainly going to surpass Dark Rift and War Gods for the title of best N64 beat-'em-up. We're looking forward to it!

# It's chess, mate

es we know, it's questionable. However Virtual Chess 64 will boast (according to Titus) a game engine so powerful and versatile, it'll be able to take on all levels of player from the novice to the semi-professional. A good thing we're sure you'll agree. If you're interested in chess.

The game will also include options for a 2D or 3D board, a number of different play modes and a chance for four players to participate in a game at once. Most puzzling of all, there'll also be a

64M

TBA

cartoon battle mode. God alone knows what that's all about.

We've already lined up Wil to do the review when the game arrives who knows, it may even displace mah jong as his favourite 'quiet time' game.

# An ear to the ground

After perplexing us last month, Nintendo's newest game - the acreenshots, you may recall, were or a slightly odd yellow dog-thing appears to be called Some sources believed it to

be the much-mooted Pocket Monsters 64 but, in fact, it would seem that Warm is a stand-alone title in itself. (Although Pikachu himself - the yellow dog-thing - s a genuine Pocket Monster). Hmm. All very strange

Imagineer finally unveiled ther lake on the Sim City franchise, Sim 37, Val. But general opinion has it that it really didn't look all that different from their, admittedly brilliant, SNES outing. Thus, it's been taken back in for "tweaking" This game, though, shouldn't be confused with Nintendo's own version, and which is to debut on the 64DD some time next year Developers HAL Laboratories have almost finished the game, according to their President Satoru Iwata, but there's still some stuff to do

Sticking with Imagineer nowever, their armine with formerly known as 'Struggle Hard' has come up for some criticism. Its point-scoring system (as opposed to the normal best-of-three match) is unique but Ocean, who have signed the game up over here, have asked for the visuals and movement of the fighters to be looked at again in an effort to get the best out of a hugely promising title

Namco's basebail title. 1, seems to be taking a different route to its predecessors. Not only in it by-passing cute characters for real motion-captured humans but it'll have eight play modes, one of when allows you to take on an alien of a called the Metaliens who, it was seem, are a bit handy at basets at you lose the match, your plays be abducted. Nice.

And, finally, Konamis m Zone (previewed will not be called 'Fown Electric Japan, as it was for last with the control of PlayStation release Indianal will go by its America Good job tos

Monthly report from inside the home of Nintendo 64.

By Game Japan/Recca-sha Corp. (www.rcp.co.jp/recca/)

# Nintendo's soar thanks Game Boy

intendo have announced interim profits of 48 billion yen (£250 million), nearly three-and-a-half times what they made last year. And the main reason is the Game Boy.

GB production has been increased to 100,000 units a month since August, with its continuing success being, of course, thanks to the immense popularity in Japan of *Pocket Monsters*. Over six million copies of the game had been sold by the end of August, which is more than *Super Mario*, the previous record-holder, ever sold. A trick that's helped to boost *Pocket Monster* sales is that there are three versions of the game in diffent coloured packaging: red, green and blue. The structuregame in each is basically the same, but the

monster inside is a little bit different. Incidentally, Super Mario Brothers, which went in sale in September 1985 for the Super Famicom, has sold a total of 6,180,000 copies to date. Pocket Monsters. which appeared in February 1996, has taken just a year-and-a-half to achieve 6,220,000 sales. Nintendo 64 sales, meanwhile, are still static in Japan. This is in striking

contrast to America, where about

five-and-a-half million N64s have now

been sold, and to UK and France, where the N64 is

# Sub-teens sweep music scene

apanese pop stars are getting younger and younger. And the dance group Speed, a quartette of girls who are currently the most popular in Japan, set in new standard. They made their debut in spring 1996 with an average age of 13, and have since become in enormous success. They released their first album this July, and their first concert, on July 30th and 31st, drew tens of thousands of fans, despite the rain.

So, inevitably, others are jumping on the bandwagon. A

new, even younger group called Folder has just debuted with an average age of 11. They consist of five girls and two boys, and their lead singer is 10 years old and ■ regular on popular children's TV programme Ponkikies. And others will follow for as long as being the youngest is seen as a selling point.

Adult Japanese society seems to have no problem with this show business exploitation of child talent. However there are inevitably problems involving the innocence of ten-year-old pop stars and their fans in the cut and thrust

# profits to the

Nintendo's profits soar but not for the reasons you might expect...

very successful. So Nintendo will be centring their efforts in Japan on the Game Boy for the time being, and are waiting for the arrival of *Zelda 64* at the end of the year to revitalise the N64 market. And in March next year,

when what they're calling their '64DD and original network' plan comes into play, they'll begin their big offensive.

The sheer variety of Pocket Monsters merchandising is astounding.

# Eleven Beat tackles football from a new angle

ust about to be released here in Japan is another game based on the Japan Professional Football League (J League), J League Eleven Beat 1997. And it's most significant feature is the way it uses camera angles.

As usual, the view is always focussed on the player who's got the ball, but it rotates so the attacking side is always running upwards.

The games takes a comic-like

approach to

football,
too, and the
controls are
simpler than
in other
games, using
just the joystick
and the A and
B buttons. It's
still possible to
exercise delicate
ball control by
carefully timing
your buttonpressing, though.

As the game's name suggests, the 1997 teams and players are included. But you can also construct your own teams using what's

called the 'Executing Mode of the Original Club', with which you can decide not only the team's name, strip and emblem, but also the colour of the players' skin and hair.

# N I N T E N D O

Our Japanese reporters are continuously alert for titbits and oddities that might interest bemused Westerners.

# There's a secret monster in Pocket Monster

The legandary monator West who appears in the Carmillary in Proceed Monator. Have the Carmillary in Proceed Monator. Mew Lant be as asset by cramary play, but there is a coret bechingue, a proming a bug in the game, that'll make him appear. However, this can sometimes cause save particular and sine to be lost. Mintendo's price lines have been swan ped by surprised, being executing and by surprised, being executing and but home do are raying they can't help explaining that t

# A successor to Pocket Monster?

The game that aims to be the rest. Pocket Monsters is betthe brink of release. In Medanut, players piece together a head, arms and other body parts to create a mitot, which can then be used to play matches. And, of course, the possible in exchange parts with a play region fronds. The game's been both in with Comic Bonbon, a boy's comic magazine published by Kodansha which has started a new stary based on Medanat.

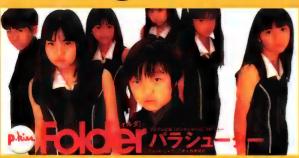

# What's going on with the N64's version of Tactics Ogre?

A few months ago, Quest revealed that they were working on an NSA tequal to the SNES game Tectors Ogn, an RFG that won popularity in 1995 thanks to its sophist about and complex scenario. PlayStation and Safurn versions here uso been legitly popular.

But the firm produce white was whose on the game is seeing to be some to you keep from the found to 50 miles for the PlaySubban 50 whose game to 025 game Non-version? It's to be become they like who onescretias Tarlies Dynamas and a mile way short of are to me.

# through the dance

Japanese bound to hear Japanese bound in they're in to Speed?"

of an adult world. How things will turn out, we'll just have to wait and see.

Hanson are currently monopolizing the No.1 slot in the American Billboard chart and so it seems the tendancy for younger pop stars is also happening accross the Pacific. Certainly the popularity of Speed blows away the Spice Girls phenomenon.

# An Englishman in Tokyo

Our Japanese correspondent's travels have this month seen him queueing at both the Tokyo Game Show and Tokyo Disneyland.

mm. The 'Tokyo Game Show '97 Autumn' (sic), then. What was it exactly? It probably wasn't fair to start the day with a quick fix of that sublime 007 game before setting out for Makuhari Messe exhibition centre. Everything else would pale in comparison. It certainly didn't help that I stood melting for two hours in the vast crowd of queuing bodies to get in. I considered mentioning to the stewards that my visa was only valid for a year, but maybe they wouldn't have appreciated it. As it was, both my press pass and my son Jack's presence would have gained me priority access, so naturally I managed not to declare either. Nice going.

Whatever it was, the show was a bit of a disappointment. So let's hope that the much-vaunted Shoshinkai event in November redresses the balance. As you know, Shoshinkai is Nintendo's own show, and James and I should be getting all dressed up and ready to go there by the time you read this. The Nintendo secret service, um, I mean Public Relations department, have told me that Yoshi's Island will definitely be on display, but then the release date is slated for November anyway.

# LEARN JAPANESE

If you're queueing up to try out games at shows, or, indeed, to try the latest ride at Disneyland, there's some essential vocabulary you'll need to be equipped with.

どのぐらい

Donogurai? = How long?

すごい

Sugoi! = Great! Cool!

一番

Ichi ban = Number 1

おもしろいくない

Omoshiroi kunai = Not interesting (remember seeing the positive form in a previous column?)

# They're all great!

've made a resolution which just couldn't wait for the New Year. After having played the delightful, the delicious, the delectable *GoldenEye* over the last week, I've decided to stop saying to myself, "This is the best game I've ever played" whenever I play a new N64 cart. In theory I could go on saying it each time. It first happened with *SM64*, then *Blast Corps*, then *J-League Perfect Striker (ISS64)* and now the Bond title. So I think I'll just say it now and leave it be: Nintendo 64 games are the best in the world. There.

# The appliance of science

ame shows attract masses of people, of course, and when masses of people turn out, you're going to get the kind of awe-inspiring diversity of life which makes up

our wonderful world. And then you get the kind of aweinspiring diversity of life which makes up
our wonderful world. And then you get the
desperate middle-aged men. So, while the lads
were smiling coyly at the scantily-clad PR beauties
fronting each stand, and lingering just a little too
long in passing, the losers had cottoned on to the
fact that, at Spike's VR Rally stand, if you
positioned yourself under the gangway and looked
up, you got, evidently, a home-video
opportunity. Sigh.

# Summer holiday

apanese workers all go on vacation at exactly the same time. In some companies it's the only time off you get, and you don't ever have the luxury of choosing when to go. You get about four weeks a year, and naturally, thanks to the spirit of free enterprise and the principle of market forces, travel agents, hotels and so on all hike the prices up to coincide with the nation trying to escape the daily grind. Count yourselves lucky next time you're thinking 6 weeks a year isn't enough. At least there's choice involved.

Where I live, Tokyo Disneyland is but a stone's throw away, so on the last national holiday, off we

went. Those of you who've been to a Disneyland will appreciate what I'm going to say next. If the park designers put half the imagination into the rides that they do into fooling the public that they won't have to queue very long, the whole experience would be far more entertaining. It's not so much the wait that's annoying, but having the wool pulled over your eyes. Most queuing systems 'snake' ingeniously, so while it may look like you're near the front, you round a corner only to see the line disappearing into a huge warehouse-like building before it comes back round to the ride.

However, the day out threw up an interesting

contrast between console gaming and its 'real-life' outdoors equivalent. Let's see: with a theme park, there's an average 50-minute wait (on a good day) for a 3-minute ride which is principally targeted at the under-10s, and you come away with a slightly empty feeling. With an N64 cart, you get an instant start-up into a game which can last hours, with content designed to appeal to a far wider range of people, and experience a depth of immersion which leaves 'Pirates of the Caribbean' looking a bit silly. And if you need some fresh air, you can open a window -- cheaper than a 800-quid ticket to Florida. What more justification do you need?

Your chance to witness an exciting duel between the N64's two new rallying games. 48

# **HOW IT WORKS**

Because N64 cartridges are so expensive, we won't award our Star Game medal until we've played the game right through to the end, no matter how hard it is. As well as making sure you'll be getting your money's worth, this means we're able to pack our reviews with useful information and hard-won secrets.

# What those catagories mean

VISUALS

The N64 can produce gob-smacking graphics that are light years ahead of other consoles. Does the game in auestion reflect this?

SOUNDS

Are the tunes any good? Or are they best turned off? How about the sound effects? Atmospheric and useful? Or a bit embarrassing?

MASTERY

With the Nintendo 64 being so 'special', how well does the game make use of the incredible hardware at its disposal? Or would it work just as well on any other console?

LIFESPAN

At £60-plus a go, you'll want to get weeks of entertainment out of every N64 game you buy. That's why we finish the best ones to make sure they don't peter out prematurely. VERDICT

The big score at the end is basically, in as scientific a fashion as possible, how much fun the game's going to give you. Look to the left to see how this works.

You'll never meet a more heroic band of game reviewers than these fellows.

#### **Jonathan Davies**

Asked to name the most heroic deed of his life, Jonathan described the time he saved his pal Spider from drowning. "He was about to go down the plug hole." Game of the month: Top Gear Rally

### **Wil Overton**

"It was my proudest moment," began Wil. "I just needed a four bamboo to make up a triplet and win. So I declared kong and... Hello? Everyone?' Game of the month: Mischief Makers

Jes Bickham "We'd run out of green peppers," said Jes, "so, well, I popped out to Sainsbury's and bought some." Jes works in Pizza Hut when he's not reviewing games. Game of the month: Blast Corps

"James hadn't won at Mario Kart for

selflessly crashed into a Fake Item.

about an hour," Paul recalled. "So, just

Jonathan keeps his past a secret, suggesting he must once have saved a bus full of schoolchildren, or something, and is too modest to talk about it. Game of the month: 'Lylat Wars'

#### **Zy Nicholson**

Boasting the world's mightiest N64 knowledge by far, Zy's a busy chap. But, heroically, his Baku Bomberman review reached us just one day late - a record! Game of the month: Goemon

34 N64 Issue 8

You are cordially invited to participate in the wizard adventures of Fox McCloud and his chums Peppy Hare, Falco Lombardi and Slippy Toad.

There will be train wrecks, environmental concerns, meetings of old friends, hideously mutated creatures, robots the size of many of our houses today, unspeakable treachery and big spaceships exploding bigly.

And broth.

At last, Fox has landed in the UK! But - hold on - what's all this?

me must sow teeth-grindingly call Starfox 64)

#### YOUL YOUL YOUL

Actually, there is a good bit due solely to the translation.
Occasionally, when you save Peppy, he remarks, "Your father helped me like that too" in an exact impersonation of Cary Grant. Heaven knows how this entertaining and characterful moment slipped through. Perhaps the Dull Police were taking lunch.

#### **PUNCHLINE**

All right, and the certificate at the end is worth seeing in its understandable form. And I did like the bit where you're told "Mission Complete" when you beat a boss, but "Mission Accomplished" if you've found all the secrets. Perhaps the adaptation isn't that bad after all. Yes it is.

#### CHEATS

You cannot cheat in Lylat Wars. Once again, you win.

# STARFOX - BUT IN ENGLISH

## Your concerns addressed

## JONATHAN NASH

Has there ever been a good US translation? Anyone? Ever? Lylat Wars is a visually-led story, with obvious goals and deducible secrets. The important thing is the 'feel,' and Lylat Wars' grippingly epic feel is embarrassingly belittled by this deeply pitiable adaptation.

The plot is risibly thin. General Pepper's mission briefings are either "Destroy the secret weapon!" or "Destroy the picture weapon!" or "Help! We're being destroyed by a secret weapon!" although nothing comes close to, and help precisely. "You're going to attack the enemy base?"

The disorders revolting it is seemingly pen feet by writes of one of the more hateable toy solling cartoon lie assert conglines from well-known science-fiction films and sixth though with exactly the kind of 'Dang!'ing and 'Heck!'is now a more expect the Starfox team to fly nude into the heart of a start than use. Lite-threatering, heroic-rescue-stirring ally in the sare brushed off, as everyone is now 'cool' and 'hard'.

The acting is killably bad. Where the leasness voiceover folk were excitable, emotional, territyingly yelly and essentially convicing, the English language actors are flat, tired and hapders ly unbothered. Gone are the musing cries of "Staaaar-FOX!", the touching wails of "Foxyyy!" and the feeing of people, well, acting instead of leading from a script. It's another medicine, flavourless, counting boring Generic American Translation that, as with super Mario, brutally minimises the thrill of discovery with ridiculously explicit class. I do not consider it a success.

# A REPRESENTATIVE OF EVERYONE ELSE EVER IN THE WHOLE WORLD

You're the type who likes widescreen subtitled movies, don't you? What on earth does the original Japanese version have to do with me? If I was at all interested, I'd have, for example, bought a machine capable of playing it. Lylat Wars' translation does its job – it makes the game accessible to me. The plot is unconcerningly identical to every other shoot-Pepper's only there to break up the fantastic animate of the plot is unconcerning to you!" may be surtly dell

The plot is unconcerningly identical to every other shoot-Pepper's only there to break up the fantastic animated institudes. "The enemy is gunning for you!" may be curtly dull, but you instantly forget that as the Great Fox swings through a space junkyard and a hit squad fires bungalow-sized rockets at it to pounding alarms. You'd prefer the General to interrupt with a lengthy speech, eh?

lengthy speech, eh?

The dialogue suffices. It tells me what I need to know — who's in trouble, where the warps are, how to kill the boss and the way to finish the level. The constant film references are clever — "I've got a BAD feeling about this" is a particular favourite — and properly the villains have all the best lines.

"I've got a BAD feeling about this" is a particular favourite – and, properly, the villains have all the best lines, including some tremendous punning by Andross. In fact, the US actors do a splendid job of impersonating the Japanese ones, the Starwolf pilots especially, and everyone sounds right for the part. Andross is rumblingly malevolent, for example, while Fox is the bloke next door (who is a fox). And I notice that, although I would never wish to, you may turn off the voices from a menu, so nyer. I judge this translation of Starfox, while not perfect, to be unintrusive and illuminating.

# WHO IS RIGHT? ONLY YOU, THE PUBLIC, CAN DECIDE

Day One. Morale high Supplies good. Idnay I met the new ramps America is when I have instantly named The Three Stooges after the popular values lians. Fake is exceedingly saint as all the time. They is seems to have hit the bottle profit hard after getting my father alled and I my to stay away from Sipply as much as possible. He is a fool. Raised siege of Comera. From the

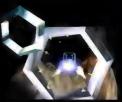

Day Two. We be ely function as a fighting unit. The thaps spend most of their time calling for help or in the case of Falco, and tring open rocks and acting as if he saved my life. Some rouble with the radio – the chaps' barrier seems decedly hard to follow. Will give per talk tonight after tea (broth again). Destroyed vary land of space free! Crossword and bod.

Gold Ring
Collect three of these and your power-bar will be extended, allowing you to take more damage. Collect three more after that for an extra life. (You'll also get an extra life for every 100 extra life for every 100 points you score.)

Silver Ring These refill your power-bar a bit if you've been damaged.

equivalent of three or so silver rings, giving you loads of

Once collected, these can be launched with the B button to do loads of damage. They explode spectacularly. Save them for bosses,

boosted through several power stages using these.

Wing Repair Get shot up a Get shot up a lot and your Arwing's wings will frazzle up

one at a time, making it harder to

< | The Landmaster our unail ockets underneath, aspean with T and E. to make it fig.

Karse jour luctet Hywards la splase sérborne opponents.

### CAT

In fact spelled Katt in the translation, though here we use the original to avoid confusion with William Katt, the popular television actor who played Perry Mason's sidekick in the newer series. Cat joins the group on Zoness. She appears, amusingly, to be an old flame of Falco's. After accompanying the group to Macbeth, Cat disappears – only to make a triumphal return at Sector Z. Cat is useful. Do not shoot Cat. That is all.

### BILL

Originally spelled Bil, though here we use the translation to avoid confusion with popular pulp character Bill, The Galactic Hero, whose name was accidentally mistranscribed upon his joining the space army. Bill runs the defence forces on Katania and clearly knows Fox, although, as usual, this isn't explained or anything. ("Bill!" gasps Fox. "Fox!" double-takes Bill. "Yes?" asks Jonathan. But nothing.) Bill is unbelievably helpful with the Sector X Warp and doesn't seem to mind you shooting down his pilots. Good chap.

# Solar Solar

Day Four. Peppy very withdrawn today Right of his broth. Face keep on once of local holsoc. His idea of local pass mably. Its harm aught his and he spent the mid of the shift in mospile, under sedation while in the least a same point of a fine in out one of notice for a laught so put across that take appropriated with show a same buy, it is in his minimulated mutant. Bed. Supply both crossword.

Avest 2 and A regulary in your and minimize density from the empting lava.

As approved, presumably to an entirely retional fool Whatke again, team-maker.

# Katina

Day Six. Diocens of a day. Stopped by johnny believed he knew me. Explained didn't knew johnny, johnny insisted not johnny but Bill. Poor chap. Probably shellshocked it could the sort. Took proswant to do before landing but distracted by having to right over base. Bought down mothers to with Webley, back in time for low. What was four access?

△ This may it a splended buttle, with dozens of enemies is should

V shoot diffs team

△ At Kabina the sky fills with billions of ships, both goodles and baddles. Casualties are inevitable.

Track: "You're not getting away that easily."

# Koness

A The seamonster, Scary fellow

Films are plundered all Differency Lylat Wars, These waterborne exploding barrels are from James Rond.

Pay Seven. Double hoping of broth. Falco back in driving seat none the worse except for being completely bald. All feathers blown right off. Shocking signt. Old girlfriend of his turned up to wish us well. He tried to make me pretend he was out while he flew underwater. Peppy on the ball once more. Sworn off girl forever now he realises he's a giant hare. Sank pirate. Read book. Bed.

### THEY'VE GONE

9 23 7

Two warps are hidden within Lylat Wars, both of which you can reach in one game.

Irrif. though you

could pride yourself on working out that (say) shooting the giant noses opened the wormhole in the original version, now, of course, Peppy'll just

say, "Shoot the giant noses to warp!" (or whatever). Still, they're awfully pretty places, with massive geometric shapes wheeling about dangerously and special wobbly graphic effects. Tragically, in the manner of *Doom* programmers having mazes in the shape of their names, some of the objects spell "64."

### THRRRRBBB

The first Rumble Pak game and still the best. Standing your plane on one wing then slamming it into the ground? Suspenseful approach of as yet unseen boss? Big spaceships exploding bigly? An application of Rumble Pak makes the whole experience more pleasant – and you get one along with the cart for your £60. You know... for kids.

# Macbeth

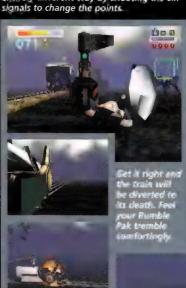

Dey Fight. Back in the bus for ground recce. Sterling air support from Peppy, who turns up, to be quite a pile, now he remembers what all the buttons do. Slippy exciting about the Ell-em again. Vuring thing. Caught Falco culting centre out of enormous lumpse to wear in porch with cut-out piece on head. Looks like fool. Threw points to tend amount of train smashing into fuel dump at righty empty and hands.

### Off the rails

It's possible to rause Macbeth to end in an entirely different way by shooting the six signals to change the points.

Keep an eye open for crates laden with power up:

In common with the majority of Nintendo's N64 releases, Starfox originally appeared on the SNES. I did not like this first Starfox at all, and playing it again as research has not changed my opinion of its frequently confusing graphics and annoyingly fussy design. However, I then went on to play Zombies Ate My Neighbours and Super Foul Egg, so the afternoon was not completely wasted

### WELL, THAT'S THE END OF THIS SUIT

If your wingblokes' shields are exhausted, they pull out of the fight for repairs aboard the Great Fox, sitting out the next level altogether. If your shields are exhausted, you crash and explode. This just goes to show something, but no one's quite sure what.

### **RETRY COURSE**

The nearest thing in Lylat Wars to a level select is replaying your favourite one as many times as you have lives with the 'Retry Course' option. Crap, then, but still the nearest thing you'll get. Sigh.

A MIGHTY FOE Incontestably your mightiest foe in Lylat Wars is the butterfly. Appearingly singly at points in the space levels, the fearsomely tough, skitterishly agile beast fires swirling cones of spiralling fireballs, which you must avoid by zooming to the eye of the storm while blasting wildly in all directions hoping to wing it on a blinkish pass. Butterflies tend to guard continue points and, in a rare moment of seeing the game palm the ace, if you kill one too easily, it will instantly reappear to ensure you work for your bonus.

# mas

Day Nine. Turn out Slippy keeps asking about the Ell-em and the Bee-em because Inbuilt 'ern. Found out fifty fathoms down. Never again.

### BATTLE MODE

Though simple and limited, Lylat Wars' four-player battle mode is fairly good fun, with much desperate twisting to shake a lock-on, tactical looping and flying directly at one another blasting all the while (or Woo-ing as it's known). Best option is definitely tank vs tank (something to aim for there, medal fans) with taking off from the apex of the pyramid positively encouraged. We did find anything but three-point matches slightly dull, but nonetheless recommend the Battle Mode to any readers who are more than one reader.

**Day Ten.** Slept in today. Woke to find Peppy, Falco and Slippy chroning and generally carrying on. Seems there was a sneak attack on the old Gee-Eff and they saw it off without me. Falco's bird was knocked out, but he made it by billowing his ponche toupee. like a parachute. Good work by the chaps. Odd reeling of listing to port for rest of day. Probably imagination brought on by broth.

Day Eleven. The big push Finally the chaps are pulling together. leading the See-Gees a many dance and then mooting them in the head from behind. It has by them, on the brass the old Gee-Eff's a battleship, so we pol at a lew En. Geo brigadess with a good old bombardment. Big celebrations in the mess. Big broth.

### MEDALS

Medals, you may r nember, are Swiming in LUGI Wars for motion level with all and a suite to high score. Medals lead new battle and the Mode. I'm afraid, readers, I find ili whole want in play in game for hin, entire my skill and refever fame than my whill to inknow a pattorn engl till. My best wishes if going he try.

### A SUGGESTION

You will a lot of time saving Falco, No are ally they do like shoot switches or provide upts, but this is in inn sy program a nowy happe in the hacigmind

in in inst say, Macbeth, than in and establish a lever, if were
by and
ling help in his courant to a be arrest totalback and any secured in and mansavely htmind you free. I will Wars 2, million

### THE SINISTER BLACK-CLAD ANTI-STARFOX

Correctly Lylat Wars introduces Sinister Black-Clad Anti- versions of Starfox and co. Darting into the story at three vital points. Starwolf, Leon, Pigma and Andrew (Andross's crap rephew) pair off against their courageous counterparts (Andrew versus Slippy,

for instance) and prove worthy opponents. Interestingly, your wingblokes can for once win their own space duels. Occasionally, Stunningly, the Sinister Black-Clads' banter is a cut above the rest of the dialogue. Truly everyone likes writing villains.

### **FOX!**

Your Arwing is a most capable space plane. Unfortunately it is also called an Arwing.

### ANALOGUE STICK

Steers your plane. Correctly, pushing down makes you go up ("Raises the nose" or something technical.) Down+LeIL Cloops-lineloop. In coglight scenes, Down Bottom C performs the direction-reversing half-loop-and-roll Immelman Turn as taught to Fox by the my turious 'Bingo' Bingham.

Fires your guns. Holding down builds a burst shot which fires on release. Continuing to hold down locks on to the nearest monster then fires the burst shot at it mescapably.

Fires an exically dangerous bomb. Can be locked on to a target first using A. If you miss with an unguided homb, B again detonates it.

### Z and R

Steers you left and right more steep y. The considerably tighter turning circle will baffle even the willest adversary. A double-Lap rolls your ship and deflects laser fire with a pleasing "spang."

Left C accelerates. Hold to rocket onwards until your heat safety cuts in. As with braking or turning, you'll have to wait until the gauge is clear before you can try again. Top C swaps between normal and cuckpit views. ar normal and high zoomed-out views in dogfights. Bottom C flips out the air brakes. Right C answers radio calls from the Great Fox. Once your position is established. Rob (oh dear) will drop a nowe -up in a shootable box, uncannily deducing what best you d need at that moment.

\*Fly like the innocent Derek Bentley

### RACE FOX!

When planes are unsuitable (for reasons never explained by the plot. Tch), Fox takes to his special tank. It's called The Landmaster, which sounds a bit like a comic villain. Or The Antmaster, A bit.

### ANALOGUE STICK

Directs your tank and aims the gun

Ens the gun. Again, you can build burst shots and lock on to mansters.

Propers a bon b and blows it up.

Dalla was to roll the tank evasively in a vastly amusing manner. Press both lugother and - good lord - you take off in a short range jump. Properly beat Macheth to see the splendid rocket-boosted backflip.

C-PAD

Similar to your planes controls. Left C accelerates, Bottom C brakes and Right C answers the radio.

### SWIM FOX!

Besting 100 points on Sector Y takes you to Aquas, a polluted water world. Your Blue Marine sub has the usual littings, except B new fres an auto-lock-on terpedo. Shift position to

change the target. Jollily, you have infinite missiles, but cannot fire another until the first has detunied

tartlement is writ large upon my face like this: startlement. After the terrible brain-horror that was the UK conversion of Wave Race. Nintendo's treatment of Starfox 64 is exemplary. (Except for calling it Ly... lat (hhhh) Wwwwwars, obviously, but I shall rise dignifiedly above that.) Yes, readers, having presumably taken lessons from Rare, whose Blast Corps was a model of conversion etiquette, Nintendo have completely eliminated the dreaded shabby black borders associated with, say, Mario Kart 64, while keeping the slowdown to a genuinely-imperceptible-unless-you'vereally-been-playing-the-original minimum. I am delighted, therefore, to applaud Nintendo like this: applaud, and offer them a glazed bun distractingly while dismissing

Starfox – but in English then. The – but in English' bit is addressed elsewhere, but let me add I will not, of course, deduct marks from the final score because I think the translation is a nasty thing. The game obviously plays exactly the same no matter what the language. And how it plays is this: tantastically excellently. It's a similar to R-Type – but in 3D and free-flying dogfight

the dogs I had prepared to chase them with.

sections, it's deverly designed so you can only see seven (to nine, if you find the warps) of the eighteen levels in one game a game incidentally, that if you reach the set lasts on awarge seventy minutes or so. Nintendo have never gone for half measures, and with Lylat Wars they're confident enough in their game-o-film to make a play last ages. (I've just worked out, in fact, that, discounting the goes used to

take pictures or check facts, I've completed the

game forty-one

times.)

I won't trouble you by powerfully annihilating the old Starfox-is-cap-because-l'm-in-an-invisible-

restricting-turinel complaint (yet) again. except to point out exactly no one brought the same complaint against the amiliary fixed-route R-Type and co. And that in controlling your path (occasionally you'll have a transparent, which flank to attack type left-right choice) Lylat Wars' designers can plug in all those wonderful effects that bring the game to life. The screen-filling sea sement of Zoness, for instance, which rises majestically in your flightpath, bless it, or the staggeringly colossal asteroids of Meteo, or the arcing flames of Solur or, indeed, the similarly memorable and beautiful set precess of the rest of the remarkably dissimilar levels, all accompanied by that amazing soundtrack and those famous never jarry spontaneouslycalculated animated interludes.

Nor will I bother you with talk of my favourite bits, the Logis his and their free 360° movement (but with boundary-defining rubber walls that, again, amony until you get used to the idea and start exploiting to steal free monster baffung turns), louds of enemy planes, almost certainly an appearance of the Sinister Black-Clad Anti-Starfox and room to think up your own tactics. (I'm inordinately pleased to see that no one else has worked out my completely effective anti-Sinister-Black-Clad-Anti-Starfox echnique, for example.) In fact, further descriptions of Lylat Wars' loveliness would probably make you reel.

Instead, I would like to point out what's wrong with the game. Big things, the fact you can't play single levels even as a special reward is churlish — to preserve the integrity of their game-o-lihi Nintendo compel me to fly listlessly through four levels when all I wanted was a quick go on the pendid Macbeth train fight. The help-me routine,

there how Sippy's Deen of no keep at all, and pught to be unclass forthwith.

[] the cut consensity
makes benter than
anything you'll fine
me co row.

which flashes a directional arrow if semeone's in trouble, appears at times to get it wrong – most obvously when you've downed the attacker, but the signal doesn't register for ages, perhaps obscuring another, proper plea. Ally auto-hits are totally unforgivable. On Solar, say, all three wingblokes exchange talk about the fierce heat of the sun and how you'd better stay at the top of the screen, all the while taking auto-hits from the lava. Twice I've had my people die on me without any possible way to avoid it, because I hadn't been careful enough with them on an entirely different level. Cheers then.

Tiny, screamingly amplified things: when you're examining alternative routes between planets, the default menu option is 'Co to planet' rather than 'Change route' You would not believe the number of times in six months of playing I've automatically pressed A twice and game-wastingly gone the wrong way. About eight, in fact. And the ease with which frantically accelerating while ducking can unexpectedly turn into looping-the-dop is punchable. And once while thanking me surlily for saving him, Falco flew out of the screen and crashed straight into me, killing me instantly, except that was 'unny.

But, readers, the conclusive thing: cylc! Wars is not quite – not quite – there. It's marvellous, yes, and fantastically excellent, but it's not marvellous and fantastically excellent. 120 days in, and it ought not be annoying me significantly as a payor of least once whenever I give it an hour of my valauble playing time. But it does. Consequently I multiessly eject four of its percentage points.

JONATHAN NASH

### () VISUALS

Diverse, spectacular, incredibly detailed, wholly convincing.

### SOUNDS

Smashing effects and score rather than music. Hours of speech! Which you can turn off.

### MASTERY

Technically astounding.
Flawless execution.
Impossible even to
consider on
another machine.

### LIFESPAN

You may wish to play for medals. I think I'll just switch the points on Macbeth again.

### VERDICT

I possibly like it less than anyone else ever in the history of all things, and I think it's fantastically excellent.

### Are you Britain's best Lylat Wars player? THE

LYLAT WARS championship

£500 N64

Fancy yourself as one of Europe's best Arwing pilots? The **Electronics Boutique** Lylat Wars Championship is your chance to prove your abilities to the world and win a whole stack of Nintendo prizes

oflowing the storming success of our Mario Kart 64 Championship, which reaches its conclusion in the next issue. 1464 Magazine has teamed up with Electronics Boutique to search for the best Lylat Wars player in Britain. Over the next couple of weeks, we want to see your best Lyter Wars scores either as photos or on video. At the end of it all, the four best players will be invited for a final showdown to be held at the swish Oxford Street Electronics Boutique store in London.

Unlike our Mario Kart contest, though Bouling Lylat Wars Championship is a one competition. Of course, you can still enter as my you want with improved scores (as king as you us coupon each time), but once the closing data rails in Had's it, we're alraid: You'll notice that you haven't got that much have, either, so after you've read the rest of this page and checked the rules overleaf. It's linus to get flying Good ucki

### The prizes

FIRST PLACE = £500 **SECOND PLACE = £200** THIRD PLACE = £100

All prizes will be in the form of Electronics Boutique any branch of EB vouchers, redeemable countrywide. If you'd like an ide of what that kind of money could buy, here are w suggestions...

or

But you don't have to spend your vouchers right away. How about this, for instance...

ashort

GO!

### TIPS FOR A

- You get bonus points for hitting more than one baddy with a single shot. To do this, hold the A button till you've got a homing attack powered up, lock onto one of the baddies in a formation (ideally the central one) and then release A.
- You'll get extra points for destroying some baddies as fast as possible - particularly the Starwolf team.
- More points are available along the harder routes through Lylat Wars.
- Sometimes you can make extra targets appear by flying through or under things - the arches and bridges on Corneria, for example.
- To get maximum points you'll need to win a gold medal on every level (see this month's poster for the score targets required for this) and activate expert mode. More baddies then appear on each level, and, of course, more baddies equals more points.

△ Blimey. Now there's something you don't see every day.

of baddies and - yes - play as well as you can.

- ∠ And you must be strong too if you're to win £500 to spend at Electronics Boutique, Yes indeed.
- Even if you can't get 1,700-plus, enter anyway. You never know.

# How to enter

### Prove it

As proof of your total hits score, we want a video or photograph of other your end of game hits summary screen or your high score table. Remember, it you mays the summary screen, the high score table can always be viewed from the game's main menu.

Taking photographs

Point your camera at the screen and click away. Some tips for better photography in the turning off or covering up the flash (it it cause a link) relies on the screen), drawing the curtains, and using a fast  $\eta = 200$  (c. the y, 400 ASA is best

Taking videos

- 1 Take the seal but connects your N64 to your TV and plug it into the 'Signal or secret on the back of your video.

  2 Connect the Signal Out plug on your video to your TV and turn
- both
- 3 Switch your TV to the video channel and switch on your N64 with a game plugged ju
- 4 Use the video's tuning mechanism to look for the N64's game signal and save the setting.
- 5 Get your best scole on Lylat Wars and get either the summary or high Score table up on screen 6 Pop a tape into the video and press record.
- 7 Stop recording and rewind your tape to where were that the recording (so we can see your score quickly and easily).

All entries have to arrive at the N64 office no later than Wednesday, 12th November. Get flying!

### So how good is good?

Eagle-eyed readers will have already spotted a Lyla! Wars/Starfox hits table in our I'm the Best section of the magazine. In give you an idea of the kind of hits total you'll need to be competitive in this championship, we've re-printed the latest 'I'm the Best' Starfox league. Remember, though, for the Championship we'll be collating a top 100 best scores, so even if you can't get close to the total hits below, there's still a good chance you'll be able to get an honourable mention in our league table.

NB The scores above will not be entered for the Championshipe unless we recieve an ufficial entry form for them.

# MULTIRACING RAMPIONSHIP

aving been available in Japan and America since earlier this summer, Multi Racing Championship has had chance to establish itself as the N64's 'serious' racing game. And it's aquitted itself well, scoring a hearty 81% in N64 issue 5 and meeting with respect wherever it's showed itself. It's always had the threat of other, imminent N64 racing games to worry about, but until Top Gear Rally none had materialised, with Seta's Rev Limit still having no firm release date and Lamborghini 64 not due for a few more weeks.

Apart from that 'first N64 racer' tag, Multi Racing trades upon its 'multi racing' aspect. Each of its three tracks branches three or four times, each time giving you the choice of an easy route or a trickier but shorter one. The short cuts tend to be snowy or muddy, making them tough if you're in one of the fast two-wheel-drive cars but a doddle if you've chosen one of the slower, particulate-belching, child-

murdering four-wheel-drive Land-Rovertype vehicles.

Three tracks might not sound terribly generous, but each one is packed with as many features as possible. One minute you'll be speeding through a town, the next plunging off the road and through a waterfall. And once you've come first on the three of them you've then got to tackle them all in mirror mode and then in a challenge mode against three superadept CPU cars before you can truly say you've completed the game.

As one would hope, *Multi Racing* uses the N64's analogue joystick to give much more control over your car than you'd get with an ordinary joypad. Gentle nudges on the stick turn your wheels just a smigeon, while desperate yanks will put you into dramatic powerslides. And each vehicle handles slightly differently: two-wheel-drive cars slide about all over the place, and are best kept to the road, while the evil four-wheel-drive ones will cling doggedly to just about anything.

This autumn the Nintendo 64 goes from having no rally games to having two. So which drives away with the honours? A head-to-head test is in order.

# **Top Gear Rally** KEMCO

here's generally one game in the N64 office each month that causes tempers to fray. Tea is spilt. Chairs are knocked over. Controllers are dashed against the floor. Extremes of vocabluary are explored. Timid animals look startled and scamper for cover. Passing old ladies mentally pen letters to the local newspaper. In the past it's been games like Blast Corps and Pilotwings 64 that've got our backs up with their fearsome trickiness. This month it's Top Gear Rally.

Top Gear Rally is pretty much as stateof-the-art as it gets, rivalling most coin-ops with its smooth, high-speed 3D graphics. It uses the N64's analogue joystick to allow you to steer your car precisely, it's got four tracks (plus an extra hidden one), its got varying weather, and it's got nine cars of differing speed and ability.

Top Gear Rally is also rather cleverly organised. Instead of having you race on each of the four tracks and then that's it, it instead gives you a series of 'seasons' to

race. The first has just two races, on the Coastline and Jungle tracks. The second has the Coastline and Jungle tracks again, but this time with harsher weather, and introduces the Desert track. The third has four races, introducing the trickily twisting Mountain track. The fourth, Winter, has the same four tracks again but with lots of snow. Then, after two extra seasons, Professional and Expert, with even more horrific weather still, secret things begin to happen. And! As you progress from season to season faster cars are made available all in all ensuring that the game has a clear difficulty curve.

And other features? There's an 'arcade' mode, where you race against the clock. There's a two-player split-screen mode. There's a time attack mode with savable ghosts. Cars are customisable before each race and, uniquely, there's a 'paint shop' where you can wreak havoc upon the cars' appearances. Tim inevitably had lots of rude-word-related fun with that.

But is it any good? Read on!

### **NEW CARS!**

Beat Multi Racing's standard mode, mirror mode and challenge mode and those two other garages on the car selection screen will open up to reveal two new, super-fast cars. You can't complain about that.

### **FAST START!**

As in most racing games (apart, it would appear, from Top Gear Rally), Multi Racing Championship gives you the chance to get off to a speedy start if you press the accelerator at the right time before the final light comes on. You want to do it about half-way between the second and third lights. Let the revs get too high, though, and you'll wheelspin embarrassingly.

### CROWD PLEASER

Piling on the pressure. Imagineer have arranged for groups of spectators to stand beside the road, chuckling at your mistakes. You can't plough into them.

### CAN YOU ...?

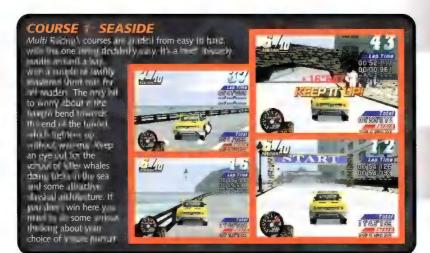

Yes! Reassuringly, both games allow you to drive round the track the wrong way. Top Gear's probably the best at it, with Multi Racing tending to try to spin you round the right way again whenever you touch the wall.

### **3-COURSE SNACK**

Multi Racing has three courses to race around, all packed with stuff.

### STYLING

Perhaps Imagineer's Nintendo Programming Manual has some pages stuck together, or perhaps they're just trying to be 'different', but Multi Racing Championship doesn't look like any other N64 game we've seen so far. Our greyskinned buddy's special graphical features - anti-aliasing, Gouraud shading and the rest of it - appear to have been forgotten, giving Multi Racing a blocky, angular, shimmery look that would better suit a Saturn or PlayStation game. And the colours could hardly be called subtle.

What Imagineer have done, though, is packed each of the game's three courses with as much detail as they could feasibly fit in. There're spectators standing by the finish line, medieval towns and animated waterfalls, along with the odd surprise like a deer running across the track, or some dolphins swimming past, or a plane flying over. But the graphics are rarely more than functional. There's no sense of "Cor, look at that", or "How on Earth have they done that?"

Top Gear Rally is different in every way. It's an N64 game through and through, effortlessly smooth and magically 'real' in the same way as Pilotwings 64 and Wave Race. The roads and their surroundings are gracefully contoured rather than flat and polygonal, with sweeping bends and rolling hills. And it moves as fluidly as real life, only going slightly choppy when there're more than two cars on-screen.

TGR hasn't the attention to detail of Multi Racing, however. It's mainly just roads, embankments and the odd house, giving the game a bit of an 'empty' look and leading to cries of "Boring!" from the Overton camp. But N64 effects are used to the full, giving smashing reflections on car windows and puddles of water (which your tyres part as you drive through them) along with some incredibly convincing weather effects. Snowstorms are genuinely scary, for example, and have you following the tyre-marks on the road for clues as to which way the next bend goes. And there are some 'nice touches' like a plane overflying the track on the final lap of the Coastline course and hot air balloons over the desert. The cars themselves are superbly detailed, too, with smooth, shinmy body panels that get dented if you crash a lot.

### HANDLING

The way Top Gear Rally's cars respond to the track and your joystick waggles is brilliant - better, possibly, than even the best coinop racers. Each wheel has a mind of its own, and jiggles up and down as it goes over bumps. Crest a hill too fast and the whole car will take off, the wheels dangling down until you land again with a 'crump', the car then bouncing up and down for a while as the suspension settles down.

In Kemco's game you've really got to drive around every bend, slewing your car's tail round to point you in the right direction and then blasting past the apex and out the other side. The only let-down is that, if there's a crash-barrier on the outside of a bend, the quickest way to take the corner is to drive at full speed, slide into the barrier and let it push you around. That way you hardly slow down at all, which doesn't seem right.

So authentic are Top Gear's physics that you can drive off the road altogether if you like and gallivant across the scenery, the car still responding accurately as you scramble up embankments and speed across lumpy rocks.

And the crashes! Your car responds just like a real one to mistreatment. Slide off the road and hit a ramped bit of rock with one side of your car and you'll be flipped up onto two wheels and over, like that bit in Diamonds Are Forever gone wrong. Clip an obstacle with the car's tail as you're slewing around a bend and you'll pirouette into the hedge. Come a cropper at night and, as your car flies through the air, its headlights will shine wildly over the scenery.

Try gracefully to clip the apex of a bend in Multi Racing, however, and, because the corners are all made up from large, flatsided ploygons, you'll just crash into a sticking-out triangular point and grind to a halt. So winning races is more a case of trying to stay in the middle of the road, taking your finger off the accelerator on tight corners so you don't understeer into the outside wall. Not nearly so much fun. The tracks aren't bumpy, either, so your wheels are generally planted firmly on the ground.

Both games turn overtaking into an entertainingly tricky business. The roads might appear wide, but when there's a CPU car in front and you're approaching one of the tougher bends they suddenly narrow terrifyingly.

### 4-COURSE FEAST

You get four courses with Top Gear Rally. (And a secret one too!)

COURSE 1: COASTLINE
The Coast require which serve usual the catrice of an included which the belief to up the line of the sum extract, additionally windfills and a underestion during the real of the line windfills and a underestion during the real of the line windfills and a underestion during the line windfills and the line windfills and under the line windfills.

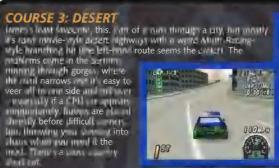

### COURSE 2: JUNGLE

doddle, Illi its crurse has the entral section of the entral vars coming in from the all

ing the way of a the , ili ser

### COURSE 4: MOUNTAIN

The most | It at It is course of It | and in | the It is thanks to its | that never It | It is about In pro- the fire come pro-dimens, that make the compa-If all the seems in ensure the seems in ensure the seems in ensure the seems in ensure the seems in the seems in ensure the se fork

### SECRETS!

Complete all six of Top Gear Rally's seasons and you'll have competed in 21 races. But the fun doesn't stop there. First of all, a secret vehicle becomes available: the milk float. Its stats don't look too promising on the vehicle select screen, but get it out on the track and you'll find it's blisteringly fast. Furthermore, you'll also find that the whole championship is now taking place in mirror mode. Some tracks you'll already know backwards, but mirrored Coastline and Mountain will be a new experience. Get through all that and there's another vehicle to be had - the helmet car. And then another - a sort of bubble. And! During the credits sequence you'll also have been given a tantalising glimpse of a fifth, hidden track set in some sort of postapocalyptic wasteland. It looks superb, with all sorts of obstacles to dodge. How do you access it? We have our people working on that right now.

### HAAAA...

Although the vehicles in Top Gear Rally are ostensibly 'made up', car buffs will notice uncanny resemblences with models from reallife manufacturers. 'PS', for example, could easily be confused with a Porsche 959, 'LD' and the Lancia Delta are surely related. And 'SP' is the spitting image of a Toyota Supra. Similarly, 'M3', 'IP' 'CE', 'ES', 'N5' and 'RS' all have twins in the real world.

### **MULTI RACING**

### VISUALS

Plenty of detail, and admirably fast, but it all looks a bit crude.

### SOUNDS

The co-driver's speech is m nice touch, if rather repetitive

### MASTERY

The N64's Controller is used to the full, but graphically there's nothing special here

### LIFESPAN

A matter of hours rather than days, with only the two-player and ghost modes lasting at all.

### ERDICT

A nippy, accessible and generally enjoyable road all too soon

### **UK CONVERSIONS**

We'd only seen the US version of Top Gear Rally at the time of going to press, but Boss Game Studios (who've programmed the game for Kemco) promise the UK PAL version will fill the whole screen and won't be noticably slower than the NTSC one. Indeed, they say it actually "gives a better impression of speed". Good

### TOP GEAR FOR TWO

If you fancy taking on someone else at Top Gear Rally you'll want to select the arcade mode and go for two helmets.

### MULTI-PLAYER MULTI RACING

While Top Gear Rally's two-player mode takes a while to get in to, you'll be able to jump straight in to Multi Racing's. And it's splendidly competitive.

As in Top Gear there are no other cars on the track, it's if you and the pul

hayer to along 🗅

### OWNERSHIP

The trouble with Multi Racing Championship is that it's all over too quickly. You've got to come first on each of the three courses (Top Gear Rally lets you get away with seconds and thirds as long as you get the required number of points overall), but that'll take you maybe two or three attempts per track and then the credits roll and you're into mirror mode. The idea of different vehicles and should-I-take-theshort-cuts-or-stick-to-the-easier-butlonger-route? decisions goes out of the window - just pick a fourwheel-drive truck that's good at offroading, like the one with Ocean logos on it, take all the short cuts and you'll invariably win.

Meanwhile, there are several stages of Top Gear Rallying. First of all it seems incredibly slow and boring, because you're restricted to the weediest cars for the first, tworace season. Persevere, however, and you'll reach the stages with faster cars, which is when Top Gear Rally really becomes fun. And then, later on, when you're in the fastest cars and the weather's turned nasty, Top Gear Rally gets difficult almost to the point of being frustrating. On the Professional season, for example, when you're on the slippery Jungle track, mirrored of course, and it's snowing, it's virtually impossible to keep the car on the road unless you concentrate utterly. And, whereas in Multi Racing if you crash you just slow down a bit, in Top Gear you have to wrestle to get the car back under control, possibly having to perform a three-point turn to face the right way again. CPU cars are also troubling, with the slightest brush with one tending to send you veering into the roadside while it carries on unflinchingly. Much quitting and restarting tends to result, along with - here in the N64 Magazine office at least considerable creative profanity.

So Top Gear Rally's multiseason approach, upping the difficulty as you progress, easily trumps Multi Racing's three-racesand-that's-it structure. Elsewhere, both games include a split-screen two-player mode, although, bizarrely, Top Gear's won't let you use the better cars and tracks until you've reached them in the championship. And, as well as a really good two-player mode, Multi Racing has the advantage of coinop-style checkpoints, which means you're racing against the clock as well as the other cars. Top Gear does this too, but only in a separate

arcade mode.

Jonathan opts here for a sinister black car.

### VERDICT

rcade-style N64 racing games have a tricky brief to meet. Coin-ops are designed to be played for a few minutes at a time, and therefore generally just have one or two tracks and simple options. But that's no good for a £60 console game, which needs to last for months. So Multi Racing and Top Gear's designers were faced with the task of packing their carts with the same level of realism and detail as coin-ops like Sega Rally and Ridge Racer, while at the same time trying to make them challenging in the long term.

On paper, *Multi Racing* looks like the more enticing proposition, with its novel short cuts and feature-packed tracks. It's the more accessible of the two games, too – it's easy to master the controls and you'll be winning races in no time. But it's *Top Gear Rally* that'll keep you occupied for longer. It might only have one more track than *Multi Racing* (secret one not withstanding), but by cunningly reusing the four of them with different cars, different weather and mirroring, it gives the impression of having hundreds.

Top Gear's the more N64-worthy game, too. It's got the uncanny fluidity of the the best N64 games, and its belief-defyingly realistic handling is hard to imagine on any other console, even if the physics can break down at the most irritating moments. Multi Racing, meanwhile, isn't that far removed from something like Screamer 2 on the PC.

And Top Gear Rally's more involving, too. Multi Racing's fun, but speeding along its roads could never be called exciting. With Top Gear you're clinging to the road by the seat of your racing overalls, making every twitch of the joystick count. Although we may have called it every rude name our misguided upbringings have equipped us with, it's at least provoked some sort of positive emotional response.

But the crux of it is that we finished *Multi* Racing Championship on the first day we got it – it really is far too short and easy – and haven't really returned to it since. (That's why, in an unprecedented move for N64 Magazine, I've shaved a few percentage points off Multi Racing's original score – Top Gear Rally has put it into perspective somewhat.) Meanwhile, we've been playing Top Gear Rally on and off for a fortnight now and still haven't reached the hidden bonus track. And we're resolved to do it, even though, to be honest, we're now being driven on more by gritty determination than enjoyment.

While neither game's quite the non-stop-fun racer the N64's begging for – the N64 is still to find its Wipeout or Ridge Racer – they're both jolly good, and either would be an asset to any N64 cart storage system. And if we had to choose, of the two it's definitely Top Gear Rally we'd rather be handed the keys to.

JONATHAN DAVIES

From this page on, every game reviewed in N64 is only available on Japanese and US import. We'll do more in future issues on any that're released in the UK.

### **MULTIPLAYER MODE**

Bombermans of old had their strengths in their multiplayer modes. How does Baku Bomberman cope with three dimensions to work with?

### ARENA 1

### The Rock Garden

Simple fare, as the rocks quickly vanish to leave an open plain for some unsophisticated scrapping. Use the slide to outgun anyone trying to throw a bomb at you.

### ARENA 2

### The Ocean Rig

Staircases connect the platforms over the ocean, and one wrong foot is enough to send you to Davy Jones' Locker. Which often happens when you can't see where you're going.

### The Ziggurat

Grab the extra bombs and then return to higher ground. From the high altar, your bombs will rain down on attacking infidels.

No, we can't under and it either but there's a definite air of munate Yoiks!

### We've been looking forward to it for months and, well... Oh dear.

### Baku Bomberman HUDSON ¥6980 (Approx £35)

### ARENA 4

### The Great Hall

Yes, yes, so you can run about in the rafters, great, but look at that - we're all still alive, but because it's in 3D we can't see anyone else. Or most of the hall floor. What the ...?

### The Long Grass

The twist here is that you can hardly see any of the bombs or power-ups because of the thick vegetation. A criminal absence of imagination.

### ARENA 6

### The Power-up Pit

All the power-up blocks are in that pit in the centre, so sensible players steer clear and diagonal-slide the fools who ventured

### HAMLET IT AIN'T

Welcome to Planet Bomberman. Yes, you thought they were just ■ bunch of inch-high anarchists kicked out of Legoland for subversive and incendiary behaviour (that kind of thing never goes down well in Denmark). But it seems that the little bomberfolk actually come from ■ quiet, peaceful world - much like Denmark, in fact that's been invaded by - Strewth, these game plots don't get any better. Er, ok, forget this nonsense.

### **ORY MODE**

Like the battle match, this is a reworking of old characters and ideas from earlier instalments in the 16-bit Super Bomberman series. Levels are divided into five themed worlds, each one dominated by ■ sinister evil bomber who must be defeated. As you progress, your reward for solving the platform puzzles is to acquire new abilities that will open up other sections – the familiar non-linear structure allowing you to zip back and forth between solved areas.

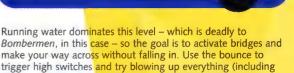

### Green Gardens

Plenty of easy puzzles to start you off, including a few hidden keys that simply require the use of different camera views to find them. To find the last green switch tile, slide your bombs under the caged enclosure to destroy its supporting columns, then enter from the roof.

Best bit: Floating down the stream on the express route back to the first area.

### **Blue Resort**

Best bit: The little soldiers with guns, on patrol.

the trees). Shame about the pop-up on those fishies, though.

### ROBOTIC PLASTIC FANTASTIC

Even if the game's not all it ought to be, the world of Bomberman is still a beguiling place. All the rage at the moment in Japan - Super B-Daman men, little bombermen who fire marbles from their tummies. We've had several populating the N64 office this month, including one that sits inside a clip-together robotic exoskeleton that transforms into unicorn, and one who's been seemingly assimilated into a giant marble-firing machine. If you fancy buying a Super B-Daman or two of your own, give Project ■ a call on 0181 508 1328.

m... the dog ate it... Then I left it on a bus, er, tube train... And before you know it, this gang of - ooh, there were twenty of them - no, forty, I tell ■ lie... Look! It's the Goodyear Blimp!"

Right now, somewhere in Japan, I hope that somebody is explaining to Hudson Soft's board of executives just how they misplaced a tiny jewel of classic gameplay that had been entrusted to the company's 64-bit development team.

If we may make so bold, N64 Magazine speaks for the overwhelming majority of players when we say that the solo puzzle mode never actually interested anybody, ever, and it was only the multiplayer battle match that earned Bomberman its reputation as an exemplary video game. With a full roster of four human players, that simple concept smithereen or be smithereened - provided the ideal vehicle for exacting revenge and establishing superiority over the mob.

### White Ice

It's that old favourite – or not – the slippy slidey ice world. There's even a really annoying blizzard that obscures your view, so that you keep falling into precipices. Search those cabins for the switch to the chair lift and ride on up to the glass plateau, where an under-the-ice view reverses your controls...

**Best bit:** Setting off a bomb in the wrong place and having an entire avalanche chase you down the mountain.

Indeed, we recall that many a hectic day

on Super Play was soothed away with a

SNES multi-tap and reasoned arguments

Anybody with similar fond recollections

### **Red Mountain**

Most of the rock formations here are destructible. Just keep blasting away for all the power-ups you care to collect, but watch for the indestructible ones – these are really flame-spitting enemies. You can fall off the edges here, though – normally when one of those volcanic eruptions has you running about dodging the earth's exhalations. Watch for shadows to tell of imminent impact.

**Best bit:** Seeing little enemy chaps frazzled at random by the volcano's own rain of magma..

### PLASTIQUE TECHNIQUE NO. 1

One of the cheaper tricks at your disposal in battle mode is the diagonal slide kick. For strange reason, bombs don't stick or stop dead when they encounter a surface obliquely: they'll just slide along it, snaking their way through block after block in a completely unpredictable fashion. Enough to catch out your human opposition, at least.

### PLASTIQUE TECHNIQUE NO. 2

Thank heavens the manual detonators are still in place, allowing you to practice at least something approaching a classic tactic. Simply lay your bomb, slide it with I kick and detonate it with the Z trigger as soon as the blast range encompasses your enemies. And there ain't a thing they can do about it!

This year, the gimmick is (drum roll) It's all in 3D!

### Bucket

And after that little flourish, Hudson's wellspring of ideas returns empty buckets. With something so quintessentially 2D as a grid-based overhead maze battle, wouldn't, you have thought that upgrading Bomberman to include a whole new dimension would require complete reinterpretation, perhaps an entirely radical concept or playing twist? If it was going to be any good, that is...

What you actually get is a half-hearted version of the original, based on the same old mechanics but heavily compromised to suit a 3D view. Matches degenerate into circuitous dashes where blindly luzzing your artillery into the middle and running away is just as likely to succeed. Let's take a look at some of those points in detail:

### The arenas are too small

The side walls converge towards the

vanishing point, naturally. Sometimes the bombermen themselves look too tiny to notice, or vanish behind staircases where you just can't see what's going on. We're still hoping for more options and secret levels to open up, because the selection is shockingly limited.

### ■ Freedom of movement is given too much consideration

Using the analogue stick lets you roam in any direction, so they've removed any busy kind of maze layout to leave wide open spaces. Trapping somebody in a culde-sac with a bomb is thus a rarity. Also, bombs now explode in a 'hemisphere', rather than a vertical/horizontal cross, so that judging the blast radius with any degree of accuracy is impossible. No more beautiful instances of precision play as you stand just close enough to escape with singed eyebrows.

### ■ You're stunned by collisions

Get hit by an enemy or sliding bomb and you're dizzied, unable to react (for far, far

GO! (5

### COMPLETELY BOMBED

So you've developed an entire Mario 64-style set of game worlds and filled it with platforms, precipices, bridges and waterfalls. One small problem: Bombermen aren't renowned for their athletic abilities. In fact, they can't do much more than run around dropping explosive charges. Could this be a new set of tricks we're about to learn? Hmm, could be...

### The Bounce

Bombermen can't jump, but they can bounce off bombs if they fall onto them. So when you need to cross a gap in the path, simply pop a bomb down the hole and use it as a stepping stone before it goes off. Remember that, with manual detonators, your bombs can be left in place so that you can cross destructible blocks too.

### The Tower

A bomb will only come to rest if it finds its own space. Drop one on a monster or another bomb and it will bounce onward unless stopped by a wall. Throw another bomb on top of this and it makes it way to the top of the pile, bouncing away until detonated or release. With enough bombs collected, you can build your tower to reach high treasure crates or to initiate an enormously tall explosion.

The explosive force of your bombs isn't solely destructive. You can operate doors and switches with this, as before, but it's also used to clever effect. For example: simply slide a bomb under this hole, run up the stairs, stand on the platform and, if you're fast enough, you'll take the express elevator to the second floor.

Press A+B simultaneously to ready a grenade, then pump away at the A button repeatedly to inflate it. When it glows briefly, you can throw it like a normal bomb - but don't try to slide it. The explosion is of equally exaggerated proportions, reaching blocks previously out of reach.

too long). In other words, those definitive Bomberman moments where you'd play chicken with a ticking bomb - punching or sliding it back at the perpetrator and hoping they wouldn't have enough fuse left for its return - just don't get a look in any more.

Power-ups are irrelevant

The analogue stick determines your speed, so collecting speed-ups is out. Everybody starts with a slide kick (press A again) and a throw (press A+B) so the opening technique of efficiently razing blocks, harvesting the maximum number of icons in the shortest time and making killer combinations before the others have even powered up has been eliminated. Nor can you blow up free icons to hinder others. It pains me to describe this, but practically all of the strategy and quickwittedness has been eradicated.

Winning can be random

It had been an exhausting and disappointing evening when we first put Baku B-Man through its multi-player paces, but we played on in the hope of

finding some positive and upbeat innovation we could highlight. So picture our expressions when, following the 'Hurry Up!" warning that we were running out of time, the match was brought to an abrupt end by a deadly shower of flaming meteorites that fell in random locations and arbitrarily decided the victor of the bout. To borrow a phrase:

Hudson, you have messed up.

### OH, JUST ME THEN

Which leaves us with one-player mode, seemingly the focus of this entire release. When it isn't being tedious, this mode just about works. There's not much to it, admittedly, and it suffers from all sorts of minor annoyances - such as having to work blind when the environment obscures your view; enemies who regenerate out of sight, in places you thought you'd cleared; exploration puzzles that hide things from the usual

perspectives. And for such a small, simple 3D environment, the regular pop-up is quite inexcusable.

Protracted it is not, however. Most of the puzzles are pretty easy once you've got to grips with the tricks and devices involved, and it's only the necessary slogging and footwork accompanying each one that gives this mode any sense of long-term challenge. If you don't get stuck then you'll finish it in about a week, maybe even a dedicated weekend. Nothing we'd wholeheartedly

So don't be taken in. Although it looks like Bomberman and feels like Bomberman, it doesn't take long to realise that so much of what rightfully earned Bomberman's colossal status is foolishly missing. This is - sigh - the kind of 64-bit sequel we could do without.

recommend, therefore.

Oh, and if you're travelling on the Tokyo underground this weekend, could you check under your seat? It's got to be somewhere.

ZY NICHOLSON

MAR AT T'N'T

The puzzles might take longer to suss without a readable manual, but bombs have played . major role in the history of cultural exchange.

### VISUALS

Competent, but not exactly ground-breaking. Some pleasing effects.

### SOUNDS

Sounds just like the dear old SNES games, frankly, and very jolly for all that.

The familiar 2D notions are ruined or lost in 3D rather than enhanced by it. Sorry.

Without a decent battle mode, Bomberman must rely on a small, shaky 3D puzzle platformer. A short fuse indeed.

### ERDICT

Briefly diverting, but a genuine disappointment for Bomberman's most devoted fans. They've really lost the thread this time.

J-League Dynamite Soccer **IMAGINEER** 

REPLAY

Dynamite? Hardly. Still, it's better than FIFA...

### TEAM 17

Let's be honest, who the helf are Purple Sanga anyway? Or Antlers? Here's a quick guide to each team's How Good factor using Premiership teams..

Avispa: Un extend Sanfrecce: Difficult to Grampus Eight: Acra Verdy: Wid-tark Jef United: User Reyson stragg ers. Red Diamonds: n -Anthers: Com-Fugers, Increse main Marinos: Unincom, S-Pulse: Director Jubilo: Tep-Fine Purple Sanga: Cerorer Submission

Gamba: Districted

nyone who can cast their mind back to the heady days of Super Soccer on the SNES will remember that, for a couple of months, it was really quite enjoyable. And then ISS came along. Sadly for Imagineer's game, ISS got there first on the N64, meaning Dynamite Soccer has all the impact of a 0-0 draw. In the Dr Marten's Premier Division.

If there are redeeming features in this second J-League outing then they do a successful job of hiding themselves. The visuals plainly stink. They're hardly an improvement on Super Soccer itself (and that's five years old), with the sprites - yes, sprites - only able to move in eight directions. Add to that their animation, or rather lack of it, and the ball, which is patently far too big, and you've got a complete and utter mess of a game before vou've even begun.

The emphasis of Super Soccer is, presumably, on the less serious side of football. Or maybe the thinking is that you don't have to have the sheen of motion capture and technical excellence to have a solid, playable game. Which you don't. But a combination of under-responsive controls and a lack of actual football mechanics ensure this leaves you dissatisfied and, ultimately, winding your way back to ISS64.

Where's the magical through ball? Where are the player-reaching passes? Where's the variation in goal scoring? Where, indeed, are the simple little touches - backheels and flicks and stuff - that made Konami's title so phenomenally good and so easy for football followers to relate to? Sadly missing, that's where. This is the game stripped down to its basics. And the transition from the Premier League of 15564 to the non-league, up-and-under of Dynamite Soccer isn't a particularly smooth or enjoyable one.

So, how's it managed to sneak into the mid-60's, then? Well, persevere with it (and, strewth, does it take some

perseverance) and you'll discover that, for all its stinking great, size 15 faults, there's something strangely enjoyable about it. However, you definitely have to familiarise yourself with the way it plays first. The buttons are pass, long pass, shoot and dribble. Hardly mind-taxing but, nonetheless, they all prove surprisingly ticklish once you're playing.

Passing the ball, see, doesn't necessarily mean you'll find a team mate. Consequently you have to work harder ingame, using the pitch map and scouting around for forward running players. In order to aid your quest, there's the dribble facility which is actually - shock! - quite clever. It's a far cry from ISS64's closecontrol variation, instead opting for knocking the ball in front of you and

As if to rubber stamp its place as ISS64's poorer brother, Dynamite Soccer bypasses the World Teams option in favour of a Japanese Select which takes the form of Japan East and Japan West. It's hardly Arsenal-Tottenham (more like Exeter-Torquay), but closely fought contests with a liberal handful of controversy are always guaranteed. The crowd don't get any more excited, though.

running onto it. This allows you to gracefully and firmly out pace defenders as you peg it towards goal in pleasing Ryan Giggs fashion.

Also, as a general rule, if you tap the pass button, you or one of your team mates will always be quickest to the ball (unless you've completely mucked it up), meaning you'll very rarely lose possession in frustrating positions. It's a warm feeling

watching your midfield danger man slide-rule a ball between two defenders, setting up your striker for a winning goal. Mmm.

So, a mix of the really good and really very bad, then? Yep, 'fraid so. Of course, the fact that you can score from the same position every time doesn't help. But at

least you feel like you're in control of proceedings, whereas in FIFA 64 you may as well have been trying to control a recently beheaded chicken.

It'll probably sell nicely in Japan, what with it having a J-League licence and all, but with it unlikely to see a UK release, only genuine footballing N64 fanatics need bother apply...

TIM WEAVER

### Route one

2-1 dawn? Only minutes left? About to crash out of the cup in dramatic style? Worry not Here's how that sure-fire lastminute goal works...

Wander on down the wing using war dribble button (that's the / higher by default) to shoot past those pacey full-backs. Now, cut into the area at a diagonal to the goal, keeping the ball safely at your feet, draw back and shoot. As long as you're between the penalty spot and the corner of the six yard box, you'll be whistling sweet dixio all the way back to Kyoto Like Grampus Eight's No. 11 here in fact, who, it has to be said, when have ever such nice bair:

### OFF ON OWN

Now here's a treat: feature that Konami didn't even consider. When one of your men is left lagging offside and the neverseen ref blows up, the CPU explains who exactly the culprit was and where the backline were in relation to him. You'll then be left in no doubt as to the wisdom of the official and his linesman. Good idea, that.

Hard. Still, you're not likely to buy it, are you? Are you? Or are you? No. But, are you?

### VISUAL

Yeah, really good. The SNES could handle this.

### SOUNDS

The crowd sounds about as excited as Kenny Dalglish. And the FX are truly abysmal.

### MASTERY

Well, it's not quite ISS64, is it? Perfunctory

### LIFESPAN

Once you get into it, it's actually not bad at all. You have to stick with it, mind.

### /ERDICT

Appearances can be deceptive. To start with this is about as much fun as a pulled hamstring. But after a while you'll plod through it and maybe even enjoy it. A bit.

# SOCCER =

Tricky unless you've already sounded out Perfect Striker.

The extra celebratory stuff makes little difference. This is still outstanding to look at.

SOUNDS

Iffy music but a proper Japanese commentator (Tom G, apparently) now takes the reigns.

MASTERY

Simply unrivalled. Virtua Striker in the arcades is only half as good.

LIFESPAN

Questionable tactically but the games themselves get more enjoyable every time you play.

ERDICT

Slightly inferior to PAL ISS64 but still a breathtaking football gam

15564 version two. Or should that be three?

Il change, then, in the world of ISS64. Or so you'd think. We'll admit, we don't know quite what 'Jikkyou' means either (presumably 'new' or something) but, look at the title, and you'd wager by the very fact that it sounds nothing like J-League Perfect Striker, or even ISS64, that there are major changes afoot.

But you'd be wrong. What, in fact, Jikkyou World Soccer 3 is, is a Japanese version of the ISS64 we Europeans received several months back. With a few cosmetic differences.

Firstly, the teams have chopped and changed a bit. Out goes Poland, Belgium, Austria, Greece and – shock! – Wales, Scotland, the Republic of Ireland and Northern Ireland, and in comes Middle Eastern powerhouses Saudi Arabia, the UAE and Iran, token whipping boys Canada, El Tel's Aussies, the newly reformed Yugoslavia and South Americans, Paraguay and Bolivia. Hmm.

Secondly, the plinky-plonk of Konami's

the awful "ooooh" of several baby-voiced Japanese songstresses. Fine to start with but after a while it starts sounding like an Eternal concert. And, however much you turn the sound down on the television, somewhere, in the background, you can still hear their voices, humming along, ALL THE TIME

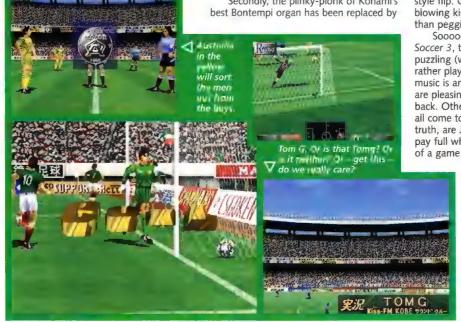

And thirdly, there are a couple of extra animations in there. Nothing special but, when you score, your player can now run off to the crowd and dive forward, arms outstretched. Or perform an Asprillastyle flip. Or skip towards the crowd blowing kisses to all and sundry, rather than pegging it there first.

Soooooo, that's Jikkyou World Soccer 3, then. The changes in teams is puzzling (who, in their right mind, would rather play as Iran than Scotland?), the music is annoying, the extra celebrations are pleasing and the dreaded slowdown is back. Other than that, it's the ISS64 we've all come to know and rightly love. But, in truth, are Japanese N64 owners likely to pay full whack for an international version of a game they already own? Of course

not, and neither should any of our NTSC-owning readers.

Those in possession of the oft-criticised PAL machine, though, can be safe in the knowledge that, whatever changes have occurred in Jikkyou, it still doesn't come up to the speedy, non-slowed, Englishfilled European version. And, at the end of the day, that's what counts, Brian.

TIM WEAVER

MISCHIEF MAKERS

Now we know what's going on, are we about to be disappointed?

nd thus, one of the most unfathomable, obfuscating and downright weird games of recent memory is demystified. And, for the most part, the American version of Go Go!! (or Yuke Yuke!!) Troublemakers loses nothing in the translation.

Perhaps inevitably (and

unsurprisingly), much of the the myriad text employed is akin to Super Mario 64's helpful hints, offering blindingly obvious game control tips, as well as less insulting level-specific mission objectives. Witness 'Meet Calina', wherein Marina's evil twin wreaks havoc in the name of our heroine. The shellshocked villagers, believing you've returned to torture them anew, proffer advice wrapped in exclamations such as "Coming again to show off your Slider Jump? We can also slide by holding down on the D-Pad and pressing A!"

Well, quite. (Actually, the same kind of thing goes on this office: "Ah, Paul! Come again to show off your Pot Noodle? We can also eat, but we prefer fresh, nourishing food!")

But the banality of this sagacity, when juxtaposed with the outright bonkersness of the game in general, serves only to heighten the lighthearted surrealism that abounds (*Eh?* – Ed), which, in our book, is a Very Good Thing. As Zy pointed out in last month's *Goemon* review, it's really quite refreshing to encounter something bizarrely eccentric once in a while. Just

don't play it too much in one sitting – it'll probably do something funny to your head. In much the same way as the American Starfox 64 pleasantly surprised us in comparison to its inscrutable Japanese sibling, Mischief Makers allowed us to breathe a sigh of relief – knowing what's going on doesn't dampen the enthusiasm and brightness offered here. Indeed, it leaves you free to get on with the simple business of Playing The Game.

As for everything else, it remains the same as before: the deceptively 'old school' mechanics hide a really quite subtle and amusing game system (absolute control of which is essential for success) and the general inventiveness and barmy flair charms as ever. Yes, it's 2D (with 3D bits), but it's a hell of a lot of fun, there's a lot to do for your money, and you'll forever be refining your shaking/throwing/jumping techniques. Total madness.

Oh, and by the way, 'Chappy' is really called 'Teran', and apparently the "Blood of the Blockman runs through my body". Which, y'know, is nice.

JES BICKHAM

### VISUALS

2D yes, but populated by lovable characters and almost excessively imaginative settings.

### SOUNDS

The music and sound effects are as odd as everything else, and jolly good with it.

### MASTERY

The N64 proves to be as whizzy at 2D graphics as it is at 3D.

### 9 LIFESPAN

In English it's certainly easier, but it's still brimming with lifeextending time trials and other asides.

### VERDICT

In a world where imagination is oft frowned upon, this breaks all the rules.

PREVIOUSLY IN NO

Jonathan Nash fully reviewed Go Go!! Troublemakers in issue 5.

something good!!

Experts wanted to write game guides. Excellent rewards! Apply No

Ithough we like to think we know a lot about Nintendo 64 games here at N64 Magazine, we're constantly finding ourselves outwitted by you, our devious readers. You've been beating our highscores, surprising us with tips we'd never realised existed, and even, just recently, presenting us with entire playing guides,

packed with hard-won information. In fact, we've been so impressed by your contributions that we've decided that from now on we'll be devoting four pages each month to the best games-related feature we receive. And we'll award its writer with the latest in designer coldcontrol: an N64 Magazine jacket. (These are still being sewn together, but they're looking smashing: we'll bring you a photograph of one next month.)

Reckon you can come up with something to rival Daniel Glenfield and Nathan Oliver's MK64 Battle Mode guide? Study the 'criteria' below and get your submission in pronto.

### What we're after

- We need about 2000 words of expert advice on your favourite game.
- Follow the example of the 'How to...' guides we've been running in N64 Magazine, and concentrate on one aspect of the game rather than trying to do a guide to the whole thing. (Daniel and Nathan have focussed on Mario Kart 64's Battle Mode, for example.)
- Don't worry too much about pictures or presentation: it's quality of information we're interested in.

Send your guide to: The Jacket Zone, MA Magazine 30 Monmouth Street, Bath BA1 2BW

remembering to include the following information: (1) your name, (2) your address, and (3) the size of jacket you'd like if you win (S, M or L).

We'll print the best guide we receive each month and award its writer an N64 jacket. (Er, Daniel and Nathan will have to wear theirs on alternate days, or something.)

### HOW TO ...

### ...win every single time in Mario Kart 64's Battle Mode

by Magazine readers Daniel Glenfield and Nathan Oliver

An oft-overlooked part of Mario Kart 64 (especially by us) is the set of four Battle Mode arenas, where up to four players can fight for supremacy. Follow the advice of our first Jacket Zone tipsters, however, and you'll find that there's all manner of weaslry to be employed. Over, then, to Daniel and Nathan...

eing a loser is hard, but being a regular loser is even harder. This guide is dedicated to all the losers out there in an attempt to inspire hope in their

After a week of intense playing, including TWO 24-hour sessions, we can finally present to you the ultimate guide to Mario Kart 64's Battle Mode. This guide has tips for players of all skill

levels, transforming even the most passive player into a Battle Mode barbarian (minus the muscles). As a bonus you'll discover how to really annoy your friends, as well as discovering the psychological side of Battle Mode.

And remember: it's not just about beating your friends - it's about doing it in style! Here are a few basic tricks for you to learn, and some useful information.

### **BEFORE YOU START**

### Repeated attacks

Wait for your opponent to fall after being hit, and then hit him again with another shell just as he drives off. (You'll need a triple Shell power-up to

### Quick spin

You don't have to be completely still to perform the spin (A + B + joystick left/right). This allows for a quick turn-around-and-fire-Red-Shell-at-your-

### Ramming

Get a turbo boost at the start of the battle and try to ram your opponent. Sometimes you can get rid of more than one balloon if you continue to hit him while he's spinning. This works best when you have a heavy character (DK, Wario or Bowser) and are ramming a lighter character.

### Too much pasta, Mario!

Strangely, Mario can cause Toad to lose a balloon by ramming him, just like the heavy characters, but

Sneaky!

Invincibility lasts for 1.5 seconds after the neon lights have gone from your character. This is great, as your friend will think you're defenceless, and you can still hit him!

### **Bombtastic**

Use mini-boosts from powerslides to gain more speed and catch up with your assassin and get revenge.

If you're being chased but are in possession of an invincibility star, triple Shell or Red Shell, you can turn a corner, hit the brakes and activate your power-up (or hold down Z if you have the Red Shell). Hopefully your pursuer will turn the corner and crash into your power-up. Either that or they'll go past, with the hunter becoming the hunted!

### **Banana tactic**

Drop bunches of Bananas across the floor in a haphazard fashion rather than a straight line, as this'll make it harder to get past.

### Banana counter-attack

If you start to lose traction after driving straight over a Banana, hold B to save yourself from losing a balloon.

### Super bomb

When you only have one balloon left, always keep your power-up behind you (by holding Z). When you become a bomb you'll still have your weapon, usually allowing you to finish off the person who killed you.

### Teamwork

Try to secretly team up with someone before the game starts, without letting the others know. Also team up when two of you are bombs.

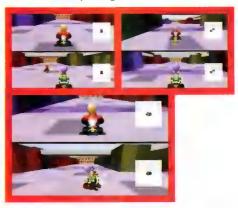

### Where'd my bomb go?

If you have invincibility and have just killed somebody, drive over the shadow (where the bomb is about to appear) and activate it. The bomb can't appear because you're there with invincibility, so it then can't follow you! This is easier than trying to ram a bomb with invincibility to get rid of it.

### Banana barricade

Drop Bananas across passageways by driving across the mouth while pressing Z.

### Double the punishment

Look at the map screen before you start ad remember where each person is before the battle. This is where they'll be placed by Lakitu if they fall off the arena. Drop Bananas and fake power-ups in these places, and if they fall off they'll be punished by losing two balloons instead of one!

### And finally...

If none of the above helps, a quick elbow in your opponent's ribs will work wonders.

### **PSYCHOLOGICAL EDGE**

he following tips are considered by some (usually your opponent) to be 'cheating'. They're not. They simply open up a new dimension to Mario Kart 64. A word of warning, however: don't use this information too often as it loses its effect quickly in front of the same people. Short bursts are all that's required, and you'll find they work exceptionally well against opponents with one

Punishment for using this information too often is usually a smack in the mouth from your 'friend'.

### Method 1

When you're chasing an opponent they need their full concentration to get away. This is when you should start to laugh insanely. This gives the impression that you can attack your friend at any time, and puts immense pressure on him, usually causing him to make a mistake.

### Method 2

If your opponent is known to be a bit sneaky, and has a habit of counter-attacking your tactics, try this trick to make him perform his counter-attack

early leaving him open. What you need to to is begin a countdown while chasing him with a Red Shell. Then, when you shout 'Fire!' at the end (bluffing, obviously), you'll hopefully cause him to use his counterattack prematurely, since he can't risk not using it in case you really do fire. Should this trick start to lose its effectiveness, make your counting irregular, as this'll make it more realistic.

Try combining the two to give you a great advantage over everyone else.

### THE ARENAS

### **BIG DONUT**

This is the most tedious battleground due to players being able to stay on the opposite side of the arena the whole time. But some interesting matches are possible here if the right tricks are used.

### Speed tip

Because of the large floor, you can perform a quick powerslide and miniboost to gain speed and catch up with (or get away from) your opponent. This, as you'll remember, is done by moving the joystick from side to side as you hold down the R button and releasing R after your smoke's gone red.

### **Red Shell tactic**

If you're in possession of a Red Shell, and your opponent is behind you, try this tip: Fire your shell, and then swerve hard left or right. The shell will speed ahead of you, then fly backwards towards your unsuspecting friend.

### **BLOCK FORT**

Easily the most exciting arena owing to the variety of tactics that can be deployed, Block Fort offers excellent replay value.

### Aerial assault

Red Shells fired from the floor above your friend will usually hit him, if he's within range.

### Camouflage

Bananas should be dropped on the yellow fort, as they're harder to spot there.

### Surprise!

Drop Bananas and Fake Items in between the two ramps at the bottom of each fort. Players don't expect this, and in their hurry to escape an opponent they'll fall into your trap. This is excellent if combined with Fatal Fall, as once they're on the floor they'll find it VERY hard to escape to a higher level.

### Surprise! 2

where most players

prefer to go during

the battle.

Same as above, but drop them just after one of the corners on the next floor up

### The dormant killer

Get to the top of a fort. Now, using Bananas and Fake Items on the bridges, box yourself in. Arm yourself with a Red Shell and wait for someone to

### Fatal fall

Simple. Just get up top and fire Green Shells onto the floor. Anyone with the misfortune to fall onto the floor will be in serious trouble.

### Fatal fall counter-attack

Collect an invincibility Star and, sticking close to the fort, sneak up on whoever's up top. This is excellent as long as they don't see you coming.

### DOUBLE DECK

Thanks to this being the largest arena, with its four floors, Double Deck can sometimes leave you feeling alone. Despite this, it's a great level to launch surprise attacks from above or below.

**Corner cutting** 

With enough speed, the corner of the hole on the top floor can be jumped (which is useful for avoiding Shells). However, unless you perfect this you'll just fall down and look stupid.

### **Banana** barricade

This is an excellent precaution against opponents sneaking up on you if you're using 'lt's tactical positioning, not hiding...'. All you need to do is drive across a passage dropping Bananas. This makes it difficult for anyone to get past.

### Where did that Banana come from?

A sneaky tip worth practising, this, as it's an invaluable aid. First, collect a bunch of Bananas. (Singles are no good.) Now, get on the floor below your opponent, and position yourself just in front of him/her. Then hold Up on the joystick and press Z to throw a Banana through the ceiling into the path of you opponent!

### Helter skelter slide

For a fast escape from your opponent, you can perform a powerslide from a corner and, using left and right on the stick, slide all the way down (or up) between levels. If you hug the corners as tight as you can you'll easily lose your opponent.

### Aerial assault

Red Shells fired from the top level through the giant hole in the middle of the floor will almost always hit opponents on the starting level.

### It's tactical positioning, not hiding...

Combining this tip with the previous one will win you more than a few games. Simply hide on the top level in one of the corners (with the powerups) while firing Green Shells into the centre (into the hole). Remember to keep an eye on your opponents' screens, as they may try to sneak up on you. Should this happen there are three escape routes: left, right or down.

### **Escape route cut-off**

Bananas and fake power-ups placed on the starting

block will cause problems for anyone trying to escape via the big hole in the top floor. You can exploit this by chasing your opponent with a Red Shell, waiting until he escapes through the hole and hits a Banana/Fake Item, and then hitting him with the Shell.

### SKYSCRAPER

A fast-paced Battle arena due to its size, Skyscraper offers conflict on a knife edge due to 30% of the arena being made up of pits for you to fall into.

### **Escape from Shells!**

The pit in the middle of the screen can be hopped over with the R button if you have enough speed. Any shells that are following you will fall down the

hole. An added bonus is that your opponent often copies you, and then falls down the pit to his doom.

A similar trick can be achieved via the pits surrounding the one in the middle of the arena. All you need to do is drive at the pit as fast as you can (without hopping) from either side. There's a small ramp which will let you sail over to safety.

### The semi-solid wall

When driving around the outer section of the arena, you can jump (using R) through the walls of the archways that lead to the centre of the battleground. We'd recommend you use lots of speed and aim just to the left of where you enter the archways. This is also very good for escaping from Shells.

### Banana barricade (45-degree version)

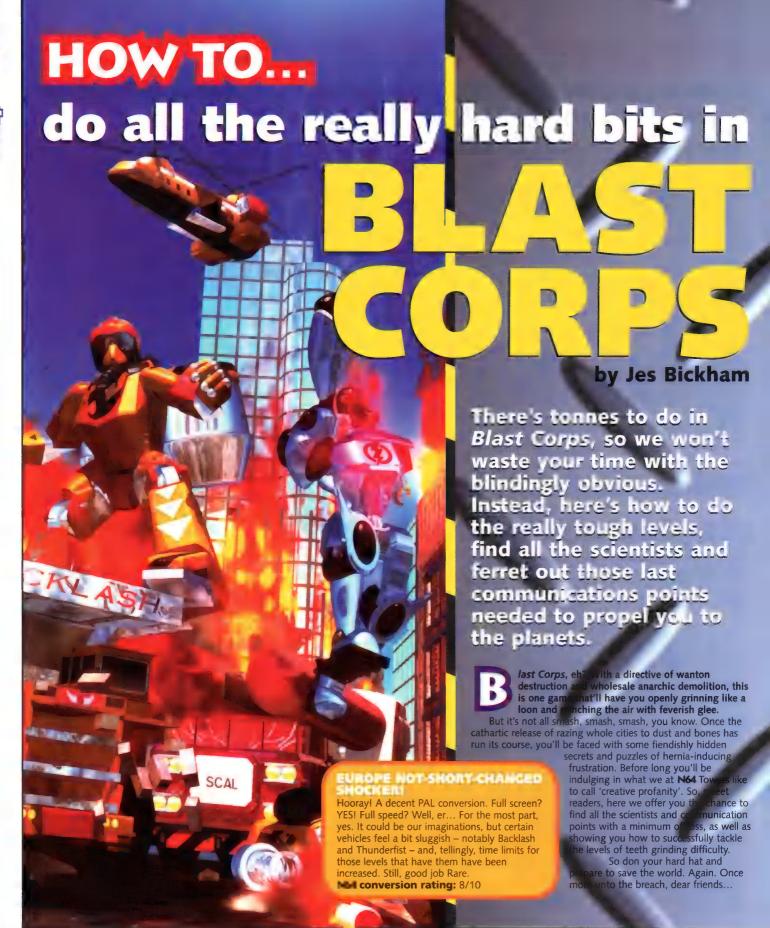

Grab a bunch of Bananas and drive towards an archway. Now drive through the archway at a 45-degree angle to the wall (i.e., from the bottom left/right corner of the structure to the top right/left corner). When an opponent turns into the archway,

they'll be faced with a diagonal row of bananas, which will be almost impossible to avoid!

### WIN A JACKET!

Reckon you can come up with a guide to your favourite part of your favourite game to rival Daniel and Nathan's? Then you could soon be strutting around in a smart N64 Magazine jacket. See page 64 for how to go about it.

### HINGS TO REMEMBER

- Every time you complete a level (saving the carrier AND mopping up), it's vital that you get into the juggernaut, rather than just exiting, as it acts as a save point.
- Upon re-entering level, as well as finding the scientists and the communication points, you'll have to destroy all buildings and activate all RDUs to fully complete it and get that second gold medal. Even objects such as crates, statues and sculptures count, so smash
- 'em all. RDUs don't necessarily all connect; there may be areas seperate from the main lines, so explore fully. Check your stats screen regularly to see how much there is left to do.
- You'll find that certain levels require precision manoeuvering of your vehicle (such as pushing TNT blocks into buildings and concrete slabs into holes). These need delicate short bursts of acceleration tempered with judicious jabs of the B button to act as a brake.
- Finally, be calm. The combination of ticking clock, encroaching nuclear carrier and the required ultrasonic problem solving ability may cause undue tension which will threaten to fracture your crystalline clarity of purpose. Of course, we heartily endorse venting your rage at the notoriously fickle Backlash sometimes you just have to let off a bit

### ARGENT TOWERS

### 2 communication points • 1 scientist

of steam.

The first comms point is on a rocky area toward the left of where you start. Once it's activated, carry on past it and follow the road until you find stone block obstructing a walkway to a lower level. Push it out of the way, exit Backlash, and run down the ramp into the waiting Ramdozer.

Push the TNT block into the door, hop into the train and drive until you see a beacon on the

road above (this counts as a building, so be sure to smash it later). Stop here and get out of the train; you'll be taken down

a secret tunnel to the police car. Negotiate the maze to find the first scientist, return to the train, and carry on to the end of the track. There's a Ballista here. Drive it up the ramp to the road, turn right, and take the left hand turn past the beacon. By the second right turn there are two buildings fronting a depressed area; destroy them and the door at the far end. Get out of Ballista

and go down through the door to another secret passage, which will take you to an entombed J-Bomb. Get into J-Bomb and you can now reach the second comms point, which rests atop an indestructible building by the depressed area.

## CARRICK POINT 2 communication points

The first comms point is on the island in the middle of the lake (the second is in the castle).

Handily, there's a Thunderfist in the car park to help you get it. You'll also find a Ballista to the left of the lake, which you'll need to destroy the boat.

### BLACKRIDGE WORKS 2 communication points

The first comms point is to the right of where you start, behind some buildings.

You'll find the second in a huge area of RDUs on the left near the end of the level

Ham's the cheeky fellal

Blimey! A rather convoluted clean-up operation, this, and one that has to be tackled in the right order - once you've left J-Bomb in the glass house it's unduly hard (impossible) to get the second comms point.

Follow the RDU trail directly ahead of you to find J-Bomb. Destroy all remaining buildings and

fly him to the bridge behind you; the lights on top of it must be demolished, and there's a sphere underneath. On the right hand side of the bridge is a Ballista. Use it to destroy the boat, go back to J-bomb, and fly him out to sea - the first comms point is on an island just off shore.

Jet off diagonally left to another island and destroy the lighthouse, and then fly on to find five spheres hovering over the water.

Get back to dry land and activate the second comms point, which rests on a

rocky outcrop on the cliff at the right of the level. Proceed to the juggernaut at the end of the level, and fly to the top of the cliff in front of it. On the left, by the sea, you'll see a dark patch. Drop down it into an underwater tunnel that takes you to the glass house, where you'll find the Starsky and Hutch car. Get in, and drive straight ahead through the exit tunnel, to collect some otherwise unobtainable submerged RDUs.

### SHUTTLE GULLY

1 communication point

Easy peasy!

The one and only communication point is by the bridge, and you'll also find some spheres on the concrete areas to the right of the level, towards the start and the end.

### **OUTLAND FARM**

2 communication points

Go under the bridge, over the jump and around the corner, then drive up the bank and you'll find the first comms point.

To get the second, simply follow the gully around until you get to the road, and follow it left and over the bridge. The point is on the right, completely surrounded by RDUs

### **IRONSTONE MINE**

1 scientist

When clearing a path for the carrier, you'll find Thunderfist near the end of the level, and your life will suddenly become much easier. The train sheds here count as buildings.

To the right of where you find Thunderfist, there's a small walkway running up the cliff. You'll find Ramdozer in a little cave there. Drive it round the cliffside

track, load it on the crane and lift it over the railway. Push the TNT block into the building and a tunnel will be exposed, leading to a simple maze and a scientist. Huzzah!

### BEETON TRACKS

t communication point

Actually clearing a path for the carrier here is a bit tricky, so here's what you do:

Take the train to the station, get out and run around the building to find Ramdozer. Flatten the small building and lift the 'Dozer over the tracks with the crane. Run back round to

get into Ramdozer, and demolish the big building with the TNT. Simple when you know how, eh?

Head down the road or the left to find the comms point and lots of RDUs there are also plenty more on the other side, along with the Police Car.

### 2 communication points

Turn Ramdozer around and push the TNT block into the railway tunnel. Load Ramdozer onto the train, go on to the station and demolish the building there. You'll find another TNT block here; 'doze it onto the train and choogle your way back to the start and through the new opening.

**EBONY COAST** 

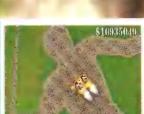

Stop the train so that the TNT is adjacent to the big stone head you'll find here. The resulting explosion will free J-Bomb, who you can then fly across the sea to an island with plenty of RDUs and three Easter-Island stylee

stone heads. If you destroy these you'll be rewarded with a ridiculous amount of 'readies'

Fly back to the train tracks and go left after the second tunnel; you'll find a comms point by the water, and, further on, a scientist by a big stone arch. If you're having trouble finding all the RDUs here, you'll find plenty through the tunnel over the road.

ends meet, vou're a slave to money then you die.

\$11585019

∠ A strange outline, we're sure you'll

\$1477000

2 communication points

### **ECHO MARSHES**

This is another level where the main mission may cause some confusion.

Destroy the buildings obstructing the carrier's path and fly over the hill on the right to find the train. Drive this over to plug the gap (and thus allow the carrier access over the tracks), and

then take the car back through the tunnel to get J-Bomb. Fly on and destroy the offices, then jet over the hill, find the barge on the left, and chug it upstream to ensure that the carrier doesn't go for an early bath. Drive the car back to J-Bomb and give the remaining buildings some hefty slappage.

The first comms point is hiding in the red gas tanker by the barge (there's also a field of RDUs across the river opposite, gold medal fans). The second is perched atop a huge pillar to the right.

1 communication point • 1 scientist

On the right of this level there's a castlelike cliff. Collect the ammo crates in front of it and blast the middle section away. Voila! A ramp is revealed.

At the top is the comms point and a pile of crates, behind which skulks a scientist. (The crates all count as buildings.)

### **GLORY CROSSING**

1 scientist

The eccentric old buzzard is hiding in an area to the left of the main cluster of buildings, accessible through an unhidden underpass.

### **DIAMOND SANDS**

There are no comms points or scientists here. We've included it here because it's one of the most frustratingly difficult examples of video gaming you're ever likely to experience (and that includes the epilepsy/coronary/psychotic-fit-inducing pillar jumping sections in *Turok*).

It's a precision job, and one that the random, capricious nature of (spit)
Backlash seldom sees eye to eye with.
The trick is to smash half of the sheds on one side in, – ideally with no more than two swipes – cross to the other side via

the underpass, destroy the whole lot (aim for 4-5 swipes), then cross back to 'do' the other half of the first side.

The two buildings obstructing the first half of the left side of the second section of sheds really do their best to drive you to the edge of insanity. Should you make it to the last section, your final objective has to be destroyed with hard-to manoeuvre TNT blocks. If you manage to do this

\$7968Y (0000)

in fewer than 20 attempts, our hats are off to you. And the Platinum time... sheesh. It's like learning to ride a bicycle without the use of your legs. Or eyes. Or a bike.

One of the trickiest levels in the game. So what do they give you to drive?

Yep. This one took us 1,000,041 attempts.

### OYSTER HARBOUR

it's Ramdozer you're after, so only shoot out the crates that are blocking your path.

Quite simply, fantastic. This level mixes all that's great about *Blast Corps* into a dazzling whole: big bangs, intelligent puzzles, good vehicles and finely tuned edge-of-the-seat tension that never quite lets you give up hope.

Drive Ballista straight ahead until you can see a crate-obstructed Ramdozer. Shoot the crates and run your little man down to it. Turn around and crush all the crates in the carrier's path, then drive to the TNT-infested area. Exit Ramdozer, go to the crane, lower the platform, get back in Ramdozer and load a TNT block onto it. Go back to the crane and swing the TNT over

to the metal covering the bridge – aim for around the fourth or fifth section from the end – and BANG! Hop back into the 'Dozer and cross the now passable bridge. (If you took too long, the carrier will already be on its way over, and you'll have to take the long way around.)

DON'T push the first block you see into the appropriate hole. Smash the blue buildings on the right and you'll find another hole; it's into this that the first diagonal block goes. Drive over it to a small area with two more diagonal blocks, and ferry them back to their waiting holes. Push all the other blocks into their respective holes.

The last block is hiding behind the two red gas tanks in the top right corner. Decimate the building in your own way, drive over the first barge and park on the second. Exit Ramdozer, run to the third barge and drive it to its intended destination. Run over the footbridge back to the second barge and do the same. Now drive Ramdozer to the first barge and chug down to another dock; there'll be a TNT block waiting. Load it onto the barge and drive back to its original position. All that remains is to push the TNT over the barges to the final building.

Again, if you've taken too long you may

#### CRYSTAL RIFT

2 communication points

There's a Ramdozer later in this level, so once you've gained a bit of breathing space for the carrier, use it to level the last buildings.

The first comms point is behind the train at the start. For the second, go to the concrete area on the right of the level, and follow the furthest trail of RDUs around a cliffside pathway and over a narrow bridge.

There's also an underpass on the left hand concrete area containing a stone slab. Use Ramdozer to push it across the valley to a hole that it'll fit very snugly. Inside is – yes – the A-Team Van. Altogether now: "Ah pity the fool..."

Not the niftiest of vehicles, so grab Ramdozer as soon as you can.

"Craz'foo'!" Sadly you can't bolt oil drums onto it.

#### 1 communtication point • 1 scientist

△ Don't be ashamed if a bead of perspiration forms on your brow at this point.

If he's so clever, then, why's he living in a caravan on an island in the middle of nowhere?

have to wait for the carrier to cross the first barge, then collect the TNT and

nimbly edge it past the nuclear payload, which is, as they say, no easy matter.

The comms point is buried in the warehouse to the left of the block-pushing area. You'll have to shoot this from the cliff top in Ballista, then commandeer Ramdozer to get to it; simply exit Ramdozer and run up the ramp to activate it. (You'll also have to

shoot the boat with Ballista from the cliff side where you start.) To reach the final scientist, fetch the TNT with the barge as you did before, but as you cross the third barge, turn right and explode the huge metal block obstructing the waterway. Hop on the barge and sail out to an island where the brainiac lives. Phew.

#### **VEHICLES**

There's a knack to be learns with every one of 'em

#### RAMDOZER

Easy and pleasing to use, Ramdozer functions best at high speed. When faced with a large building, plough through it in a gentle ziz-zag. This will, more often than not, ensure total structural extinction, thus negating tedious circling back to flatten what you missed.

#### SKYFALL

Always be sure to keep an eye on the buggy's thrust gauge; its slender charms are significantly magnified with a fully-charged turbo boost.

#### BACKLASH

Hmm. The key to understanding Backlash comes from careful observation of its eponymous level. The arrows describe the perfect destructive arc – tellingly, you have to be intimately close to the intended target, with the epicentre of the backswing trajectory correspondingly central to the offending obstruction.

#### SIDESWIPE

There must be space between Sideswipe and any adjacent structure, otherwise the rams don't gain sufficient momentum for demolition. Handily, you'll find most of this vehicle's relevant levels contain rows of parallel buildings, necessitating simple middle-of-the-road placement.

#### BALLISTA

As tempting as it is, haring around manically blasting buildings is this cycle's downfall, as sharp turns, braking and acceleration have a habit of lifting the front end so that missiles overshoot.

#### CYCLONE SUIT

Madly idiosynchratic, this exo suit tends to continue flailing even after you've demolished a whole city block. The only real tip here is to ensure a sufficient run-up before smashage.

#### THUNDERFIST

This second robotic exoskeleton is essentially a more measured Cyclone Suit. Its geriatric gait is, however, agonisingly slow, so be sure to (carefully) roll everywhere. It is also possible to turn while rolling, which is a definite advantage in built-up areas.

#### J-BOMB

For maximum carnage, simply ensure that J-Bomb is centred over the offending construction; you can smash several buildings at once if he's positioned correctly thus.

#### **SNEAKY TRICKS**

#### GET OFF ON THE RIGHT FOOT

Yes, you probably know, but they're ever so helpful in attaining race bonus-level golds. Simply stamp on the gas on or just after the green light. Vroom!

#### 7-TRICK

Park next to a building so as to deny your little man the pleasure of exiting his vehicle, and hold Z. Several Homerian 'Doh's later, and the offending structure will collapse. Strange, but occasionally useful.

#### SPOOKY

Re-enter a race level straight after 'doing' it. You can now race your previous attempt's ghost without the icky ectoplasm business. Egon Spengler would approve.

### BONUS LEVELS

We also thought it'd be worth including the trickler bonus levels. Some contain secret short cuts that are essential for gold medal-worthy times. For the race levels, use the A-Team van or the Starsky and Hutch car, as they're slowed down only negligibly by rough ground, and remind us twentysomethings at N64 of our misspent childhoods. The Hotrod is the fastest, but it's let down by terrible handling, and the Police Car's acceleration just doesn't cut the mustard.

#### 00:05,8 EISON RIDGE 4.2

For a great time here, simply turn right after the jump and rattle over the rough ground, cutting out half the course.

 $00.24.8 \\
03.05.2$ 

#### GLANDERS RANCH

Keep your eyes peeled for a shortcut over rough ground. It's indicated by arrows on the road.

#### COOTER CREEK

Just turn right at the start, drive past the trees, and when you reach the road, slingshot back, doing the same on the other side. There's a comms point rearwards from the start line, but you'll need Ramdozer to get it.

#### JADE PLATEAU

Use Ramdozer for this; you can plough through the buildings directly after the bridge, bringing you out by the finish line.

#### SKERRIES

There's a tunnel through the cliff wall if you turn right just after the second bridge.

Midth is

#### MORRAINE CHASE

Turn left after the third wall and enjoy more cross-country shenanigans. DON'T rejoin the track at the corner – turn left again.

#### **SPACE** The final demolition shuttle clear

Accomplishing this in Backlash is unnecessing difficult, but thankfully Thunderfist is hidden here for hass to free deviastation. Simply drive Backlash round to the right where you'll find an office surrounded by TNT. Do the usual and uncover said mech. Once you've raced everything, the shuttle can land and it's off to the Moon!

00:09.4

#### CODVINE BULLER

Rather than crossing the river to get over the finish line, stay on the right. No watery speed-sappage for us, no sirree Bob, no. There's also a comms point down river.

#### MOON

Wahey! Leap buildings in a single bound. Just what dump trucks were made for. It's essential to gain height using the ridges and craters here, as Backlash is far more effective airborne. The low gravity takes some getting used to, so kick back and have some fun before trying for the gold.

This is a swine. You can't touch ANYTHING apart from your objectives the lava and volcanic walls spell instant doom. The best way to deal with the rafts is to hover at their height, a precarious inchworthy space above the magma. Crunch them first, then shatter the sphere in the center, then head toward the wall on the far left.

There are beacons and spheres arranged in an ascending sequence around the walls of the volcano, and their closeness to the walls means that precision manoeuvering is essential. If you momentarily lay off J-Bomb's thrusters, you can turn yourself on the spot to align yourself perfectly. Remember: short bursts.

There's a comms point to the right of the outside of the volcano.

So then, you've saved the world from nuclear devastation - from which only the cockroaches and Keith Richards would survive -

Taus anything and you'll die. That's the Magazine Office Visitors Policy, anyway.

allowed the Space Shuttle to land, and rescued the Moon from, er, some buildings. Hmm.

Right, then. Once you've gained

Province, he same to follow the Idack of the through the (greentsh white) raised can that constitutes the met of the track

#### So then, the end. Or is it?

Well, in a way, it's very much the beginning...

Once you've added the space levels to your gold medal roster, the game goes into Gold Time Attack (many times of

which you'll already have), and then Platinum Time Attack, which is, frankly, mad. You'll be up against a punishingly strict mistress of a clock (for instance, you'll have to complete Skyfall level in

the region of 3 seconds. Yikes!) that will test everything you've learnt to breaking point. No Magazine wishes you the best of luck, because, quite honestly, you're going to need it.

# 

There's an N64, Super Mario 64, Mario Kart 64, GoldenEye 007, Blast Corps, a V3 Racing Wheel, a Sharkpad Pro, four coloured Superpads and four Tremor Paks up for grabs from Excitement Direct and InterAct!

hat a brilliant prize, eh? And it's all thanks to our pals at Excitement Direct and InterAct.

What was that? Who are Excitement Direct and InterAct, then? Well...

Excitement Direct (and you'll want to pay close attention now) were founded three years ago as a video game mail order company. That's a video game mail order company. Their success, they tell us, has been achieved through not only supplying video games and accessories at affordable prices, but also providing a good service backed up by detailed technical knowledge of the things they're selling. Their friendly sales staff will always be able to tell you about future releases, dates and prices, and they promise rapid delivery of items that're in stock, along with an enormous range to choose from. They're the ones to thank for the N64 and the four games we're giving away.

And if you reckon Excitement Direct are long-established, wait till you hear about InterAct Accessories, makers of, for example, the V3 Racing Wheel and Sharkpad Pro. They've been going since 1991, having been founded by 23-year-old Todd Hayes, and make controllers, joysticks and accessories for all the major video game systems. They've just sold their 100,000th N64 controller in the UK alone, which is why, in a celebratory fashion, they've come up with the V3 Racing Wheel, the Sharkpad Pro, the four coloured Superpads and the four Tremor Paks that complete our prize. And Vaduz isn't the capital of Liechtenstein if it's not so.

# HITER/ICT

#### QUESTION 1

#### Who are Excitement Direct?

- a) A video game mail order company
- b) A maker of plastic coffee stirrers
- c) A sports shop

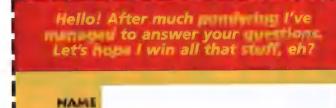

Who manufactures the V3 Racing Wheel and Sharkpad Pro for N64?

- a) InterAct
- b) Drax Industries
- c) Nestlé

#### QUESTION 3

What is the capital of Liechtenstein?

- a) London
- b) Cardiff
- c) Vaduz

AWAILABLE IN BLUE, 75110W, GREEN, SILVER, BLACK, RED AND CLEAR

If you've got a gaming problem, then the Nintendo Hotline are only a phone call away. And if you can't manage that, they write down all their best stuff down for us to print here.

his month some of the Hotline staff were led out of the office, and, blinking uncertainly in the harsh sunlight, told to clear off to London to cover the ECTS trade show. And so, clutching their tickets nervously, they did verily (?) set off into the Great Outdoors. And after much confusion after getting on the wrong train, they finally arrived at their destination...

Nintendo had a huge stand (of course), packed with the latest releases, a GoldenEye 007 set, Mario Kart competitions, and the massive Challenger vehicle. Thousands of people must have walked through and they all said how impressive the N64 had become. There were simply loads of new games, including a version of Extreme G, the new racing game from Acclaim, as well as Top Gear Rally.

The Hotline was there in an advisory capacity, making sure that no one had any problems playing the games, and that the machines were all running perfectly, but additional (and unexpected) duties included being interviewed for Sky News and Swedish TV (?), taking pictures of the beautiful Bond girls on the GoldenEye stage, and, err... making tea.

All in all, a pretty exciting three days, and the Hotliners in question are awaiting sedation after their sojourn into normal Society.

On a more personal note, we'd like to send our special thanks to Sarah, and her wonderful friends Holly, Milla and Charlotte, in Clapham, for putting us up and putting up with us over the ECTS period. You are, without a doubt, the most gorgeous gaggle of girls on the face of this planet.

See you next month!

#### WHAT IS THE NINTENDO HOTLINE?

We're a team of expert games players who use our vast knowledge of all things Nintendo to help gamers in distress. Staff selection is very strict, so you can always be confident that when you talk to a councillor, they are one of the finest gamesplayers in the country and the perfect coach for your gaming skills.

Open seven days a week, 365 days of the year, the Hotline deals with over 2,000 calls a day, spread over the various Nintendo platforms. To guarantee that your call will be answered quickly and your problem answered swiftly, we have doubled our staff and increased our weekend opening hours.

Call us on (01703) 652222 (NOT a premium rate number) and pose your game questions. We should be able to provide you with the answers, whether they're directions, cheats, passwords or simple advice. The Hotline is open Monday to Friday 12pm to 8pm, and Saturday and Sunday 10am to 6pm

#### 10 COMMON QUESTIONS

#### Or 10 questions that are commonly asked...

On Blast Corps, I can't get to J-Bomb on Argent Towers.

> Use the Backlash to destroy all the buildings that it can. Then, use it to

push the large grey block on the far left side of the area out from in front of the ramp.

Get out of Backlash, go down the ramp and get into Ramdozer. Use it to push the TNT crate over to the wooden

door. When the door is destroyed, get out of Ramdozer and walk through the door. You will automatically climb into the train (you won't be able to see it when you get into it, but a 'Smiley Face' will appear

when you do). The 'Smiley Face' indicates that you can exit

Drive the train through the tunnel until you get to the Ballista. Use the Ballista's missiles to destroy the wooden door down in the pit on the right side of the area.

Get out of the Ballista, walk down the ramp into the pit and

go through the long tunnel (you will only see the driver's shadow as he is walking underground) until you come to J-Bomb.

On Blast Corps, I can't find the scientists. Which levels are they hidden on?

The levels the scientists are craftily hiding away on are: Argent Towers, Tempest City, Ironstone

Mine, Ebony Coast, Glory Crossing and Oyster Harbour.

How do I get to the planets after the Moon level on Blast Corps?

Once you've completed the Moon, you must achieve a Gold

> Medal on every course before you will have access to the other Planets. That includes both the Main and Secondary courses. If you see a Course circled in green, then you have missed a Communication Tower. Therefore, you still

have a Gold Medal to achieve.

How do I erase my game on Blast Corps?

> OK, quite a common question, this one. When you switch on the N64, hold Start on your control pad as the game starts up. You should get an 'Erase Data' screen. Simply choose 'Yes' and your games will be erased! Easy peasy.

# ☎ (01703) 652222

I've heard there is an Expert Mode in Lylat Wars. How do you get to that?

To get access to the Expert Mode, you must complete all the levels with a medal on each!

On the Vs. Mode, are there any other vehicles to use?

Indeedy! If you complete the game with medals on all the levels, you will be able to use the Landmaster tanks, and if you are good enough to complete the game on Expert Mode, you can run around on foot with bazookasi Krackahoomi

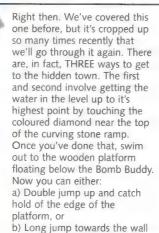

The medals are awarded for not only getting the required amount of points on the different levels, but also for fulfilling certain conditions. Below are listed the requirements for each of the levels.

In all of these stages, all of the characters must be alive! No sneaky shooting down of Slippy!! I'm having difficulties getting to the Pink Bomb Buddy on Wet-Dry World on Super Mario 64! How do you do it?

to your right, then wall kick back off up to the platform. For the third method, you need to triple jump into the painting that leads into the course. This will have the effect of raising the water level slightly higher than normal, which leaves you to swim over to the metal cage in the corner of the course and just jump up, which makes talking to the Bomb Buddy completely unnecessary!

On Turok: Dinosaur Hunter, I've tried to get the Outrage Mode by completing the game on all the difficulty levels without using continues, but it hasn't worked! What am I doing wrong?

Simple! The cheat you've mentioned doesn't exist, I'm afraid! Sorry about that.

When you're on the Star Bridge stage, and the Toasty man pops up, press down and Start simultaneously to fight Khameleon. Cool!

#### **WAR GODS CHEAT MENU:**

On the screen that says "Midway presents War Gods", press Right three times, B, B, A, A. The screen will flash if done correctly. If you go under Options, there should be a menu option called Cheat Menu. Under Cheat Menu, the available options are:

#### P1 SKILL

Handicap feature for Player one.

#### P2 SKILL

Handicap feature for Player two.

#### LEVEL SELECT

Allows you to choose which stage to play on.

#### **GAME TIMER**

Turn on or off the game's timer. Doh!

#### **EASY FATALITY**

You can do the fatalities without having to remember what the

character's specific move is. To execute the Easy Fatality move, stand at the required distance needed to do the Fatality, and simultaneously press High Punch, Low Punch, High Kick and Low Kick.

#### PLAY AS GROX

On the Character Select screen, on the control pad, press Down, Right, Left, Left, Up, Down, Right, Up, Left, Left. You should hear the

confirmation phrase "All Too Easy." Keep the cursor on the character it's on and press any button. The cursor will be on the name of a character, but when you start gameplay that character will turn into Grox.

#### **PLAY AS EXOR**

On the Character Select screen, on the control pad, press Left, Down, Down, Right, Left, Up,

Left, Up, Right, Down. You should hear the confirmation phrase "All Too Easy." Keep the cursor on the character it's on and press any button. The cursor will be in

the name of a character, but when you start gameplay, that character will turn into Exor.

It's something of a Tips
Extra special edition this
month, as we compile our
Top 5 tips of all time.
Which are the N64's
handiest tricks? And,
furthermore, why? And!
We've still got space to
squeeze in the bestest
ever Top 10 Reader Tips!

#### N64 MAGAZINE'S TOP 5 TIPS

#### 1. TUROK - DINOSAUR HUNTER THE BIG CHEAT

Simply enter NTHGTHDGDCRTDTRK at the 'Enter cheats' screen.

Quite frankly, this is swimmingly juicy big dream of a cheat which gives you all previously published cheats (all weapons, infinite ammo, etc.) as well as warps to all the levels and bosses. This will either ruin your game or send

you into a trigger happy fit. It makes James dribble, which could, feasibly, be a sign of either.

#### 2. SHADOWS OF THE EMPIRE BE A BAD GUY

Select a new game slot and enter your name as \_Wampa\_\_Stompa. (The lines here are spaces. Be sure to insert two between 'Wampa' and 'Stompa' or this cheat won't work.) Select Medium game difficulty, and set the controller configuration as Traditional. You can now stomp the pesky rebels with your very own AT-ST!

Once the AT-STs appear in the second round of the battle of Hoth,

press Left on the D-pad and Right C simultaneously. Then quickly press Up on the D-pad and

use Right C to scroll through the camera views until you see the AT-STs. Once they're selected, use the D-pad to control your walker and press up on the D-pad to shoot those Snow-speeders down.

C'mon now, didn't Luke make you sick? Squeaky clean little twerp. Well, now you can indulge in all your Dark-Side-related fantasies. Remember: no scruples = no rules. Heh heh heh. (You can also 'be' a Wampa and a Stormtrooper – see **N64**/5 for details.)

#### 3. MARIO KART 64 TURBO START

Yes, that one. Press the accelerator button halfway between the second and third lights coming on for an exhaust-flaming speed start.

True, the world and his dog know about this, but it's importance can never be overstated, as it is the fundamental cornerstone upon which Karting excellence is built. Many a game has been won and lost in the N64 office simply by virtue of a supreme start, and a missed opportunity is all that's needed to

prompt one of Tim's infamous streams of bileinflected, spittleflecked profane invective, which would shock even the foulest of mouth.

**DOLPHIN RIDE** 

#### 4. WAVE RACE 64

Choose Stunt Mode and Dolphin Park. You must perform every stunt, and here's the patented N64 method of doing so:

Start to Checkpoint 1: Hoodstand with somersault, riding backwards, handstand.

Checkpoint 1 to 2: Clockwise barrel roll, backflip and submarine dive. Checkpoint 2 to end: Anti-clockwise barrel role.

Now reset the game, and the intro will show dolphin-mounted racers. Hold down on the control stick when selecting your character and go

to the Dolphin Park Championship warm-up. Hey presto! Not a tuna in sight.

Ah, bleary eyed with nostalgia, all those Saturday mornings sat in front of Flipper come rushing back to mind. Don't you just dream of riding a 110 Mph dolphin, somersalting off a ramp and submarine diving? Thought so.

#### 5. PILOTWINGS 64 DRIVING ACROSS THE USA

Simply land the Gyrocopter on a nice long strip of straight road and then change the view to first-person. You can now drive! Like a car! Instead of flying! Brilliant. Ok, so it's of absolutely no use whatsoever other than its novelty value and the way that when you hit a bump you take off, causing certain people

in this office to coo "Chitty Chitty Bang Bang!" in an infantile manner.

#### YOUR TOP TIP

Found an interesting cheat, up, stated hill or quirky lifting to cin in one of your games? Then send if to us immediately. Each month we'll comple a cheat of the best and if you make it in, and if and you dut a rather faith N64 pin banger. If you get the covered Number I shot we'll an you send that you lift have been a stated to protate Don't send an state we've aboutly protect, though, it makes James cross.

4. SHADOWS OF

THE EMPIRE

ome great stuff this month, including two new Mario Kart shortcuts - Daniel Parker's Toad's Tumpike one is a 'doozy', as they say, er, somewhere. We think. Elsewhere we've a selection of tactical bits and interesting game quirks,

1. MARIO KART 64

To cut off loads of time on Toad's Turnpike, use this short of the track that crosses over the other, do a sharp turn to the right and jump the barner (this may take some time and practice to get right). You'll fall right through the track and land on the lower part! Daniel Parker, Winchester

#### 2. 15564

When the opposition call oper has the ball in his hands (after a weak shot). - cwe your striker next to him. Now, when the keeperlets go of the ball and the camera is tollowing it, hit A and B (shove) — y — II hear the 'kee' er hit the lloor if it's dome on relly – and you'll get away with a free foul, even with Carlos as referee. This tip will make your opponents bling an their useless reserve weeper, who will be much easier to score against!

Die d Glenfield, Abingdon

such as the mysterious Riku's Pilotwings tip. If you've found a smashing N64 game tip that you think the nation needs to know, then send it in via the coupon below. The monthly top tipper wins a Sharkpad Profrom the shirty stars at Interact (01204 862026).

> you, so come out of the alcove and wait. In a few seconds he'll jump down in front of you. Run back behind the metal and shoot, he won't shoot back. Repeat this several times and victory will be yours without loss of life. Michael Burley, Devon

#### 5. STARFOX 64

For extra points I way your laser, but DON'T get a lock on. Fire the the many, or at one is to the side of the enemy, and you'll score bonus points. For example when one enemy is in front do as above, and you'll get 1 point for the enemy and one bonus point. Robert McMahon, London

#### 6. MARIO KART 64

Here's a multi-player glitch a friend and I found: or the ground level of Hook fort it's possible to crash through the corner of a block in the centre of the arena You'll fall into a back pool, and Lakitu will put you back into the arena. This can be used to push opponents off course, causing

them to lost a balloon. when you have no powit-

Rea Blicely, this trick is difficult to perform, but it is fun nevertheless! Alistair Dent and Juson Cuddy. Stirlingshire

#### 7. DOOM 64

I've discovered a mp way of killing the giant brown slu collect the blue orb and retreat into the back of one of the monster-spawning gates (making sure you haven't closed it with a pentagram). You'll now find it much maker to avoid its affacks Occasionally a fireball will find its way inside, but this is easily avoided by strafing left or right. By continually strating and shooting you'll eventually kill it with minimal loss of energy (50% at most). Interestingly, it only takes 24 missiles to kill as opposed to 44 for the Cyber-Demon Chris Southam, Burnley

I've found that if you play training mode through to the end you get into 'All Range' mode. You probably already knew that, but if you keep shorning all the ships for long enough you get to fight star Wolf actually attack!

#### 9. PILOTWINGS 64

Choose Campoball level 2 (Crescent Island). If you shoot your plot at the mil and white passenger cruiser going round the stand in the bay and hit it, you I get a points! It's possible to hit the bast from all four locations. So far I've been unable to hit the pesky spiridbuar, so I con't know if you get a score for that too. Riku

#### 10. A TIP FOR YOU

When playing Lu favourite N64 always remember "Be of the game, not in the game" Adam Cooper, the Essex Badlands

Order Answerphone at all other times. Some titles may not be released at time or going to press. Prices are subject to change without notice. E&OE. Callers welcome by appointment. Please state type of computer when ordering.

Please note that member prices apply to Club First members only

Do you long for a chance to prove your N64 prowess to the world? A team of N64 letter openers are ready and waiting for your entry...

nd still they come. We're still staggered by the amount of I'm the Best mail that we recieve every month. What's even more heartening is the spirit of dedication and good natured competition that's apparent from your many, many letters. N64 fans, it seems, are the most devoted in the world. And please, keep them coming - as good as your times are, there's room for still more excellence.

Once again, the majority of your entries are for Mario Kart, resulting in plenty of no-holds-barred jostling and charts in a state of continual flux. But what about Starfox and Turok? Are there any challenges to the thrones of Stuart Richards, A. Barker and Seth Eagles? C'mon, give it a go...

Anyhow, whatever game you think you're a bit handy at, send in your scores and times to the usual address. Top dogs, as always, are awarded with the fabled NSI pin badge. Good luck!

Our Koopa Troopa Challenge continues apace, with our time-to-beat having been well and truly, er, beaten. James Watt from Higham is currently riding high in pole position, with a smashing time of 1'42"66. Can the little tinker be beaten? That, readers,

is up to you... Once you've mastered the short cut here, it's going to be a test of true driving skills to get the best time. And you've only got three mushrooms; we reckon it's best to use them on the final straight of each lap, across the sea, to

the finish line. But maybe you've found a

better place to use them... go on, surprise us, why don't you?

Send your entries to us by no later than November 7th, and if you're the victor, you'll win a Sharkpad Pro from the ever-lovely Interact (01204 862026) as well as a handcrafted\* N64 badge. Mark your entry "Here's my Koopa Troopa Triumph" and send it to the usual address

Mario Kart 64 Teoper Black 1'42'66 (PAL times only)

This month's Star Performance goes to Tommy Earl from Heaton, who's beaten all newcomers for the Frappe Snowland top spot with a sterling time of 00'32"32. "What?" we hear you cry "But he's cheated!"

Well, yes, it is an obvious short cut-led time, but it's by far the BEST short cut time we've had. If you think you can 'do' the shortcut, on all three laps, and get a better time, then do send it in along with some proof. We'll run a kind of mini-league to see who can get the ultimate

Frappe Snowland 'cheat' time, just for the glory of being the best.

Meanwhile, well done, Tommy. We would send you some N64-type stuff but we've, er, lost your address in the chaos of the office. Do get in touch and tell us, and we'll see what we can do.

#### **How to enter**

You can enter as many of the leagues as you like, as many times as you like. But (ah! But!) if you want any of us suspicious types at N64 Magazine to believe you, you'll have to send a picture or a video of your achievements. Only then will the coveted word 'Confirmed' affirm your excellence. If you're sending photos you MUST please write your name, address and score/time on the back of each. With videos, please tape a label with the relevant info to the case. This is very important, as anything we recieve has a habit of being absorbed into the stalagmites of correspondance through which we wend our delicate way every day.

Send your entries to: I'm The Best, N64 Magazine, 30 Monmouth Street, Bath BA1 2BW.

If you'd like your stuff back, include a SAE with your entry. We'll do our best to get it back to you, but it's best not to send Aunt Dot's copy of her Golden wedding anniversary. If your score doesn't appear, don't worry – we work to harsh deadlines, and it's not always possible to get everything in the issue. It will appear eventually, though.

Holes in your N64 Magazine collection? Then exclude that draught with some carefully chosen back issues. They're as fresh as the day they were printed -

| Please send me the following back issues at £3.50 each:   |

he world of the Nintendo 64 is a mysterious place, filled with impossible screenshots, shrinking magazines and over-pervasive apes. Trying to make sense of it all (in the strongest possible terms) are the ever-diligent readers of N64 Magazine.

Write to us at:

Club 64, N64 Magazine, 30 Monmouth Street, Bath, BA1 2BW

Fax: 01225 732275

e-mail: n64@futurenet.co.uk

Any letters printed win a prized Magazine badge!

#### "A bad name"

When I was in York, I went in to a shop to look at the N64 games, and when I got to them, on demo was supposed to be *Super Mario 64*, but it was *Super Mario World* on the SNES! This is giving the N64 a bad name. You have to DO SOMETHING!

Gary Loughheed, Blackburn

I've raised my left leg into the air. Will that do? **Ed** 

# "Important revelation"

I've just realised something! I get several games mags each month but N64 Magazine is the only one I read cover to cover – even articles on games I'm not really interested in, such as Wayne Gretzky and Forsaken.

Why is this?
Well, on further thought I believe it's
(a) because the

quality of the writing is so good that most of the articles are sufficiently interesting and at times entertaining that they warrant reading in their own right anyway, (b) there's always the chance of an important revelation that I

might otherwise miss, and (c) the best things require absolute completion (SM64 and Starfox 64 bear testimony to this). Just thought you ought to know! Tony Moogle Kenley, Surrey

Great! And with our morale suitably boosted, it's back to the complaints... **Ed** 

#### "Keep quiet"

One Mr Andrew Mills from Londonderry. Is it just me, or has everyone else noticed but decided to keep quiet? This man does nothing but use his N64 and his camera.

When I saw the time he'd achieved for the preliminaries of the Mario Kart championship, I'd then only mustered a mere 1.15"38, after a couple of hours' play. And so I admired the man. But now he's pushed it too far. I can handle his time trials (especially the Wave Race one), but the photos of Pilotwings! Please, Andrew, leave your house. Do something else. Anything! Otherwise things could get serious. We could be subjected to time trials over 'how quickly the N64 can be plugged in and turned on', with pictures of Andrew holding his stopwatch. 5th, issue 6

Andrew does occasionally leave his house. In fact, he popped in to see us this month, and, would you credit it, brought his video camera. **Ed** 

#### "There it was!"

I was hoping I'd have a chance to win a control pad with a cheat I

# "Funny colours!"

the other day. I was having a close look in the back of my (UK) Super Mario 64's box. On if I noticed some peculiar-looking scientships of the game. One shows Maint in the minor worst with only fivepowers start. Not at least 30 are required to least. This point. Another shows Many in Course B. Shifting Sand Land with only five power stan. At least eight must be found before unlocking the door which leads no this point. Net another thoses Warlo fighting Bowser with only one Power Star eight are required. The the conand Power Star nounters living different

and are in harts colours! The place where Maria is fighting Boveser in also different! Ham you get any idea what's going on? Michael Hughes.

Clon't juine. The explanation here is that as with the word Mano. Kat seven shot in some 6's Clots 64. Nintendo have illustrated the game with sarty pictures taken helpre the game was finished. This is often done because a game in

plackaging Newto to the westigned and privated in advance of the game itself going into production. Itself-rathy Mintendo have done this for the UK sensors, thought which came but nine months after Mano G4's Ispanese release, is another of those ineffable Mintendo-related counterers. Ed.

#### "That thing"

Today illined just managed to no the tackaging off my nervi and wonderful copy of Start Corpo, and mail tenter to anality tenter heafer, when I noticed the screenmots of Mana Katt. In player 4's screen, what the neck is that

feather for? In it the heather from Super Mans on the SNES. Which makes you By? And what's that I bing in the item box on player 2's acreen!

#### John Tang Epping

Pre-production pictures again The little character

are facing the serong way foo, pay 11 makes. The feather feather is Super Maino Kart on the SNES, and allowed pins to hop over things, but Juoks like in was liktched at the fast manure from MK6A. Quite refut that pend and oning might be, however, we let relate, floaders, pour suggestions please. Ed.

discovered for Mario Kart 64 that I hadn't seen printed in your magazine. So I sent it to Readers' Top Ten Tips about two months ago. Since then I've always read the magazine, hoping it would appear.

On Wednesday, 20th August, a

week before I went back to Spain, I couldn't wait to see if it appeared, and because I know the magazine normally comes out in the shops a day before you advertise (In some kind of parallel universe, is this? — Ed), I went into town to buy it,

A The controversial Mario and in question. Sorry, Juan, I'm afraid mu just pipped you all a post.

ringing WH Smith's first to make sure it had arrived.

When I arrived at the shop they were still in the plastic covering, and all I could see was Zelda 64 on the

cover. I couldn't wait to see it, as I had a feeling that at least one of my letters was printed. When I got to see the Readers' Top Ten Tips, there it was! The cheat I'd sent in was number one! Then... a few lines below... WHAT? Paul Williams? That's not me! I felt like ripping up every single N64 Magazine in the shop, and going home without buying it. But I didn't. I like it too much, and just had to buy it. Juan Orive Siviter, Madrid, Spain

Sorry. Often with the best cheats, loads of people tend to discover them at the same time, and it's pot luck as to who gets them to the **N64** office first. Hopefully a badge will be of some consolation. **Ed** 

"Nothingness"

Listen up. N64 Magazine issues 1-4 are all 28cm 1mm tall, N64 Magazine issue 5 is 28cm tall, and now N64 Magazine issue 6 is 27 cm 9 mm tall. What's going on? Soon N64 Magazine will shrink into nothingness. Is this because of the lack of N64 software, or are there any other reasons?

Tom Holzer, via e-mail

Erm, it's the cold weather. You know how it is. **Ed** 

Zy's the coolest. How come he doesn't get a picture any more? He did all that hard work on Mario, Pilotwings, Killer Instinct Gold and others. But all he got was three pictures.

Kevin Eddie, Chester

Sand Sales and S

A couple of issues ago, someone was talking about a cheap imitation of N64 Magazine. It's true! Someone has been making a mag just like N64. It's disgusting. It makes me sick just thinking about it.

Suzie Rishworth, Farnham

'Lylat Wars'! Why? Why not 'Starforce 64', or something equally less embarrassing? Ray Gomes, Ashford

I can't understand how people can manage without games like Mario, Wave Race and ISS 64. Knut Steile, Norway

I thought your Starfox 64 review was the best review I've ever read, and, by Slippy, I've

read a few.
Peter King, Rustington

I've sent you a present. It's a pop-up Melissa George to put on your desk.

B Payne, Plymouth

# DREAMON

#### Here's where dreams could become reality, if any clued-up games developers are reading...

be a big bore. Indeed, many

games are criticised for only

having a few tracks - Ridge

Racer, for instance. But the idea

is that, because there's only one

track, the detail and action would

be superior. It would be a bit like

Pro Pinball: The Web on the

SEIKEN DEN SETSU I SPECIAL EDITION
What I really want to see is an updated, translated version of the amazing Super Famicom game Seiken den Setsu 3 (or Secret of Mana 2, which would have been the name had it ever been released here in the West). It would have

scrolling (in-out like in Yoshi's Story), huge polygon bosses, more frames of animation (even though the SNES version had a satisfying amount of frames), larger sprites, updated magic (explosions à la *Turok*), antialiasing and, of course, 3D flammie/Buu Suka Buu/BonBoyagie flight! This would be really cool.

Andre Tonnesen, Norway

That would be smashing, but it's unlikely ever to happen. Still, that's what dreams are for.

#### ONE-TRACK RACING

I'd like to play a racing game that has only one track and only a few cars to choose from. I know what you're thinking: this would PlayStation, which only has one, highly detailed table. The best example of this is Sega's new arcade machine, *Le Mans 24-Hour*, using their new AM-3 board, which has just the one track.

Adrew Cole, Bracknell

I'm not so sure. One-track games are great in the arcade, where you only play them occasionally, but I reckon that single track's appeal would start to wither under the intensive playing it'd get at home. Take a look at Diddy Kong Racing for tracks that are both numerous and detailed. Ed

#### TUROK 3

My idea for a new game is Turok 3: In New York. The game would be along the same lines as it is now, but you could blow up cars and there'd be a lot more people to kill. The aim of the game would be to collect the secret gems which the Campaigner (again) had sent into the future to New York, along with Turok and lots more baddies trying to

stop him getting his hands on them. And also, as he's a dinosaur hunter he could kill mech raptors and triceratopses! Simon Brooks, Hertfordshire

And instead of fog, of course, there'd be smog. Perfect. **Ed** 

#### **BATMAN 64DD**

I'd love to see an RPG for the 64DD based on the Batman animated series. It would be viewed from a *Mario* 64 viewpoint, and would take advantage of the 64DD's clock and rewritable capacity.

By day you would take control of Bruce Wayne. You'd arrange meetings with company bosses of whom you were suspicious, and collect info. Or, as the game would be played in real-time, a criminal might escape suddenly from Arkham Asylum. At this point you could return to the Bat-cave and adopt a false identity (such as 'Matches' Malone) and go to one of Gotham's sleazy dives and ask the local thugs if they've heard on the street what the criminal's scheme is. Then, if things got a tad rough, you could slip into a Bat-costume and fight your way out.

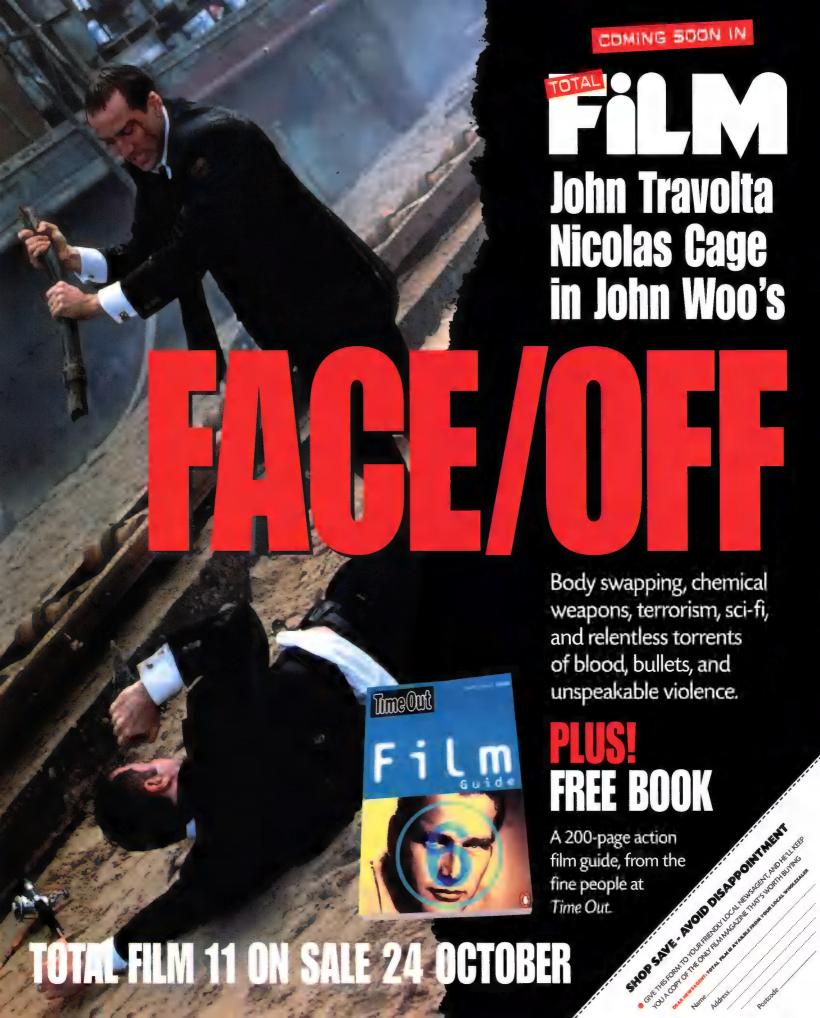

There'd be update discs, with new characters to control like Robin, Batgirl, Huntress and so on. I'd love Konami to do this game, as they can clearly do great 3D games. They also did marvellous jobs of Batman animated and Batman Returns on the SNES.

James Toye, Glasgow

This would indeed be great, especially if you had the full complement of Bat-accessories and the graphics were as stylised as the cartoon. A fine idea. Ed

Woken up with a brainwave? Then write it down quick and send it to: Dream On, N64 Magazine, 30 Monmouth Street, Bath BA1 2BW.

#### INVENTION CORNER

Welcome, would-be Sir Clive Sinclairs, to the N64 Magazine lab, where the technology of tomorrow is hatched. Possibly.

GAME BOY 64

Nathan Missen of London reckons it's time the Game Boy was replaced with something a little more sophisticated: a hand-held N64. (And so do Andrew Hoggett of Cardiff and John Lewis of Milton Keynes, coincidentally.) He's cunningly incorporated the N64's innards into a Controller and stuck a screen in the centre of it. His pricing is perhaps a little eccentric – £99.99 for games and 3p for memory cards that plug directly into the carts – but he's probably spot on with his external battery pack with 28 cells in it: colour hand-helds eat electricity like lawnmowers.

#### THT PAR

When we ran our design-a-controller-plug-in competition back in issue 3, billions of you suggested something that makes the Controller react when it's tilted, which is what you do anyway when you're trying to evade persistent baddies. Jason Steadman of Wallasey has pursued the idea further, coming up with an ingenious system of ball bearings and electrodes to detect movement. He's even included a clip to stop the Controller's cable getting in the way. The Tilt Pak's a fine idea. So, third-party peripheral manufacturers, how about it?

PRINT CLUB 64

With the N64 struggling in Japan, what Barrie Davies of London reckons is that Nintendo should cash in on the

craze for Print Club sticker machines (as featured in Max's arcades feature in issue 4). So he's designed a simple combined scanner and printer that plugs into a spare Controller port and allows you to scan in photographs, adorn them with game-related pictures, and then print them out as stickers. "It would help to revive N64 sales in Japan," Barrie reckons, "but a release over here would be unlikely." Nintendo's next move after the 64DD?

Invented something? Then jot down how it works – and do a sketch if possible – and send it to: Invention Corner, N64 Magazine, 30 Monmouth Street, Bath BA1 2BW. As with everything in Club 64, any ideas we print win their creators gleaming N64 Magazine badges.

# "Down the chimney"

I've thought of a few of uses for Super Mario 64 other than playing it as usual

Firstly, you could use it to pick numbers for the National Lottery. Simply attempt all three slides twice (Peach Slide, Course 4 Slide and Course 12 slide), each time noting how many coins you collect. If you collect more than 49 on any attempt, divide it by two (and, if necessary. round it up). There are many different ways to get these numbers. On Course 4, for example, choose to play with or without your penguin opponent, or to handicap you even further, play Course 4 Slide, Star 3, having got all 120 Stars to race against an even bigger and tougher penguin. Another option would be to try to avoid as many coins on these slides as possible, and the number you do accidentally get is the number you put on your Lottery card. So far I've won £10 twice over four weeks!

On Course 4, you may have got angry at the little penguin you try to rescue if he repeatedly walked away and was hard to pick up.

Here's how to get your revenge. Return him to his mother and then steal him back. Or you could chuck him down the chimney near the start. Or chuck him down the shafts where the cannons are. You can even chuck him

off

a hill.

With a couple of friends you could play your own Mario Athletics. Simply go through your favourite courses and compete. For example, on Tall Tall Mountain (just before the canyon before the pink Bob-Omb), see could can long-jump across the gap parallel to the wooden walkway. Or on Course 15, see who can do the most wall kicks in an attempt to reach the blue coins and pink Bob-Omb. Or try a marathon/free-style, using any means necessary to get away from the 1-Up mushrooms that chase you. For instance, outside the castle a mushroom 1-Up in the third tree from the waterfall will chase you until it touches you.

Andrew Antoniades, London

Ingenious. But can you think of a gaming use for our lonely and disused FIFA cart? **Ed** 

#### "Don't understand kids"

I just had to write in sympathy with Jeremy Davies from Chichester, who says his parents don't understand kids.

Have his parents actually tried playing any of the great games on the N64? If not, they really don't

know what they're missing. I myself am a 29-year-old mum and I just can't wait to get my hands on the latest games.

Sometimes I'm up most of the night with my friend,

who's 24, trying to better our scores. We've got nearly all the N64's games and enjoy them all immensely.

Jane Coldwell, Portsmouth

Would you like to be our collective **N64** mum? **Ed** 

# "Key chains, ice-creams"

I've just got back from my summer holiday in France. I don't know what their problem is, but wherever I went I couldn't escape Donkey Kong. He was on all the Kellogg's cereal boxes, and there were Donkey Kong action

figures, sticker collections, trading cards, key chains, ice-creams, Pogs, a comic and even a tacky Saturday morning children's show which only had Donkey Kong at the beginning. Worst of all (trust the French) there's a Donkey Kong record.

Tim Henry, Reading

It sounds like our chums across the Channel have fallen victim to the evils of marketing, which you can read all about on page 98.
Well, the French? What have you got to say for yourselves? Ed

# "Key chains, ice-creams"

I felt compelled to send in some more *Pilotwings* photos. I hope you like them. I would also like to say thanks for the work experience. It really was great. You may think that I caught you at a bad time (being past your deadline), but it was the perfect time to see what it's REALLY like working on a games

mag. So all you out there reading this should listen up:

Stop harrassing Wil. This man is exceedingly busy and works more hours than there are in the day. Stop asking him to 'do' more covers. I would like more myself, but you can only truly appreciate the amount of work this man does when you see him in action.

Also, these guys DON'T play games all day. They do, of course, play them (that's their job, after all), but there's a hell of a lot of pressure involved and a HELL of a lot of writing – more than you'd think.

So stop whining and forget all those illusions that working on a games mag is just playing games all day. Those wanting to work on a mag listen very carefully: you MUST be able to take pressure. Journalism is no doss. I know, and I only write a fanzine (with my friend) and for a newspaper, and that's hard enough as it is. So give it plenty of thought. I know I still want a full-time job in video game journalism, though. Andrew Mills,

Thank you too, Andrew, for coming to visit. It was a pleasure to see a true Mario Kart artist in action. Sorry if we were a bit grumpy at times. **Ed** 

Londonderry

#### So tell me this...

#### Your questions go on getting tougher, but still no cracks in our knowledge have appeared. Not very big ones, anyway.

1. I run my N64 Illrough a SCART lead into a monitor, but I want to sell the N64 and get a US machine. Will this work?

2. Are monitors 50Hz, 60Hz or multistandard?

3. Do you know of anywhere that still sells US SNESes, new or used. And do you know where I can pick up a copy of

Final Fantasy III?
4. Do they still sell SNES in America? 5 Who are Super Mario Club in the ending to Starfox and Merio 64? 6. My universal converter wipes the save games on the UK cart plugged into the rear. Why is this?

7. Also, I lose my high-scores in Starfox unless I kerp the UK game plugged in. Why is this? Saul Minshall, Bristol

7. It should wark just 2. It depends entirely on the monitor Old ones will probably by 50 or 60Hz,

while the latest, more expensive ones lend to be multistandard.

3. In reliable mounter should be able to furnish you with a US SNES. You'll be lucky to not hold of a conv

4. You had a them, believe it or not. 5. The Y'r Nintendo's Japan to team of in-house james testers, who check each new name for bligs and evaluate

6. Game saves are held in little RAM chips in the cart (nowaven by a small Latter / Dim of the side-effects of the cart at the 'key' has a convertor cart is the this RAM gets amped, It's not had any long term effects on the carts we use but it might on a most idea to use a cart

7. It seems from our care mining train convertor mining is unable to make the to the thinking make the cart you plug into the back of the as the key care has hare up RAM (and you always use it with Volly import name, you'W still be now to access your sawe points, though Ed

1. Will the new Rumble Pack versions of Mario -d Wave Race be released in the UK?

2 If so, is it worth selling my original versions of the games and buying the new ones?

3. Will you be giving away another video of this year's Shoshinkai Show? 4. How about you sell the video

5. If you do make another video, would you please show on it how to jump over the right side of the wall on Mario Circuit in Mario Kart?

6. What is the UK release date for Doom 64 and Extreme 67

7. Will Nintendo release a Nintendo museum game similar to Name Museum on the May Statinn? Michael Parsons, Engner Regis

1. I doubt it, as they've harmly caused a stir in Japan.

2 Not really.

3. We don't have any plant to at the moment, but we're never quite sure what's going to hamsen from one day to the next here at N64 Magazine, 10 you never know.

4. Well, to be honest we'd rather

concentrate on putting together the world's finest Nintendo 64 magazine than get into the video business. Rest assized, though, that

N64 Magazine will bring you the fastest, most community news direct from Shoshinkai - James and Max will both be there to make sure of that.

5. Can you still not do it? It's wa the same as jumping over the left-hand side, but you twist the joystick to the right skyllly as you hop

6. Doom should - out now, with Extreme G due late in October. 7. Probably not. Nintendo seem keen

to emphasise how technically sums streated the N64 is, and are better off distancing their new machine from their old ones. Ed

1. My mate says he's got the Banana Cup in Mario Kart 54. Is he lying or not? 2. Will the 64DD have longing times? 3. Should I get Blast Corps or Lylat Wars next?

4. Is the Jolt Pak any good? Ben Elry, St Clears

1. It is a line of the line of than ones.

3. The both great garages so get them both II you can. Lylat Wars
in bably just has the sage through
4. Er, in what remove It definition adds it depends on how well developers use it. Ed

1. Will Sonic ever come to the N64? 2. Why is Clayfighter called 'Clayfighter 63 1/3'?

3. Will there be other titles after MK Mythologies, like one on Scorplon as there is one on Sub Zero?

4. My friend thinks the N64 can play SNES games. Could you tell him this is total rubbish so he can see it with his own eyes?

5. I've heard of a new Sega console

this true?

Robert Rowland, Hirwaun

1. He won't, no.

2. Because witerplay thought it would be furnity. Dur sides are in serious spilltling damper

3. That seems to be Min Value intention. It'll any on hov ell Sub Zero goes down, thur gli 4. Kobert': Inlend: you're a clot. Of course the N64 can't Think SNES es Blimey.

5. Both Sega and sury are warning on new 64-bit consoles to rival the N64, but neither is due out until around 1999. By then there'll doubtless in talk of a new Nintendo console... Ed

1. Should I buy Mario Kart 64 now, or wait for *Diddy Kong Racing* to come out in November?

2. If I buy an American version of Mario Kart and use it with an adaptor for my PAL N64, will it run at the same speed as the PAL or the SCART version?

J. Are any point- n'-click adventures (5am & Max, Monkey Island) planned for the N64?

4. Why do games come out in the UK so much longer with the Japanese and American versions?

5. Why is Starfox 64 being called Lyint Wars in Britain? And will it run at the same speed as the Japanese and American versions?

6. When is Silicon Valley due out?
7. I heard a rumour on the Internet that Banjo-Kazooie has been delayed. Is this

#### PERSONNEL MANAGER 64

Play the big poss in a large firm and manage staff to maximise your profits. Curiously, the game rewards you for a Dickensian approach to staff motivation: say for instance you've managed to get them working long hours of unpaid overtime, threaten to cut their wages unless they 'step up a gear'. The big flaw with Personnel Manager 64 is realism – you couldn't really treat people this badly and expect them to stay, could you?

# **Games RECT**(

#### **BLAST CORPS**

**Nintendo** £60

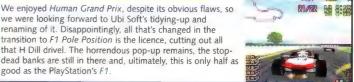

A preposterous storyline is the excuse for some full-frontal global destruction as the Blast Corps - a kind of space age demolition gang - get to save the world by, er, knocking most of it down. There's no doubting that the game is one of the most idiosyncratically original on the N64 and one that you're almost certain to enjoy. However its lifespan problems (mission repetiton is never ideal) mean that your love affair with the game may be disappointingly short-lived.

Park against a building with your vehicle's door against it. Repeated pressing of Z will cause the structure to explode. Full BC guide in N64/8

NGA

we were looking forward to Ubi Soft's tidying-up and renaming of it. Disappointingly, all that's changed in the transition to F1 Pole Position is the licence, cutting out all that H Dill drivel. The horrendous pop-up remains, the stopdead banks are still in there and, ultimately, this is only half as good as the PlayStation's F1.

**F1 POLE POSITION** 

If your bloke in the pits shouts at you to come into the pits, don't bother. You can make

#### **INT. SUPERSTAR SOCCER 64**

Konami

Ubisoft

N 3 ● 92% ● TW

The finest football game in existence, ISS64 is, quite simply, a work of art. It certainly looks gorgeous, but the real delight comes from its genuine football-ness. You can build the most intricate of passing build-ups, deliver the killer through-ball and score the sweetest of goals - all just like the real thing. An almost flawless game which could only have been bettered with the addition of real teams. Kills all known FIFAs dead.

KILLER INSTINCT GOLD

To get the super teams enter this code at the title screen: Hold Z and press Up, L, Up, L Down, L, Down, L, Left, R, Right, R Left, R, Right, R, B, A, Start. ● Full game guide in N64/4.

#### **DOOM 64**

#### Midway

Think about it: Turok's far better than Doom, and GoldenEye's far better than Turok. So, for anyone other than those people for whom *Doom* is the gaming equivalent of breathing, this PAL release of Midway's tricky blaster is going to seem a pointless exercise in expenditure. It's solid and it's workmanlike, but up against Acclaim's dinosaur-basher and Rare's breathtaking Bond licence it looks dreadfully old hat.

7 0 77% O JA

5 • 88% • JS

#### Nintendo/Rare

62% MH

Killer Instinct might have been a big deal a couple of years ago, but even an arcade-prefect conversion looks a bit out-dated on the N64. It's not that KI wasn't a good game to start with - if you're still in love with it, you'll definitely enjoy this version - it's just that for most people enthusiasm for this type of beat-'em-up is at a low ebb. And that includes us.

 To access the extra options, during the character bio screens in the intro press Z, B, A L A, Z in sequence. Tips in N64/1 and in the review in N64/3.

● At the password screen enter ?TL BDFW BFGV JVVB for a complete cheat menu Other tips in the review, N64/7.

#### FIFA 64

#### **MARIO KART 64**

**Electronic Arts** 

£60

2 • 39% • TW

**Nintendo** 

£60

4 91% OJD

This makes you wonder two things. Firstly, how, with all that advanced technical gubbins at their fingertips, EA managed to produce a worse FIFA game than the PlayStation's. And secondly, how, in the wide, wide, world of sport, this passed Nintendo's quality control department. The Albanians execute people for lesser offences.

While it doesn't quite achieve the total perfection many had expected. Mario Kart 64 is still a vital purchase for your N64. Its outstanding feature is undoubtedly the multi-player modes, and in particular the four-player grand prixs. But you'll still find yourself racing the one-player games too, long after you've beaten the game. The disturbingly addictive Time Trial mode offers almost infinite longevity. Brilliant. Buy it.

Remember, you only need tap the shoot button once. The delay is terrible but you will eventually produce something. Don't press it a second time or your shot will fly over

• At the start of the race, time your acceleration burst just before the light turns green to

#### MORTAL KOMBAT TRILOGY

**SUPER MARIO 64** 

£60

1 • 34% • TW

**Nintendo** 

65/ 1 96% ZN

Ahhchh, another Mortal Kombat sticks in the throat of beat-'em-up fans. This is really poor - the animation a sub-standard variation of the PlayStation's, with an overall presentation level little better than that of its SNES ancestor. A wealth of options, cheats, extras and finishing moves can't save this. Avoid with clinical determination.

When other developers first caught a glimpse of SM64, they went back to the drawing board with their efforts. The game is sublime, taking everything that's made previous Mario titles great and fleshing it out into 3D. Mario himself can do just about anything, the levels are huge, packed with incredible ideas and loads of secret bits. Without a shadow of a doubt, this has to be the world's greatest video game.

For unlimited credits, press Down, Down, Up, Up, Right, Right, Left and Left on t Story screen. When you lose, you'll have infinite credits. Cheats in N64/1 and N64/4.

Loads of tips in our review in N64/1.
 '20 most-asked questions', N64/1, N64/2. Guides in N64/2, N64/3, N64/4, N64/5

#### **NBA HANGTIME**

#### **TUROK: DINOSAUR HUNTER**

GT

6 • 52% • JS

**Acclaim** 

1 • 91% • TW

The immortal NBA Jam series continues on the N64 with this dated arcade conversion. Apart from the fact that the 3D and sprite work looks distinctly out of place on the N64, the real problem with Hangtime is that two-on-two basketball gets very boring very quickly. Relentlessly running up and down the court exchanging baskets with the CPU is not our idea of fun, and even with a huge cheats list, your attention will soon wander

Replacing Doom's cyberdemons with screen-filling dinosaurs cranking up the violence to ludicrously bloody proportions and adding a series of breathtakingly devastating weapons, Acclaim/Iguana have produced - yes - a monster. A phenomenally good game which really shows the technical gulf that exists between the N64 and other consoles.

■ Create duplicates of star players by entering 0000 as your pin. Now type in your name as the name of the player. ■ See N64/3 for a complete list of names.

■ At the edge of a platform the screen will dip. Jump here to gain maximum distance ■ Full cheat listing Tips Extra N64/2. ■ Key-finding guide in N64/2.

#### **PILOTWINGS 64**

**WAVE RACE 64** 

**Nintendo** 

**Nintendo** 

£50

1 • 89% • TW

**Nintendo** 

£55

2 90%

The first Pilotwings split gamers' opinions with its floaty, airbound subject matter. However, this 64-bit refurbishment is likely to have a much wider appeal than the SNES original. Intermingling the sublime talents of flight sim specialists Paradigm and Nintendo's usual playable sheen, Pilotwings 64 emerges as a supreme example of how to harness the N64's immense potential. Up, up and away.

■ The four Birdman Stars are situated in the park in New York, inside the Arctic Island's waterfall, in a cave on Crescent Island and on the bridge-shaped rock on Holiday Island Breathtaking water-based racing is the order of the day in Miyamoto's astounding Wave Race, with the N64 once again proving its mind-expanding capabilites. Thoroughly realistic water effects, a scintillating two-player speedway and the possibility of trying your hand at Lee-Majors-style stunt work make this easily as enjoyable as Mario Kart 64.

■ To achieve the Helicopter stunt and 1700 points, when you're on the ramp, turn sharply in ■ Left/Up direction and then hold Down to pull off a sideways flip.

**WAYNE GRETZKY'S 3D HOCKEY** 

#### SHADOWS OF THE EMPIRE

1 0 78% • JA

676 • 75% • TW

With ten levels of varying game styles, Shadows somehow fails to be more than the sum of its parts. Fab snowspeeder and space battles are ultimately let down by some lacklustre Doom-style bits and the truly awful speeder bike on Luke's home planet, Mos Eisley. It still has a great Star Wars feel, though, and is loads better than the PC's Dark Forces.

For sheer whizz-bang, puck-zipping magic Wayne Gretzky is hard to beat. An excellent range of options ensure that the full ice-hockey spectrum is covered - from the three-man arcade knock-about to the full-team, over-legislated complete simulation. It's fun in multiplayer - especially the two on two arcade mode - and overall the only thing that lets it down is that fact that, when all's said and done, it's only ice hockey.

■ To see the end sequence, enter your name as \_Credits (case sensitive)

Challenge Point guides in N64/2 and N64/3

■ Loads of tips in Tips Extra N64/5. ● For super teams, go to Setup and then Options, hold L and press the C button sequence: Right, Left, Left, Right, Left, Right, Left and Left.

#### **GO GO!! TROUBLEMAKERS**

UK release:

5 ● 90% ● JN

Strangely backward but enormously entertaining, Go Go!! Troublemakers is an enigma that might not be solved even when the game gets translated. There are bundles of levels and a degree of imagination and innovation that companies like Midway can surely only dream of. It's not going to impress anyone with its graphical prowess, but sometimes that kind of thing can take second place to the game itself.

- No cheats are available for Go Go!! Troublemakers
- Expect a complete solution to the game when it's released in the UK as Mischief Makers.

#### **CRUIS'N USA**

Midway

**UK release**:

1 • 34% • JD

Racing across the USA isn't tough, even with the irritatingly over-sensitive controls. The music is awful, and the graphics use only a fraction of the N64's power. Avoid

#### DARK RIFT

Vic Tokai

**UK release:** 

It's a plain old beat-'em-up, basically, and while it's better than War Gods and Killer Instinct, there's just nothing new here to excite even the most ebullient of fight fans

#### DORAEMON

**Epoch** 

**UK release:** 

2 • 60% • TW

Sadly, Doraemon turns out to be slightly linear, slightly confusing and all-too-tedious Mario clone. Perhaps it's more suited to your younger brother or sister

#### THE GLORY OF ST ANDREWS

Seta

6711 ● 58% ● TW

The N64's first golf game lacks any redeeming features whatsoever. A ropey graphical engineand dodgy controls add up to an experience as ugly to watch as it is to play.

#### HEXEN

Midway

UK release:

5 69% JD

After their triumph with Doom 64 (all-new levels, brand new textures) Midway bring Hexen to the N64 party. Sadly, the game is exactly the same as its elderly PC mum, and the one new element - the four-player split-screen deathmatch mode - fails in Hexen's resolutely single-player levels. It's still lots of fun in a retro kind of way, but in the N64 world, where Turok reigns supreme, it's hard to recommend whole-heartedly

■ To activate the cheat menu, pause the game and press Top C, Bottom C, Left C, Right C very quickly. ■ In the Cheat menu, press Left C, Right C, Bottom C for invincibility.

#### **HUMAN GRAND PRIX**

Human

Winter 1997

6/1 2 • 71% • TW

Although never matching up to the high standards of the PlayStation's F1 - inexcusable, really, when you consider the extra power available to its programmers - Human Grand Prix provides some throughly entertaining Formula 1 driving thrills, with beautiful handling and a plethora of options. Shame about the horrendous pop-up, though

For optimum cornering, don't use the brake, just stab at the accelerator. For an example of a course layout, read our review in N64/2

#### **GANBARE GOEMON**

#### Konami

Whilst not ever likely to threaten Mario 64 in the all-round goodness stakes, this timely N64 release for Konami's muchloved, blue-haired wonder kid nevertheless sees a pile of good ideas thrown together to produce a marvellously entertaining adventure. But to be honest, unless you're fluent in Japanese you'll experience huge problems about half way through. We did. Wait for the likely English translation.

On the southern island you'll discover a location marked with a huge red torii gate Climb all the way up, for some fiery coins

#### JANGOU SIMULATION MAHJONG

#### **Video System**

UK release:

R64 7 • 69% • JD

So, the best Mah Jong game yet? Well, yeah, probably but when all's said and done - does it really matter? With its more 'trendy' approach to the game (smart-casual businessman alongside pretty, short-skirted females), it'll probably sell like wild-fire in ker-razy Japan. And, bless 'em, they'll find it's got all that they could have wished for: white tiles with squiggles

on them and, erm, other stuff. Good, then.

■ Jonathan, now the resident Mah Jong expert, says: "Watch your opponents carefully. If they go for the triplet, you go for the kong". (No, he doesn't. – Ed)

#### **GOLDENEYE 007**

**UK release:** 

7 • 94% • JA

Well, we thought it would be good. But - really and truthfully - never this good. No other N64 game (except one, perhaps), let alone Doom game, is as majestically structured or superbly realised. The locations are as close to their celluloid brother's as you could possibly wish and the villains are all in there in glorious digitised form, and if you've ever wanted to be Bond you know, really be him - you need never look any further.

If you complete the various missions within specific times, you can access various cheats such as the big head DK Mode.

#### J-LEAGUE PERFECT STRIKER

Konami

UK release:

N671 ● 89% ● TW

Konami prove their footballing dominance with a magical footballing sim, combining breathtaking animation, a plethora of fantastic moves and some outrageous goals. Perfect Striker is as close to The Beautiful Game as any computer rendition has ever come. It has since become ISS64 for its UK release. Goal Lazo, as some would no doubt say.

Learn how to use the 'kick-ahead-and-run' button (Bottom C) both for attacking and catching opposing players.

#### KING OF PRO BASEBALL

#### **Imagineer**

1 • 68% • TW

The players are super-deformed and cute which is entertaining. Eventually, though, the too-slow runners and the super-skillful CPU opposition will begin to get you down.

#### MULTI RACING CHAMPIONSHIP

#### **Imagineer**

UK release: September

5 • 81% • JA

MRC makes full use of the analogue and the on and off-road sections feel challengingly different to drive. However, its disappointing easy to complete

#### What do you mean you already knew? O Cheats in N64/7 **WONDER PROJECT J2**

What with this being # 64-bit machine and everything, merely transferring Tetris onto the N64 would be like Delia Smith nipping out for chips (erm, sort of). So, Nintendo and

developers H2O have turned the Game Boy's finest moment into a fully 3D affair with jungle-dance-techno music and a

whole paint-palette-full of colour. And the result? A partially

successful puzzle game, if not an essential one.

**UK release:** 

3 65% JD

Mah Jong 64 is more of a beginner's guide to the game than previous efforts. However, with its heavy reliance on Japanese text, things will still prove fairly tricky.

Enix

UK release:

**UK release:** 

1 0 55% WO

● 71% ■ JB

Guide a robotic girl through various 'real life' situations with the overall aim of making her a real person. Weird, very Japanese and very difficult to overcome the language barrier.

As the shapes drop from the screen, put them into the spaces on your sphere! What?

#### MAH JONG MASTER

**MAH JONG 64** 

#### Konami

Koei

N671 ● 69% ● WO

If you've never played mah jong, this would be a very tough way to learn, with its copious Japanese text. Otherwise, the slickest of the Mah Jongs

#### **WAR GODS**

**TETRISPHERE** 

**Nintendo** 

Midway

**UK release:** Before Christm

4 • 46% • JA

Although it's the first proper 3D beat-'em-up, that's all War Gods has really got going for it. For beat-'em-up junkies only.

#### **POWER LEAGUE 64**

#### Hudson

UK release: No. thanks

NGA 7 42% JA

We've got nothing against baseball - even though, plainly, it's tedious - but this effort from Hudson, the first N64 ball-andbat title to utilise real players, is tragically awful. For a start the players have no faces and all the speedy gracefulness of a fire engine, and the CPU-controlled teams are straight from the Maradona School of Honesty. All in all, a complete and utter pile of tosh. Avoid as though it were a disease

Change your pitcher regularly so the cheating CPU can only launch one out of every three balls into orbit.

#### **POWER PRO BASEBALL 4**

#### Konami

UK release:

3 • 54% • TW

No, we haven't forgotten the '6'. PPB4 is the fourth in Konami's series of baseball games which started on the SNES years ago. Despite the fact that the game went ballistic in Japan, we don't rate it as highly as Imagineer's effort, King of Pro Baseball. The players are similarly 'fat', but the picture-inpicture system doesn't work that well and the game is criminally difficult against the CPU.

See N64/3 for tips on understanding Japanese game menus.

#### **STARFOX 64**

#### **Nintendo**

**UK release:** 

NGA 3 94% JD

Lock up Shigeru Miyamoto, a rabbit, a team of Nintendo's finest programmers, a fox, a toad, a small star system and a falcon in a room for twelve months and Star Fox 64 is the result. It's the shoot-'em-up the N64 has been waiting for, pushing the machine to new limits of technical sophistication and being immeasurably good fun into the bargain

Complete the game and at the title screen hold B and move the Analogue stick. Our heroes' heads will follow the wandering '64'. III Full guide in N64/8.

Here we do the NEA's man reliable internet tiles blog with the web addresses of more of the most public of and destroyen. If a publishing how the in UK have the do not reliated the plane courter.

PLUS! WIN A HEAP OF IMPORT GAMES

CATED TO PRESERVING A PART VERLOOKED MOST OF THE TIME.

NES BY RESTORING
DIST FOREVER.

INTICLES DIRECTLY ON THE SITE,
YOU ARE LOOKING AT RIGHT NOW,
IS FROM START TO FINISH.

JCH HIGHER RESOLUTION VERSIONS OUSE-CLICK AWAY WILL BE ABLE ES ONCE MORE.

DO HOWEVER ONLY SEEK OUT MAGAZINES WHICH ARE PUBLISHED PRIOR
THE YEAR 2000, UNLESS PERMISSION HAS BEEN GRANTED BY THE PUBLISHER
QUESTION TO DO OTHERWISE.
E ONLY EXCEPTIONS TO THIS RULE ARE DREAMCAST EXCLUSIVE MAGAZINES,
E TO THE NATURE AND CIRCUMSTANCES SURROUNDING THE SYSTEM,
WELL AS NINTENDO 64 EXCLUSIVE MAGAZINES.
PRINTS AND RE-ISSUED CLASSIC MAGAZINES IN ANY SHAPE OR FORM
BITAL VERSIONS INCLUDED) WILL BE TREATED LIKE NEWER MAGAZINES,
CH MEANS WE WON'T BE SCANNING OR DISTRIBUTING THEM.

IE REASON FOR RESTRICTING OURSELVES TO MAGAZINES PUBLISHED FORE A CERTAIN DATE, IS TO GIVE PUBLISHERS ENOUGH BREATHING ROOD SELL REPRINTS OR DIGITAL VERSIONS OF THEIR OLD MAGAZINES THEY WISH TO DO SO.

JESE ARE HARD ENOUGH TIMES AS IT IS FOR PRINT AND THE LAST THING WOULD WANT IS TO DO IS HAVE ANY KIND OF NEGATIVE EFFECT ON THE SEEK OUT TO WORK WITH PUBLISHERS AND ARE ALWAYS LOOKING TO SEK APPROVAL TO DIGITIZE, RESTORE AND RE-DISTRIBUTE THEIR WORKS WHATEVER WAY THEY SEE FIT. (PUBLICLY OR WITH SILENT APPROVAL)

WE HAVE NO INTENT NOR DESIRE TO PROFIT FROM THESE DIGITAL MAGAZINES IN ANY WAY, SHAPE OR FORM, NOR DO WE HAVE ANY DESIRE TO FINANCIALLY HARM ANY PUBLISHER, EDITOR, WRITER OR PERSON INVOLVED IN CREATING THESE, OR ANY OTHER MAGAZINES FOR THAT MATTER.

WE ARE NOT HERE TO DO HARM, BUT TO HELP PROTECT THEIR LEGACY.

THAT IS WHY THE PRE-2000 DATE IS IN PLACE:

TO PROTECT THEIR BUSINESS AND LIVELY-HOOD, AND TO MAKE SURE THAT WE WILL BE ABLE TO KEEP ENJOYING NEW MAGAZINES FOR MANY YEARS TO COME.

WHILE AT THE SAME TIME ENJOY THEIR BACK CATALOGUE.

WE WOULD LIKE TO THANK EVERYONE WHO MAKES THIS PROJECT POSSIBLE. FROM THE ORIGINAL WRITERS, EDITORS AND PUBLISHERS, TO THE CURRENT COPYRIGHT OWNERS AND EVERYONE INVOLVED IN ACQUIRING, DIGITIZING, RESTORING, PRESERVING AND DISTRIBUTING THESE MAGAZINES.

ONE LAST/THING:
F YOU COME ACROSS ANYONE TRYING TO SELL ANY OF THESE DIGITAL
MAGAZINES, OR PROFIT FROM THEM IN ANY WAY, SHAPE OR FORM,
PLEASE DO NOT SUPPORT THEM!

YOU ARE VIEWING THE "MAX-REZ" VERSION OF THIS ISSUE RIGHT NOW.
THIS VERSION IS CREATED FOR OPTIMAL VIEWING ON LARGE DISPLAYS.
IF YOU ARE LOOKING FOR A SMALLER RESOLUTION VERSION
OF THIS ISSUE, FOR USE ON A TABLET OR PHONE,
BE SURE TO CHECK THE MAGAZINE CATALOGUE ON OUR SITE.
